NOTE
The Society is not responsible, as a body, for the statements and opinions advanced in this publication.

Peer Review Policy
Each paper published in this volume was evaluated by three peer reviewers. The authors addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the authors and the technical editor(s), but also the work of these peer reviewers. The ASTM Committee on Publications acknowledges with appreciation their dedication and contribution of time and effort on behalf of ASTM.
Foreword

The symposium on the Use of Synthetic Environments for Corrosion Testing was presented at the National Physical Laboratory, Teddington, Middlesex, England on 10–12 Feb. 1986. The symposium was sponsored by ASTM Committee G-1 on Corrosion, Deterioration, and Degradation of Materials and the National Physical Laboratory. P. E. Francis, National Physical Laboratory, and T. S. Lee, National Association of Corrosion Engineers, served as chairmen of the symposium and are editors of the resulting publication.
Contents

Introduction 1

Corrosion Studies in Complex Environments—GERHARDUS H. KOCH,
J. MICHAEL SPangler, AND NEIL G. THOMPSON 3
Discussion 17

Simulating Automotive Exposure for Corrosion Testing of Trim Material—
GARDNER S. HAYNES AND ROBERT BABOIAN 18

The Effects of SO₂ Scrubber Chemistry on Corrosion of Structural Materials—
FLORIAN MANSFELD AND SAMUEL L. JEANJAQUET 27

Testing Methods for Indoor and Outdoor Atmospheric Corrosion—CHRISTIAN FIAUD 58
Discussion 68

Review of Corrosion Studies of Metal Containers Using Synthetic Media—
THOMAS P. MURPHY AND GRAHAM A. PAPE 69
Discussion 78

Synthetic Environments for the Testing of Metallic Biomaterials—ANSELM T. KUHN,
PETER NEUFELD, AND TREVOR RAE 79
Discussion 96

Laboratory Evaluation of Materials for Resistance to Anaerobic Corrosion by
Sulfate-Reducing Bacteria: Philosophy and Practical Design—
JAMES F. D. STOTT, B. S. SKERRY, AND R. A. KING 98
Discussion 111

Comparison and Control of Microbial Spoilage of Metal-Working Fluids and
Associated Corrosion—EDWARD C. HILL, GRAHAM C. HILL, AND
DAVID A. ROBBINS 112

Alloy Ranking for Corrosion Resistance Laboratory Tests Versus Field Exposures—
WILLIAM L. SILENCE, STEPHEN M. COREY, AND JURI KOLTS 120

Synthetic Solutions and Environment Sensitive Fracture—R. N. PARKINS 132
Discussion 141

Intergranular Corrosion of Austenitic Stainless Steels—An Electrochemical,
Potentiokinetic Test Method—DERECK R. JOHNS 142
Discussion 151

Ammonia Test for Stress Corrosion Resistance of Copper Alloys—EINAR MATTSSON,
ROLF HOLM, AND LARS HASSEL 152
A Synthetic Environment to Simulate the Pitting Corrosion of Copper in Potable Waters—PAUL D. GOODMAN, VICTOR F. LUCEY, AND CARLO R. MASELKOWSKI 165

The Use of Synthetic or Natural Seawater in Studies of the Corrosion of Copper Alloys—JAMES E. CASTLE, ANTHONY H. L. CHAMBERLAIN, BRADLEY GARNER, M. SADEGH PARVIZI, AND ABRAHAM ALADIEM 174

The Effect of Dissolved Copper on the Erosion-Corrosion of Copper Alloys in Flowing ASTM Seawater—WING K. CHEUNG AND JOHN G. N. THOMAS 190

Synthetic Versus Natural Marine Environments for Corrosion Testing—KENNETH L. MONEY AND ROBERT M. KAIN 205

Laboratory Solutions for Studying Corrosion of Aluminum Alloys in Seawater—STEPHEN C. DEXTER 217

Particle Containing Formation Water for the Study of Erosion Corrosion—THOMAS KOHLEY AND EWALD HEITZ 235

Discussion 244

Pitting of AISI 410 Stainless Steel in CO2-Saturated Synthetic Seawater and Condensate—DALE R. MCINTYRE 246

Simulating the Pitting Corrosion of Steel Reinforcement in Concrete—JOHN M. SYKES AND PETER H. BALKWILL 255

The Electrochemistry of Steel Corrosion in Concrete Compared to Its Response in Pore Solution—J. L. DAWSON AND P. E. LANGFORD 264

Discussion 273

Materials Performance for Residential High Efficiency Condensing Furnaces—BARRY HINDIN AND ARUN K. AGRAWAL 274

Summary 287
