Custom Compass Platforms & Web Stores
ASTM SpecBuilder & SpecPublisher

A modern office interior with a man in a suit walking in the background. The office has large windows, blue structural beams, and various office equipment like desks and chairs. The lighting is bright and professional.

Accessibility, speed, consistency, privacy, and safety.

When you're developing or using content, these are your top priorities.

At ASTM, we're partnering with organizations to provide the technical infrastructure they need to meet these priorities and create new opportunities for growth and expansion.

We'll help you streamline your systems, save time and resources, and generate revenue using the platforms created, tested, and proven through our work with thousands of organizations like yours.

Custom Compass Platforms & Web Stores

ASTM SpecBuilder & SpecPublisher

Custom Compass Platforms & Web Stores

Your Content. Our Platform. Let our process work for you.

Are you facing challenges getting your standards and technical documents into the right hands? Are technology and location issues holding your organization back from the true collaboration you need to succeed?

Unleash the power of a robust delivery service already used by thousands of satisfied members and customers.

Whether you are a trade association, standards development organization, government agency, lab, or private business, your goal remains the same – to deliver optimal service to your stakeholders. This means providing immediate critical content like standards and technical documents to members and customers on a trusted platform.

Now you can partner with ASTM to set up your own distribution site modeled after our successful Compass product. Choose the content you want to include and let us custom-build your page.

Offer your entire collection of information or create a web store devoted to specific content. We'll custom-build the solution that meets your needs and delivers your content faster and easier than ever before.

Contact ASTM to begin developing your custom Compass platform and/or web store today.

API: A Case Study

The American Petroleum Institute is a trade association with over 625 members that hit every part of the oil and natural gas industry. These members, who come from large to independent companies, often serve on both ASTM and API committees.

energy **API** With such an overlap, ASTM and API realized how important it was for their members to easily access each other's standards. Now, subscribers can add API content to their ASTM Compass® portals, allowing for quicker reference and improved collaboration.

Impressed with the robust capabilities of ASTM Compass®, API knew where to turn when it needed a new online method for delivering its standards, specifications, practices, technical reports, and codes to its customers.

Powered by our same multi-layer platform built for accessing ASTM standards and publications, API Compass is now its own custom portal on the API website. Customers receive organization-wide 24/7 access to PDF and HTML versions of API standards through tailored subscriptions, all available in one location.

The new custom site means API users can enjoy the same benefits that have been so valuable to ASTM stakeholders, with the ability to form groups, share documents, create custom collections, make notes, and more.

Collaborate, Create, and Deliver

Creating and publishing your internal technical documents has never been easier. Built on the same intelligent standards development platform we've fine-tuned through years of testing and refinements, this is ASTM SpecBuilder.

Groups of any size rely on SpecBuilder to develop and maintain their documents in a secure online environment. You'll create groups, upload ballots, leave feedback, and vote, all from your computer or mobile device.

Any kind of document can be developed with SpecBuilder, which means you are in control. Upload your files and draft documents. Create task groups and participate in online discussions. Reference and hyperlink other standards to simplify research. Track discussions and vote.

Enjoy peace of mind knowing you're creating documents in a consistent, controlled environment. And 24/7 access for all users, regardless of location, means never slowing down your collaboration process.

Monitor, Share, and Publish

Once your document is created, use our SpecPublisher tool to automatically build links to all the standards included in your document, both ASTM and others. Easily share final documents with your team. Publish and distribute to stakeholders, or sell via your custom web store.

ASTM SpecBuilder

- Develop any type of document you need
- Create collaboration and discussion groups
- Manage high workloads with access for multiple admins
- Maintain version control with a running thread of discussions
- Vote on new documents and revisions and leave comments
- Track returns and review comments in real time
- Automated email reminders for new discussions and deadlines
- Reference and hyperlink ASTM standards
- Detailed reports by collaboration group, by user, and by ballot
- Easily export voting reports and comments
- Keep archived comments on file for quick future reference

ASTM INTERNATIONAL

Helping our world work better

Over 12,000 ASTM standards operate globally. Defined and set by us, they improve the lives of millions every day.

Combined with our innovative business services, they enhance performance and help everyone have confidence in the things they buy and use – from the toy in a child's hand to the aircraft overhead.

Working across borders, disciplines and industries we harness the expertise of over 30,000 members to create consensus and improve performance in manufacturing and materials, products and processes, systems and services.

Understanding commercial needs and consumer priorities, we touch every part of everyday life: helping our world work better.
