## Purpose and Scope

The objectives of *Journal of Composites Technology & Research* are (1) to provide a forum for the presentation, discussion, and dissemination of information on composite materials and their response to the environments in which they are used, especially the engineering and technology of their application to components and structures, and (2) to provide a means of communication for researchers, developers, producers, users, suppliers, and professional organizations concerned with composite materials.

The editorial scope includes full-length technical articles, technical notes (Composites Review), preliminary technical communications (Research Briefs), news articles and announcements (World of Composites), book reviews, letters, and discussions of previously published work.

The American Society for Testing and Materials is not responsible, as a body, for the statements and opinions advanced in this publication.

*Journal of Composites Technology & Research* (ISSN 0885-6804; previous title, *Composites Technology Review*) is published quarterly by the American Society for Testing and Materials. Editorial office at the Headquarters of the Society, 1916 Race St., Philadelphia, PA 19103.

**Subscriptions:** *United States and Canada* for 1 year \$38.00 (members \$28.00), for 2 years \$66.00 (members \$48.00), for 3 years \$87.00 (members \$60.00). *Foreign* for 1 year \$43.00 (members \$32.00), for 2 years \$76.00 (members \$56.00), for 3 years \$102.00 (members \$72.00). Single copies are \$14.00. To subscribe, please send prepaid order to ASTM, Subscription Dept.—CTR, 1916 Race St., Philadelphia, PA 19103. *Journal of Composites Technology & Research* is indexed regularly by Engineering Index, Inc., and is available on microfilm from University Microfilms, a Xerox company, Ann Arbor, MI. Copyright 1990 by the American Society for Testing and Materials.

Change of address: Please return entire addressing label on wrapper to *Journal of Composites Technology & Research*, ASTM, Subscription Dept.—CTR, 1916 Race St., Philadelphia, PA 19103 along with new address.

## General Information

This publication is one of many issued by ASTM in connection with its work in promoting knowledge of the properties and performance of materials, products, systems, and services and in developing standard specifications and test measurement techniques. Much of the information results from voluntary contributions of many of the leading technical authorities from industry, scientific agencies, and government. A list of ASTM publications and additional information will be furnished on request.

## Information for Authors

All contributions to *Journal of Composites Technology & Research* are subject to editing to bring them into accordance with ASTM style. Technical articles are also subject to peer review. Emphasis is placed on composites technology that bridges the gap between industry and the research and development community. Papers must contribute to the permanent literature, be of immediate interest to ASTM members, or be of general interest to a substantial part of the technical community. Articles that have been published or submitted for publication elsewhere or papers of an advertising or promotional nature cannot be printed in the *Journal of Composites Technology & Research*. The paper must not be seriously defective as to literary form and structure, continuity of thought, and clarity of expression. Authors should observe the conventions of style explained in the ASTM Style Manual. Since the journal does not request page charges, the author is expected to conform to these standard conventions. The original manuscript and five clear copies, including original illustrations, should be sent to Kathy Greene, Manager, Acquisitions and Review, ASTM, 1916 Race St., Philadelphia, PA 19103 (215-299-5581).

## In Appreciation

The high quality of the technical papers in this publication is a tribute not only to the obvious efforts of the authors represented but also to the unheralded, though essential, efforts of their reviewers. It is to the reviewers' dedication to upholding the high standards of their profession that this note pays tribute. On behalf of ASTM and the authors as well, we acknowledge with appreciation their important contribution to the success of this journal.
