

# Geotechnical Testing Journal

## Contents:

### SPECIAL ISSUE ON FLAT DILATOMETER TESTING: APPLICATIONS AND RECENT DEVELOPMENTS

Guest Editors: Paola Monaco and António Viana da Fonseca

---

#### i Overview

---

- 837 Recent Improvements in the Use, Interpretation, and Applications of DMT and SDMT in Practice**  
Silvano Marchetti and Paola Monaco
- 

- 851 Effective Stress Strength Parameters of Clays from DMT**  
Zhongkun Ouyang and Paul W. Mayne
- 

- 868 Interpretation of the DMT in Silts**  
Fernando Schnaid, Marcus V. A. Belloli, Edgar Odebrecht, and Diego Marchetti
- 

- 877 Theoretical DMT Interpretation in Sensitive Clays**  
Vincenzo Silvestri
- 

- 890 Interrelationship between Undrained Shear Strength from DMT and CPTU Tests for Soils of Different Origin**  
Zbigniew Młynarek, Jędrzej Wierzbicki, and Katarzyna Stefaniak
- 

- 902 The Use of the DMT for the Evaluation of Changes in Stress State in Overconsolidated Clay in Geotechnical Applications**  
Herman Peiffer, Benny Malengier, Wim Haegeman, and Hao Shen
- 

- 915 Overconsolidation and Cementation in Sands: Impacts on Geotechnical Properties and Evaluation Using Dilatometer Tests**  
Hyunwook Choo, Woojin Lee, and Changho Lee
- 

- 930 Marchetti Flat Dilatometer Tests in a Virtual Calibration Chamber**  
Joanna Butlanska, Marcos Arroyo, Sara Amoroso, and Antonio Gens
- 

- 946 Monitoring Ground Improvement Using the Seismic Dilatometer in Christchurch, New Zealand**  
Sara Amoroso, Kyle M. Rollins, Paola Monaco, Marco Holtrigter, and Alan Thorp
- 

- 967 Dilatometer and Seismic Dilatometer Testing Offshore: Available Experience and New Developments**  
Diego Marchetti
-

ASTM INTERNATIONAL

## CO-EDITORS

### Dr. William J. Likos

Department of Civil and Environmental Engineering  
University of Wisconsin-Madison  
Madison, WI 53706, USA  
Tel: 608-890-2662  
E-mail: likos@wisc.edu

### Dr. Majdi A. Othman

Geosyntec Consultants  
1255 Roberts Blvd., NW  
Suite 200  
Kennesaw, GA 30144  
Tel: 678-202-9508  
E-mail: mothman@geosyntec.com

## EDITORIAL OBJECTIVES

The *Geotechnical Testing Journal* is published in six issues per year by ASTM International, a nonprofit technical organization that develops and publishes voluntary consensus standards and related information for materials, products, systems, and services. Some issues, in whole or in part, may be Special Issues focused on a topic of interest to our readers. Contributions are peer reviewed prior to publication.

## EDITORIAL SERVICES—SUBMISSIONS

### Sara Welliver

Supervisor, Peer Review Services  
Geotechnical Testing Journal Editorial Offices  
J&J Editorial Services  
201 Shannon Oaks Cir #124  
Cary, NC 27511, USA  
Tel: (919) 650-1459 ext. 210  
E-mail: astm@jjeditorial.com

## PURPOSE AND SCOPE

The purpose of the *Geotechnical Testing Journal* is (1) to provide a high-quality publication that informs the profession of new developments in soil and rock testing and related fields; (2) to provide a forum for the exchange of information, particularly that which leads to the development of new test procedures; and (3) to stimulate active participation of the profession in the work of ASTM International Committee D18 on Soil and Rock and related committees.

Contributions include papers, technical notes, letters to the editor, discussions of previously published papers, and book reviews. The editorial scope of this journal covers test methods for soil and rock, sampling, nomenclature, and practices relating to the determination of properties and behavior of soil and rock for engineering purposes, and for soil as a medium for plant growth. Topics of interest include: new testing equipment, apparatus, and procedures for both field and laboratory applications; evaluation of existing ASTM International standards and recommendations for new standards for apparatus or test procedures; and test results that give insights into test procedures, techniques, and data interpretation. Topics must be related to soil and rock, but may include use and testing of geosynthetic materials in conjunction with soil and rock, highway materials testing such as aggregate properties or pavement performance measurement, geophysical exploration, marine sediments, groundwater investigations, testing and stabilization of contaminated soils and soil and rock engineering related to waste management.

## EDITORIAL BOARD

**Dr. David W. Airey**  
University of Sydney, Australia

**Dr. Khalid A. Alshibli**  
University of Tennessee  
Knoxville, TN, USA

**Dr. Charles Aubeny**  
Texas A&M University  
College Station, TX, USA

**Dr. Richard J. Bathurst**  
Royal Military College of Canada  
Kingston, Ontario, Canada

**Dr. Paul J. Bullock**  
Fugro Consultants, Inc. – Loadtest  
Gainesville, FL, USA

**Dr. Andrew P. Bunker**  
University of Pittsburgh  
Pittsburgh, PA, USA

**Dr. Guojun Cai**  
Southeast University  
Nanjing, China

**Dr. Giovanni Cascante**  
University of Waterloo, Canada

**Dr. Andrew Corkum**  
Dalhousie University  
Halifax, Nova Scotia, Canada

**Dr. Pierre Delage**  
CERMES  
Ecole Nationale des Ponts et Chaussées  
France

**Dr. Mandar Dewoolkar**  
University of Vermont  
Burlington, VT, USA

**Dr. Vincent P. Drnevich**  
Purdue University  
W. Lafayette, IN, USA

**Chadi El Mohtar**  
University of Texas at Austin  
Austin, TX, USA

**Dr. Dante Fratta**  
University of Wisconsin-Madison  
Madison, WI, USA

**Dr. Majid Ghayoomi**  
University of New Hampshire  
Durham, NH, USA

**Dr. Karen S. Henry**  
United States Air Force Academy  
USAF Academy, CO, USA

**Dr. Laureano R. Hoyos**  
The University of Texas at Arlington  
Arlington, TX, USA

**Dr. Zoubair Lafhaj**  
Ecole Centrale de Lille  
Lille, France

**Mr. Michael W. Laney**  
Terracon Consultants, Inc.  
Olathe, KS, USA

**Professor Fook-Hou Lee**  
National University of Singapore  
Singapore

**Garland E. Likins**  
Pile Dynamics, Inc.  
Cleveland, OH, USA

**Dr. Michael Long**  
University College Dublin, Ireland

**Dr. Ning Lu**  
Colorado School of Mines  
Golden, CO, USA

**Mr. Robert Mackey**  
S2L Inc.  
Maitland, FL, USA

**Dr. Ali Maher**  
Rutgers University  
Piscataway, NJ, USA

**Ms. Gabriela Mariscal**  
National Concrete Masonry Association  
Herndon, VA, USA

**Dr. John Scott McCartney**  
University of California San Diego  
La Jolla, CA, USA

**Mr. James A. McKelvey**  
Earth Engineering, Inc.  
East Norriton, PA, USA

**Dr. Jay N. Meegoda**  
New Jersey Institute of Technology  
Newark, NJ, USA

**Dr. Michael A. Mooney**  
Colorado School of Mines  
Golden, CO, USA

**Majdi Abou Najm**  
Beirut, Lebanon

**Dr. Phillip S. K. Ooi**  
University of Hawaii at Manoa  
Honolulu, HI, USA

**Dr. Anand J. Puppala**  
University of Texas at Arlington  
Arlington, TX, USA

**Donald T. Robertson**  
Applied Foundation Testing, Inc.  
Green Cove Springs, FL, USA

**Dr. Joel Sarout**  
Commonwealth Scientific and Industrial  
Research Organization  
Bentley, Australia

**Dr. Vincent Silvestri**  
Ecole Polytechnique de Montreal  
Canada

**Dr. Devendra N. Singh**  
Indian Institute of Technology  
India

**Dr. Khaled Sobhan**  
Florida Atlantic University  
Boca Raton, FL, USA

**Dr. Muhannad T. Suleiman**  
Bethlehem, PA, USA

**Ingrid Tomac**  
San Diego, CA, USA

**Dr. George Veyera**  
University of Rhode Island  
Kingston, RI, USA

**Dr. Dharma Wijewickreme**  
University of British Columbia  
Canada

**Dr. Nazli Yesiller**  
Global Waste Research Institute  
California Polytechnic State University  
San Luis Obispo, CA, USA

**Dr. Xiong Yu**  
Case Western Reserve University  
Cleveland, OH, USA

**POSTMASTER:** Send address change to ASTM International—GTJ, 100 Barr Harbor Drive, P.O. Box C700, West Conshohocken, PA 19428-2959.

Printed in the USA.

# Overview

---

## Special Issue on *Flat Dilatometer Testing: Applications and Recent Developments*

The last decades in the field of site investigations have seen an increasing trend to move from the traditional practice based on drilling, sampling, and laboratory testing towards in situ testing, which today often represents the majority of the ground characterization approaches part of an investigation. In situ tests are fast, the results are available immediately, and, by easily covering higher volumes of soil, they are permitted to assess local site variability.

The flat dilatometer test (DMT), developed in Italy by professor Silvano Marchetti in the second half of the 1970s, has expanded the range of direct-push in situ tests and has been gaining increasing popularity in recent years, potentiated by the release of its seismic version (SDMT). Distinctively recognized contributions that the DMT can provide in a routine site investigation are mostly related to its sensitivity to stress history and soil stiffness.

The idea for this special issue on *Flat Dilatometer Testing: Applications and Recent Developments* was launched during the 3<sup>rd</sup> International Conference on the Flat Dilatometer—DMT'15 held in Rome, Italy, in June 2015. On that occasion, a large number of papers involving the use of DMT were submitted to the conference by researchers from many countries, covering a wide range of applications and demonstrating the increasing interest of the geotechnical scientific and professional community on the DMT and its applications. In the following months, after an in-depth discussion with Silvano Marchetti, we considered submitting a proposal for this special issue to the *Geotechnical Testing Journal*. In February 2017 the then Editors in Chief of the journal, William Likos and David Suits, accepted our proposal to put this special collection together. Sadly, Silvano Marchetti passed away in December 2016.

Contributions to this special issue were collected by inviting researchers who have been active and innovative in the use of DMT testing, aiming at presenting their works with new results and interpretation methods for geotechnical engineering. Ultimately 10 papers submitted in response to invitations were accepted after rigorous peer review. The final collection contains papers authored or co-authored by researchers located in nine different countries from Europe, North and South America, Asia, and Australasia.

This collection of papers includes an overview paper on recent improvements in using, interpreting and applying DMT/SDMT in practice. This paper summarizes Silvano's main views and reflects his latest research activity. Unfortunately he could not have been involved in the final stages of the manuscript preparation. The most significant intellectual contribution in the conception of the paper is due to him and was then finalized with the support of one of the guest editors.

The other papers cover recent developments in DMT/SDMT interpretation, significant applications, and test equipment. The following topics are addressed: updates on DMT interpretation in intermediate silts and in clays of different origin; theoretical and numerical modeling of the test; assessment of overconsolidation and cementation in sands from DMT; evaluation of changes in stress state due to pile installation and landslides in overconsolidated clay using the DMT; monitoring ground improvement for mitigation of liquefaction hazard using the SDMT; and new technological developments of DMT/SDMT equipment, including offshore testing.

We congratulate all of the authors who contributed to this special issue and thank the many reviewers who critically assessed the original manuscripts. We are indebted to the journal Editors, as well as to the ASTM editorial team, for their efforts to complete this project.

We are very grateful to be the guest editors of this special issue of the *Geotechnical Testing Journal* on *Flat Dilatometer Testing: Applications and Recent Developments* and for having an opportunity to emphasize the role of in situ tests in geotechnical practice. At the same time, we remind readers that the "Marchetti dilatometer" is, and will be, inseparably linked with the name of its inventor. We are highly indebted to his smart and open-minded influence and we will miss the many positive discussions, for so many years.

This special issue, having the purpose to leave a tribute to a prominent engineer and researcher in the field of ground characterization from in situ testing, will also encourage the geotechnical community to pursue innovative research contributions on flat dilatometer testing in view of its potentiality.

*Paola Monaco*

*António Viana da Fonseca*

## EXECUTIVE COMMITTEE

Dale F. Bohn, Chairman  
Taco van der Maten, Vice Chairman  
Andrew G. Kireta, Jr., Vice Chairman  
John R. Logar, Chairman of Finance and Audit Committee  
Ralph M. Paroli, Past Chairman  
D. Thomas Marsh, Past Chairman  
Katharine E. Morgan, President

## DIRECTORS

Ferdinando E. Aspesi  
Dale F. Bohn  
Joannie W. Chin  
Cesar A. Constantino  
Oliver S. Delery, Jr.  
William Ells  
John Fletcher  
R. James Galipeau  
John Germaine  
William C. Griese  
Alan Kaufman  
Andrew G. Kireta, Jr.  
John R. Logar  
D. Thomas Marsh  
R. Christopher Mathis  
Katharine E. Morgan  
Deryck M.S. Omar  
Ralph M. Paroli  
Irving S. Scher  
Arman Shakkaliyev  
James A. Tann  
Vicky Taylor  
Taco van der Maten  
Jeff Weiss  
Terry O. Woods

## COMMITTEE ON PUBLICATIONS

Dee Magnoni, Chairman  
William J. Likos, Vice Chairman  
Dale F. Bohn, ex officio  
Jay Bhatt  
K. Russell DePriest  
Nikhil Gupta  
John E. Haddock  
Jason H. Ideker  
Michael R. Mitchell  
Richard W. Neu  
Majdi A. Othman  
Suzanne Pecore  
Sudarsan Rachuri  
George E. Totten  
W. Jason Weiss

## INFORMATION FOR AUTHORS

For details regarding paper submission go to <http://mc04.manuscriptcentral.com/astm-gtj>. The subject matter must not be of a speculative nature and the contents must not include materials of an advertising nature. The paper must not be seriously defective as to literary form and structure, continuity of thought, and clarity of expression. The substance of the paper should not have been published previously in the open literature.

Authors preparing papers for submittal should observe the conventions of style explained in the ASTM Style Manual. Since the journal does not request page charges, the author is expected to conform to these standard conventions for style and the inclusion of complete references and high-quality figures. SI units are to be used throughout; if data were not measured in SI units, a note should appear to that effect and the original units should be included in parentheses after the SI units.

## IN APPRECIATION OF THE REVIEWERS

The high quality of the papers that appear in this publication is a tribute not only to the obvious efforts of the authors represented but to the unheralded, though essential, efforts of their reviewers. It is to the reviewers' dedication to upholding the high standards of their profession that this note pays tribute. On behalf of ASTM International and the authors as well, we acknowledge with appreciation their important contribution to the success of this journal.

## AWARDS FOR PAPERS

Papers are eligible for the following ASTM International awards:

The C.A. Hogentogler Award — papers on soils for engineering purposes.

The Sanford E. Thompson Award — papers on concrete and concrete aggregates.

The Richard L. Templin Award — papers on new and useful testing procedures and apparatus.

The Geotechnical Testing Journal Award — papers on the practice of geotechnical testing.

## PAST TECHNICAL EDITORS

**Dr. Ernest T. Selig**  
(March 1978 to September 1985)

**Dr. Vincent P. Drnevich**  
(December 1985 to December 1989)

**Mr. Paul Knodel**  
(March 1990 to December 1992)

**Dr. Howard J. Pincus**  
(March 1993 to December 1995)

**Dr. Ronald C. Chaney and Dr. Kenneth R. Demars**  
(March 1996 to June 2002)

**Dr. Thomas C. Sheahan**  
(July 2002 to December 2008)

**Mr. L. David Suits**  
(September 2002 to December 2017)

**Geotechnical Testing Journal** (ISSN 0149-6115) is published in six issues per year by ASTM International. Some issues, in whole or in part, may be Special Issues focused on a topic of interest to our readers. The views expressed in this journal are not those of ASTM International. The data and opinions appearing in the published material were prepared by and are the responsibility of the contributors, not of ASTM International.
