PERFORMANCE MONITORING FOR GEOTECHNICAL CONSTRUCTION

ASTM SPECIAL TECHNICAL PUBLICATION 584
L. I. Stern and C. J. Dunnicliff symposium co-chairmen

List price $14.00
04-584000-38

AMERICAN SOCIETY FOR TESTING AND MATERIALS
1916 Race Street, Philadelphia, Pa. 19103
NOTE

The Society is not responsible, as a body, for the statements and opinions advanced in this publication.

A Note of Appreciation to Reviewers

This publication is made possible by the authors and, also, the unheralded efforts of the reviewers. This body of technical experts whose dedication, sacrifice of time and effort, and collective wisdom in reviewing the papers must be acknowledged. The quality level of ASTM publications is a direct function of their respected opinions. On behalf of ASTM we acknowledge with appreciation their contribution.

Editorial Staff

Jane B. Wheeler, *Managing Editor*
Helen M. Hoersch, *Associate Editor*
Charlotte E. Wilson, *Senior Assistant Editor*
Ellen J. McGlinchey, *Assistant Editor*
Contents

Introduction 1

Monitoring Ground Movements Adjacent to an Excavation in Downtown Chicago—R. G. LUKAS AND D. E. ANDERSON 3
Instrumentation 8
Conclusions 19

Monitoring of Two Braced Excavations in Chicago—
J. A. CUNNINGHAM AND L. D. CARPENTER 20
Description of Sites 21
Strain Instrumentation 23
Comparison of Measured Forces with Design Forces 25
Discussion of Strain Data 28
Discussion of Strain Instrumentation 29
Conclusions 30

Instrumentation of a 50-ft (15.2-m) Deep Braced Excavation—
G. E. BAUER 32
Description of Excavation 33
Instrumentation 37
Calibration 42
Factors Affecting Instrument Accuracy 49
Evaluation of Instrumentation Performance 54
Conclusions 56

Gage Construction 59
Laboratory Investigation 60
Field Investigation 61
Factors Affecting Gage Performance 62
Percentage Error and Special Characteristics of the Gages 67
Design of Brace Load Instrumentation 68
Load Measurements During Strut Removal 72
Conclusions 76
Performance of Tied-Back Excavation at Water Tower Place—
J. P. GNAEDINGER, S. A. GILL, AND P. A. KEIM 78
Site and Soil Conditions 79
Construction Procedures 87
Conclusions 97

Excavation and Soldier Pile-Tremie Concrete (SPTC) Wall Instrumentation and Monitoring Program—R. E. BROWN 100
Project Information 101
Program Objectives 101
Program Development and Implementation 103
Crack Survey 103
Survey Monitoring 105
Tiebacks 106
Slope Indicator 107
Conclusions and Recommendations 110

Monitoring Consolidation Settlements of Soft Soils Induced by Dewatering—A. PARTOS AND R. M. KOERNER 111
Background Information 112
Dewatering System 113
Monitoring System 117
Test Results and Analysis 121
Evaluation of Monitoring System 123

Modified Mat Foundation Design Over Soft Clay—C. N. BAKER, JR. AND F. P. WIESINGER 127
Soil Investigation Program 128
Soil Profile 129
Analysis for Bearing Capacity and Settlement 129
Structural Design Concepts of Foundations 132
Instrumentation Program 133
Construction Performance 134
Conclusions 139

Soil Strain Measurement Using Inductance Coil Method—E. T. SELIG 141
Characteristics of Inductance Coil System 143
Soil Compaction Measurement 146
Soil-Structure Interaction 149
Traffic-Induced Strains 150
Conclusions 156
### Instrumentation of Large Buried Culverts—E. T. SELIG
