

# Geotechnical Testing Journal

## Author Index

### Volume 17, 1994

Number	Issue	Pages
1	March	1-128
2	June	129-268
3	September	269-402
4	December	403-534

#### A

Abduljawwad, SN: *see* Al-Amoudi, OSB and Abduljawwad, SN

Achhari, G: *see* Joshi, RC, Achhari, G, and Griffiths, FJ

**Al-Amoudi, OSB and Abduljawwad, SN:** Suggested modifications to ASTM standard methods when testing arid, saline soils, June, 243

Al-Helo, IK: *see* Garbulewski, K, Zakowicz, S, and Al-Helo, IK

**AlNouri, I and Sakleam, S:** Compressibility characteristics of gypseous sandy soils, Dec., 465

**Ashmawy, AK and Drnevich, VP:** General dynamic model for the resonant column/quasi-static torsional shear apparatus, Sept., 337

#### B

Benmokrane, B: *see* Mouchaorab, KS and Benmokrane, B

**Benson, CH, Bosscher, PJ, Lane, DT, and Pliska, RJ:** Monitoring system for hydrologic evaluation of landfill covers, June, 138

Bloomquist, D: *see* McVay, M, Bloomquist, D, Vanderlinde, D, and Clausen, J

Borden, RH: *see* Krizek, RJ and Borden, RH

Bosscher, PJ:  
*see* Benson, CH, Bosscher, PJ, Lane, DT, and Pliska, RJ  
*see* Edil, TB and Bosscher, PJ

#### Brown, DA

Evaluation of static capacity of deep foundations from statnamic testing, Dec., 403

**Hidden, SA, and Zhang, S:** Determination of *P-Y* curves using inclinometer data, June, 150

#### C

**Campbell, RP and Wu, JTH:** In-plane flow of four geosynthetics for landfill drainage, March, 3

**Charlie, WA, Veyera, GE, and Doebling, DO:** Discussion of "B-value measurements for granular materials at high confining pressures," by Jerry A. Yamamuro and Poul V. Lade, March, 119

Charron, R: *see* Giroud, JP, Monroe, M, and Charron, R

Chu, J: *see* Lo, S-CR, Chu, J, and Lee, IK

Clausen, J: *see* McVay, M, Bloomquist, D, Vanderlinde, D, and Clausen, J

Curtis, LW: *see* Mohamed, AMO, Yong, RN, Tan, BK, Farkas, A, and Curtis, LW

#### D

Das, BM: *see* Dass, RN, Yen, S-C, Das, BM, Puri, VK, and Wright, MA

**Dass, RN, Yen, S-C, Das, BM, Puri, VK, and Wright, MA:** Tensile stress-strain characteristics of lightly cemented sand, Sept., 305

Doebling, DO: *see* Charlie, WA, Veyera, GE, and Doebling, DO

#### Donaghe, RT

**and Torrey, VH, III:** Compaction test method for soil-rock mixtures in which equipment size effects are minimized, Sept., 363

**and Torrey, VH, III:** Proposed new standard test method for laboratory com-

paction testing of soil-rock mixtures using standard effort, Sept., 387

*see* Torrey, VH, III and Donaghe, RT

Drnevich, VP: *see* Ashmawy, AK and Drnevich, VP

#### E-F

**Edil, TB and Bosscher, PJ:** Engineering properties of tire chips and soil mixtures, Dec., 453

**Ettensohn, FR:** Development and potential of core-logging manuals, Sept., 393

**Fannin, RJ, Vaid, YP, and Shi, Y:** Critical evaluation of the gradient ratio test, March, 35

Farkas, A: *see* Mohamed, AMO, Yong, RN, Tan, BK, Farkas, A, and Curtis, LW

Fredlund, DG: *see* Xing, A and Fredlund, DG

#### G

**Garbulewski, K, Zakowicz, S, and Al-Helo, IK:** Expansion potential of compacted fine-grained soils using suction measurements, Dec., 506

**Georgiannou, VN and Hight, DW:** Effects of centerline tube sampling strains on the undrained behavior of two stiff over-consolidated clays, Dec., 475

Germaine, JT: *see* Sheahan, TC, Ladd, CC, and Germaine, JT

Gill, DE: *see* Leite, MH, Ladanyi, B, and Gill, DE

**Giroud, JP, Monroe, M, and Charron, R:** Strain measurement in HDPE geomembrane tensile tests, March, 65

Goh, T-C: *see* Tan, T-S, Goh, T-C, Karunaratne, GP, and Lee, S-L

Griffiths, FJ: *see* Joshi, RC, Achhari, G, and Griffiths, FJ

**Gustafsson, L and Knutsson, S:** Image analysis method for studying movements in granular and solid bodies, March, 95

## H

**Hansen, D:** *see* Sabin, GCW and Hansen, D

**Hidden, SA:** *see* Brown, DA, Hidden, SA, and Zhang, S

**Hight, DW:** *see* Georgiannou, VN and Hight, DW

**Houston, SL, Houston, WN, and Wagner, A-M:** Laboratory filter paper suction measurements, June, 185

**Houston, WN:** *see* Houston, SL, Houston, WN, and Wagner, A-M

**Hsu, S-P:** *see* Huang, A-B, Hsu, S-P, and Kuhn, H-R

**Huang, A-B,**

**Hsu, S-P, and Kuhn, H-R:** Multiple purpose soil testing apparatus, June, 227

**Hsu, S-P, and Kuhn, H-R:** Use of fuzzy control in automated soil testing, Sept., 356

**Hudson, WR:** *see* Pezo, R and Hudson, WR

## I-J

**Iskander, MG, Lai, J, Oswald, CJ, and Mannheimer, RJ:** Development of a transparent material to model the geotechnical properties of soils, Dec., 425

**Jewell, RJ:** *see* Marsh, JG and Jewell, RJ

**Joshi, RC, Achari, G, and Griffiths, FJ:** Approximate method for estimating the consolidation behavior of soft sensitive clays, March, 50

## K

**Karunaratne, GP:** *see* Tan, T-S, Goh, T-C, Karunaratne, GP, and Lee, S-L

**Kim, D-S and Stokoe, KH, II:** Torsional motion monitoring system for small-strain ( $10^{-5}$  to  $10^{-3}\%$ ) soil testing, March, 17

**Kim, Y-S:** *see* Tatsuoka, F, Sato, T, Park, C-S, Kim, Y-S, Mukabi, JN, and Kohata, Y

**Knutsson, S:** *see* Gustafsson, L and Knutsson, S

**Ko, H-Y:** *see* Macari, EJ and Ko, H-Y

**Kohata, Y:** *see* Tatsuoka, F, Sato, T, Park, C-S, Kim, Y-S, Mukabi, JN, and Kohata, Y

**Krizek, RJ**

**and Borden, RH:** Test procedures to evaluate absorption and swelling of grout, Dec., 512

*see* Schwarz, LG and Krizek, RJ

**Kuhn, H-R:** *see* Huang, A-B, Hsu, S-P, and Kuhn, H-R

**Kulhawy, FH:** *see* Turner, JP and Kulhawy, FH

**Kumar, KS:** *see* Pandian, NS, Sridharan, A, and Kumar, KS

## L

**Ladanyi, B:** *see* Leite, MH, Ladanyi, B, and Gill, DE

**Ladd, CC:** *see* Sheahan, TC, Ladd, CC, and Germaine, JT

**Lai, J:** *see* Iskander, MG, Lai, J, Oswald, CJ, and Mannheimer, RJ

**Lane, DT:** *see* Benson, CH, Bosscher, PJ, Lane, DT, and Pliska, RJ

**Lee, IK:** *see* Lo, S-CR, Chu, J, and Lee, IK  
**Lee, S-L:** *see* Tan, T-S, Goh, T-C, Karunaratne, GP, and Lee, S-L

**Leite, MH, Ladanyi, B, and Gill, DE:** Deformability of rock-like materials using a sharp cone test, June, 195

**Lin, J-M**

**and Sansalone, M:** Impact-echo response of hollow cylindrical concrete structures surrounded by soil and rock: Part I—Numerical studies, June, 207

**and Sansalone, M:** Impact-echo response of hollow cylindrical concrete structures surrounded by soil and rock: Part II—Experimental studies, June, 220

**Ling, HI:** Discussion on "behavior of fiber-reinforced cemented sand under static and cyclic loads" by M. H. Maher and Y. C. Ho, June, 254

**Lo, R, Chu, J, and Lee, IK:** Investigation of the strain-softening behavior of granular soils with a new multiaxial cell, Sept., 325

## M

**Macari, EJ and Ko, H-Y:** Study of an anisotropically overconsolidated silt by the resonant column method, Sept., 315

**Maher, MH, Ro, KS, and Welsh, JP:** Cyclic undrained behavior and liquefaction potential of sand treated with chemical

grouts and microfine cement (MC-500), June, 159

**Mannheimer, RJ:** *see* Iskander, MG, Lai, J, Oswald, CJ, and Mannheimer, RJ

**Marsh, JG and Jewell, RJ:** Instrumentation for a weigh in motion system using pavement strain, Dec., 498

**McVay, M, Bloomquist, D, Vanderlinde, D, and Clausen, J:** Centrifuge modeling of laterally loaded pile groups in sands, June, 129

**Meegoda, NJ and Ratnaweera, P:** Compressibility of contaminated fine-grained soils, March, 101

**Mohamed, AMO, Yong, RN, Tan, BK, Farkas, A, and Curtis LW:** Geo-environmental assessment of a micaceous soil for its potential use as an engineered clay barrier, Sept., 291

**Monroe, M:** *see* Giroud, JP, Monroe, M, and Charron, R

**Mouchaorab, KS and Benmokrane, B:** New combined servo-controlled loading frame/direct-shear apparatus for the study of concrete or rock joint behavior under different boundary and loading conditions, June, 233

**Mukabi, JN:** *see* Tatsuoka, F, Sato, T, Park, C-S, Kim, Y-S, Mukabi, JN, and Kohata, Y

## O-P

**Oswald, CJ:** *see* Iskander, MG, Lai, J, Oswald, CJ, and Mannheimer, RJ

**Pandian, NS, Sridharan, A, and Kumar, KS:** Improved velocity method for the determination of coefficient of consolidation, March, 113

**Park, C-S:** *see* Tatsuoka, F, Sato, T, Park, C-S, Kim, Y-S, Mukabi, JN, and Kohata, Y

**Pezo, R and Hudson, WR:** Prediction models of resilient modulus for nongranular materials, Sept., 349

**Pincus, HJ:** Expanded scope = expanded opportunities = expanded service, March, 123

**Pliska, RJ:** *see* Benson, CH, Bosscher, PJ, Lane, DT, and Pliska, RJ

**Puri, VK:** *see* Dass, RN, Yen, S-C, Das, BM, Puri, VK, and Wright, MA

## R

Ratnaweera, P: *see* Meegoda, NJ and Ratnaweera, P

**Redmond, PL and Shackelford, CD:** Design and evaluation of a flow pump system for column testing, June, 269

**Reznik, YM:** Method for interpretation of plate load test results, March, 72

Ro, KS: *see* Maher, MH, Ro, KS, and Welsh, JP

**Robertson, EC:** Review of *Introduction to Mineral Sciences* by Putnis, June, 266

## S

**Sabin, GCW and Hansen, D:** Effects of particle shape and surface roughness on the hydraulic mean radius of a porous medium consisting of quarried rock, March, 43

Sakleam, S: *see* AlNouri, I and Sakleam, S  
Sansalone, M: *see* Lin, J-M and Sansalone, M

Sato, T: *see* Tatsuoka, F, Sato, T, Park, C-S, Kim, Y-S, Mukabi, JN, and Kohata, Y

**Schmertmann, JH:** Discussion on "the simple pile load test (SPLT)" by Myung Whan Lee, Se Whan Paik, Won Jae Lee, Chang Tok Yi, Dae Young Kim, and Sung Jin Yoon, March, 122

**Schwarz, LG and Krizek, RJ:** Effect of preparation technique on permeability and strength of cement-grouted sand, Dec., 434

Shackelford, CD: *see* Redmond, PL and Shackelford, CD

**Sheahan, TC, Ladd, CC, and Germaine, JT:** Time-dependent triaxial relaxation behavior of a resedimented clay, Dec., 444

Shi, Y: *see* Fannin, RJ, Vaid, YP, and Shi, Y

**Sikh, TS:** Moisture increase in expansive soils at developed sites, Dec., 517

**Silvestri, V:** Water content relationships of a sensitive clay subjected to cycles of capillary pressures, March, 57

Sivapullaiah, PV: *see* Sridharan, A, Sivapullaiah, PV, and Stalin, VK

**Sridharan, A**

*see* Pandian, NS, Sridharan, A, and Kumar, KS

**Sivapullaiah, PV, and Stalin, VK:** Effect of short duration of load increment on the compressibility of soils, Dec., 489

Stalin, VK: *see* Sridharan, A, Sivapullaiah, PV, and Stalin, VK

Stokoe, KH, II: *see* Kim, D-S and Stokoe, KH, II

## T

Tan, BK: *see* Mohamed, AMO, Yong, RN, Tan, BK, Farkas, A, and Curtis, LW

**Tan, T-S, Goh, T-C, Karunaratne, GP, and Lee, S-L:** Shear strength of very soft clay-sand mixtures, March, 27

**Tatsuoka, F, Sato, T, Park, C-S, Kim, Y-S, Mukabi, JN, and Kohata, Y:** Measurements of elastic properties of geomaterials in laboratory compression tests, March, 80

**Tawfiq, KS:** Laboratory investigation on bitumen coating and polyethylene sheeting for downdrag reduction in piles: a comparative study, June, 171

**Torrey, VH, III**

**and Donaghe, RT:** Compaction control of earth-rock mixtures: a new approach, Sept., 371

*see* Donaghe, RT and Torrey, VH, III

**Turner JP and Kulhawy, FH:** Physical

modeling of drilled shaft side resistance in sand, June, 282

## V

Vaid, YP: *see* Fannin, RJ, Vaid, YP, and Shi, Y

Vanderlinde, D: *see* McVay, M, Bloomquist, D, Vanderlinde, D, and Clausen, J

Veyera, GE: *see* Charlie, WA, Veyera, GE, and Doebling, DO

## W

Wagner, A-M: *see* Houston, SL, Houston, WN, and Wagner, A-M

Welsh, JP: *see* Maher, MH, Ro, KS, and Welsh, JP

Wright, MA: *see* Dass, RN, Yen, S-C, Das, BM, Puri, VK, and Wright, MA

Wu, JTH: *see* Campbell, RP and Wu, JTH

## X-Z

**Xing, A and Fredlund, DG:** Numerical modeling of a thermal conductivity matrix suction sensor, Dec., 415

Yen, S-C: *see* Dass, RN, Yen, S-C, Das, BM, Puri, VK, and Wright, MA

Yong, RN: *see* Mohamed, AMO, Yong, RN, Tan, BK, Farkas, A, and Curtis, LW

Zakowicz, S: *see* Garbulewski, K, Zakowicz, S, and Al-Helo, IK

Zhang, S: *see* Brown, DA, Hidden, SA, and Zhang, S
