Author Instructions

Extended Abstracts

Where to Submit Your Manuscript for Consideration:
Submit manuscripts to the ASTM abstract submittal site, in accordance with these instructions.

Copyright. Include the appropriate copyright statement on the bottom of page one:

- Copyright 20__ by (Copyright holder’s name). Published by ASTM International, West Conshohocken, PA, with permission, OR
- This paper is a work of the U. S. Government and is not subject to copyright protection in the United States.

Extended Abstract: Extended Abstracts include the title, authors’ names and affiliations, Extended Abstract text, with figures and tables embedded in the text as close to the reference as possible with captions, and references. It should be carefully proofread by the author. The extended abstract must be in good scientific American English; this is the author’s responsibility.

Commercialism Policy: It is ASTM's policy to avoid commercialism in all publications. Therefore, use generic terms whenever possible. Capitalize trademarks and trade names when used. Use the symbols ® and ™ when appropriate. Include the company name, city, and state in a footnote the first time used and capitalize the trademark name throughout the rest of the paper.

Copyright Permission: All necessary waivers of copyright permissions must be obtained by the author, retained by the author, and cited in the publication with the copyright holder's permission. Multiple publication or publication of work of others without written permission is never acceptable. All cost for copyright permission is the responsibility of the author.

Requirements: The suggested page length is 4 minimum to 8 maximum single-spaced pages including all figures and tables on 8 ½ x 11 size paper with 1” margins in Microsoft Word using 12 point Times New Roman font The text should be left and right justified except for the title and authors with affiliation that are centered. Double space between paragraphs.

Title: Should be as concise as possible but informative enough for the symposium program. Center the title using 14 point, Times New Roman font using upper and lower case, bold.

Authors' names: Center all authors’ names under the title using 12 point Times New Roman font with their affiliations including organization, postal address, city, state, and country. Use upper and lower case, not bold.

Body of Extended Abstract: Should include introduction, procedures, results, discussion and conclusions, any acknowledgements, and complete references.
Equations: Should be neatly typed, punctuated, and aligned to bring out their structure, and numbered on the right. Mathematical operation signs (equal to; lesser than; greater than) should be placed at the left of the second and succeeding lines in multi-line equations. Use a multiplication sign (×) rather than a centered dot, except for scalar products of vectors. The solidus (/) should be used instead of built-up fractions in running text, and in display wherever clarity would not be jeopardized. Use "exp" for complicated exponents.

Units: SI Units of measure must be used as the primary measurement.

Symbols: All unusual symbols whose identity may not be obvious must be identified the first time they appear and at all subsequent times when confusion might arise.

Footnotes: For footnotes that appear in the text, use superior numbers. For footnotes in tables, use superior lower case Roman letters, beginning with the letter "a," for each table. The footnotes should appear below the table.

References: All references must contain complete information to allow a reader to find the cited materials. Refer to The Chicago Manual of Style for guidance. Website references must contain the title of the site, the URL, and the date you viewed the site. If possible, also include the author, the date the information on the site was written or posted, and any other pertinent information that will help the reader find the reference. These should be kept to a minimum as URLs often are removed or replaced.

Citing Standards: A standard from ASTM or other SDO mentioned in the text should have initial caps and be typed without quotes or italics and include a complete reference to the Standard. Example: "...this was the case according to ASTM: A252-98el." In the manuscript's reference section, the Standard should be given as follows: ASTM: A252-98el: Standard Specification for Welded and Seamless Steel Pipe Piles, Annual Book of ASTM Standards, ASTM International, West Conshohocken, PA, 1998.

Tables: Separate tables (numbered with Arabic numerals in the order of their appearance in the text) should be used for all but the simplest tabular material; they should have captions that make the tables intelligible without reference to the text. Authors should make every effort to prepare tables in Portrait rather than Landscape layout.

How to Prepare Your Figure Files:
Please adhere to the following guidelines when preparing your figure files for submission:

- The symposium chairman may recommend improvement or elimination of poor quality, illegible or irrelevant figures.
- Number figures in the order in which they appear in text with corresponding number in the text.
- Label all figure parts with (a), (b), etc. using the same font.
- Each figure should be prepared for 100% reproduction.
- Avoid small open symbols that will fill in and avoid small lettering.
- Use a minimum of 8-point type size (2.8 mm high; 1/8 in. high) for lettering and 0.5-point width for lines.
- Ensure that lettering and lines are dark enough, and thick enough, to reproduce clearly.
- All photographs must have an indication of scale.
• Figures should remain embedded in the Word article file.
• Settings: Set the graphic at least 600 dpi resolution for line art, 300 dpi for halftones, and 600 dpi for combinations (line art + halftone)
• Obtain written permissions for all figures for which you are not the copyright holder (unless the material is in the public domain.) Any cost for copyright is the responsibility of the author. The citation of the copyright holder is required either as a reference to the figure or in the figure caption.
• Color is encouraged.

Quality Review:
The Extended Abstract will be checked by the Symposium Chairman using the following guidelines:

• Is the abstract compelling and pertinent to the scope of the symposium?
• Is the abstract submitted within the 4 to 8 page range?
• Is the information written in clear scientific English?
• Are the figures legible and pertinent?
• Are the tables and graphs legible and pertinent?
• Is the information submitted scientific and not commercial?
• Are the references complete?

Citing Your Work:
When citing your ASTM Extended Abstract in other works, follow these guidelines if you use material taken directly from the Extended Abstract: Authors’ Last Names followed by First Names, “Title of Extended Abstract,” Title of Symposium, Symposium Chairman (men), location of symposium (city, state, country), date of symposium, sponsored by ASTM International, West Conshohocken, PA.

Note: You may be contacted by an Editor or an ASTM journal based on the technical quality of your Extended Abstract encouraging you to submit your paper to either of the following journals:

• Advances in Civil Engineering Materials
• Geotechnical Testing Journal
• Journal of Testing and Evaluation
• Materials Performance and Characterization

For more information regarding ASTM International journals go to http://www.astm.org/DIGITAL_LIBRARY/JOURNALS/index.htm
