Geotechnical Testing Journal

Contents:

- 1179 A Large-Scale True Triaxial Apparatus with Rigid-Flexible-Flexible Boundary for Granular Materials—Shengjun Shao, Yongxin Wang, and Shuai Shao
- **1197** A Unified Approach for Establishing Soil Water Retention and Volume Change Behavior of Soft Soils—Partha Narayan Mishra, Alexander Scheuermann, and M. Habibullah Bhuyan
- 1217 Assessment of Several Interpreted Pile Capacity Criteria for Large-Diameter Open-Ended Piles—Antonio Kodsy, Nikolaos Machairas, and Maqued G. Iskander
- 1244 Automated High-Speed S-Wave Velocity Tomographic System for Laboratory Geotechnical Engineering Process Monitoring – A Study on Pile Installation—Y. Wu, Z. Zhang, J. K. Chow, Y. H. Wang, and M. L. Leung
- 1261 Comparing Engineering Properties of Small Diameter Pressuremeter Tests to Clegg Impact Hammer Tests in Cemented Coquina Base and Sandy Subgrades—Paul J. Cosentino and Thaddeus J. Misilo III
- **1279** Constant Volume Ring Shear Specimen Trimming and Testing— Timothy D. Stark
- 1301 Deep, In Situ Nonlinear Dynamic Testing of Soil with Controlled Blasting: Instrumentation, Calibration, and Application to a Plastic Silt Deposit— Amalesh Jana, Aleyna M. Donaldson, Armin W. Stuedlein, and T. Matthew Evans
- 1327 Development and Application of a New Triaxial Testing System for Subzero Rocks—Yao Bai, Ren-Liang Shan, Yong-Xin Wu, and Peng-Fei Sun
- 1350 Drained Shear Displacement Rates in Fully Softened Strength Torsional Ring Shear Testing—Timothy D. Stark, Jack A. Cadigan, and Navid H. Jafari
- 1358 Estimation of Damage Evolution within an In Situ Rock Mass Using the Acoustic Emissions Technique under Incremental Cyclic Loading— Jin-Seop Kim, Changsoo Lee, and Geon-Young Kim
- 1379 Examples of Variable-Head Field Permeability Tests Used in Books: Given Interpretations and Correct Interpretations—Ana Boada, Robert P. Chapuis, Lu Zhang, and Vahid Marefat
- 1404 Novel Large-Scale Three-Dimensional Fracturing Experimental Apparatus and Application to Vertical-Well Hydraulic Fracturing of Hard Roof— Chao Pan, Binwei Xia, Bin Yu, Peng Yu, and Yafei Luo

- 1426 Prediction of Unloading Failure Strain and Undrained Shear Strength of Saturated Clays by Limit Pressure from Prebored Pressuremeter— Zubair Masoud and Ammad Hassan Khan
- 1448 Quantifying Polymer Loading in Bentonite-Polymer Composites Using Loss on Ignition and Total Carbon Analyses—Sarah A. Gustitus, Dorian Nguyen, Jiannan Chen, and Craig H. Benson
- 1467 Scour Mitigation and Erodibility Improvement Using Microbially Induced Carbonate Precipitation—Jinung Do, Brina M. Montoya, and Mohammed A. Gabr
- 1484 Specific Surface Area of Plastic Clays from Equilibrium Sediment Volume under Salt Environment—Dhanesh Sing Das and Bharat Venkata Tadikonda
- 1501 The Influence of Apparatus Stiffness on the Results of Cyclic Direct Simple Shear Tests on Dense Sand—M. Konstadinou, A. Bezuijen, G. Greeuw, C. Zwanenburg, H. M. Van Essen, and L. Voogt

TECHNICAL NOTES

- **1526** Effects of Oven Temperature and Addition of Ethanol on Measurement of Water Content and Specific Gravity of Cement-Stabilized Soft Clay—Hua Yu, Yaolin Yi, and Anand J. Puppala
- **1536** Experimental Study on the Influence of Fast Cooling on the Mechanical Properties of Heated Granite—Xiang Li, Zhuoyao Zhang, Tubing Yin, Ming Tao, Xibing Li, Yan Wang, and Wei Chen
- **1552 Optimizing the Arrangement of Strain Gauges in Pile Load Testing** Jon Sinnreich

EDITORIAL OBJECTI VES

The Geotechnical Testing Journal is published in six issues per year by ASTM International, a nonprofit technical organization that develops and publishes voluntary consensus standards and related information for materials, products, systems, and services. Some issues, in whole or inpart, may be Special Issues focused on a topic of interest to our readers. Contributions are peer reviewed prior to publication.

EDITORIAL SER VICES — SUBMISSIONS Sara Welliver

Supervisor, Peer Review Services Geotechnical Testing Journal Editorial Offices J&J Editorial Services 201 Shannon Oaks Cir #124 Cary, NC 27511, USA Tel: (919) 650-1459 ext. 210 E-mail: astm@jjeditorial.com

PURPOSE AND SCOPE

The purpose of the *Geotechnical Testing Journal* is (1) to provide a high-quality publication that informs the profession of new developments in soil and rock testing and related fields; (2) to provide a forum for the exchange of information, particularly that which leads to the development of new test procedures; and (3) to stimulate active participation of the profession in the work of ASTM International Committee D18 on Soil and Rock and related committees.

Contributions include papers, technical notes, letters to the editor, discussions of previously published papers, and book reviews. The editorial scope of

this journal covers test methods for soil and rock, sampling, nomenclature, and practices relating to the determination of properties and behavior of soil and rock for engineering purposes, and for soil as a medium for plant growth. Topics of interest include: new testing equipment, apparatus, and procedures for both field and laboratory applications; evaluation of existing ASTM International standards and recommendations for new standards for apparatus or test procedures; and test results that give insights into test procedures, techniques, and data interpretation. Topics must be related to soil and rock, but may include use and testing of geosynthetic materials in conjunction with soil and rock, highway materials testing such as aggregate properties or pavement performance measurement, geophysical exploration, marine sediments, groundwater investigations, testing and stabilization of contaminated soils and soil and rock engineering related to waste management.

INFORMATION FOR AUTHORS

For details regarding paper submission go to http://mc04.manuscriptcentral. com/astm-gtj. The subject matter must not be of a speculative nature and the contents must not include materials of an advertising nature. The paper must not be seriously defective as to literary form and structure, continuity of thought, and clarity of expression. The substance of the paper should not have been published previously in the open literature.

Authors preparing papers for submittal should observe the conventions of style explained in the ASTM Style Manual. Since the journal does not request page charges, the author is expected to conform to these standard conventions for style and the inclusion of complete references and high-quality figures. SI units are to be used throughout; if data were not measured in SI units, a note should appear to that effect and the original units should be included in parentheses after the SI units.

IN APPRECIATION OF THE REVIEWERS

The high quality of the papers that appear in this publication is a tribute not only to the obvious efforts of the authors represented but to the unheralded, though essential, efforts of their reviewers. It is to the reviewers' dedication to upholding the high standards of their profession that this note pays tribute. On behalf of ASTM International and the authors as well, we acknowledge with appreciation their important contribution to the success of this journal.

AWARDS FOR PAPERS

Papers are eligible for the following ASTM International awards:

- The C.A. Hogentogler Award papers on soils for engineering purposes.
- The Sanford E. Thompson Award papers on concrete and concrete aggregates.
- The Richard L. Templin Award papers on new and useful testing procedures and apparatus.
- The Geotechnical Testing Journal Award — papers on the practice of geotechnical testing.

PAST TECHNICAL EDITORS

Dr. Ernest T. Selig (March 1978 to September 1985)

Dr. Vincent P. Drnevich (December 1985 to December 1989)

Mr. Paul Knodel (March 1990 to December 1992)

Dr. Howard J. Pincus (March 1993 to December 1995)

Dr. Ronald C. Chaney and Dr. Kenneth R. Demars (March 1996 to June 2002)

Dr. Thomas C. Sheahan (July 2002 to December 2008)

Mr. L. David Suits (September 2002 to December 2017)
