Your Content + Our Services = New Opportunities

Integrated technology services, from collaboration and document development tools to subscription-based platforms and webstores, plus the expert technical support you need to be successful. Stay in full control of your proprietary data and reduce reliance on third-party distributors.

1. Streamline Content Development

Simplify your internal document development with our collaboration tool ASTM SpecBuilder. Based on the same intelligent standards development interface used by 30,000+ ASTM members, creating and publishing your content has never been easier. Develop any document all within one single platform. Invite stakeholders, upload ballots, leave feedback, and vote – with 24/7 access for all users.

2. Create a Custom Platform

Create your own custom subscription platform based on the dynamic ASTM Compass® product. Subscribers can access your content on a site we will custom-build. Users can manage, change, and share content using powerful tools for version comparison and hyperlinking, plus dynamic documents in PDF and HTML formats.

360° SERVICE PROVIDER

4. Professional Sales and Support

Get full technical and organizational support for your new products, from the first consultation to post-launch customer service. Our experienced sales and marketing team can expand awareness of your offerings and uncover new revenue streams. And your members and customers can also count on live assistance, with your own service representatives only a phone call away.

3. Create a Webstore

Create your own specialized company webstore – a public e-commerce site featuring only the content you choose. We'll design a fully functional online store for your standards and technical documents and manage all the logistics that go along with it, from creation to checkout. Customers from all over the world will be able to purchase and download your content directly from the source with just a simple search and click.
