

Composites Technology Review

Index to Volume 7

1985

Number	Issue	Pages
1	Spring	1-40
2	Summer	41-76
3	Fall	77-114
4	Winter	115-166

A-B

- Acid rain:** Long-term characteristics of fiber-reinforced plastic under mechanical stress and an acidic environment (Koyama and De Tourreil), Fall, 93
- Blikstad, M. and Johannesson, T. R.:** The influence of moisture and toughened resin on the mixed mode fracture of unidirectional graphite/epoxy laminate, Winter, 115

C

- Chamis, C. C.:** Design concepts for low-cost composite engine frames, Summer, 41
- Chamis, C. C. and Sinclair, J. H.:** Longitudinal compressive failure modes in fiber composites: end attachment effects on IITRI type test specimens, Winter, 129
- Composite fabrication:** Laboratory production of discontinuous-aligned fiber composite plates using an autoclave-style press cure (Gibson, Deobald, and Suarez), Summer, 49
- Composite materials**
- Design concepts for low-cost composite engine frames (Chamis), 41
 - Detection of delamination onset in a composite laminate using Moiré interferometry (Wood), Winter, 121
 - The effect of slots on the buckling and post-buckling behavior of laminated plates (Gürdal, Haftka, and Starnes), Fall, 82
 - Laboratory production of discontinuous-aligned fiber composite plates using an autoclave-style press cure (Gibson, Deobald, and Suarez), Summer, 49
 - Long-term characteristics of fiber-reinforced plastic under mechanical stress and an acidic environment (Koyama and De Tourreil), Fall, 93
 - Recent advances in technology for composite materials in the United States (Vinson), Summer, 59

Composites

- A damage tolerant design parameter for graphite/epoxy laminated composites (Harris and Morris), Fall, 77

Effects of mean stress on the fatigue of composite materials (Conle and Ingall), Spring, 3

A method to estimate the overall behavior of fiber-reinforced hybrid composites (Nomura and Oshima), Fall, 88

Composites review

- Biaxial stress testing of intraply hybrid composites (Foral and Humphrey), Spring, 19
- Characterization of the cure of carbon fiber/epoxy composite prepegs by differential scanning calorimetry (Morgan, Walkup, and Hoheisel), Spring, 17
- A conceptual framework for the interpretation of fatigue damage mechanisms in composite materials (Talreja), Spring, 25
- Recent advances in technology for composite materials in the United States (Vinson), Summer, 59
- A simple calculation of strain-energy release rate for a nonlinear double cantilever beam (Whitcomb), Summer, 64
- Compressive strength:** Longitudinal compressive failure modes in fiber composites: end attachment effects on IITRI type test specimens (Chamis and Sinclair), Winter, 129

Conference reports

- Forum on composite materials research and technology (Reifsnider), Winter, 146
- Symposium on composite materials: fatigue and fracture (Reifsnider), Spring, 36
- 21st annual meeting of the Society of Engineering Science (Reifsnider), Spring, 36

Conle, A. and Ingall, J. P.: Effects of mean stress on the fatigue of composite materials, Spring, 3

Crack propagation: The influence of moisture and toughened resin on the mixed mode fracture of unidirectional graphite/epoxy laminates (Blikstad and Johannesson), Winter, 115

Cracks

- The effect of slots on the buckling and post-buckling behavior of laminated plates (Gürdal, Haftka, and Starnes), Fall, 82
- Influence of damage on mechanical properties of woven composites at low temperatures (Kriz), Summer, 55
- The influence of moisture and toughened resin on the mixed mode fracture of unidirectional graphite/epoxy laminates (Blikstad and Johannesson), Winter, 115

D

Damage

- A conceptual framework for the interpretation of fatigue damage mechanisms in

composite materials (Conle and Ingall), Spring, 3

Detection of delamination onset in a composite laminate using Moiré interferometry (Wood), Winter, 121

The effect of slots on the buckling and post-buckling behavior of laminated plates (Gürdal, Haftka, and Starnes), Fall, 82

Deobald, L. R.: *see* Gibson, R. F., Deobald, L. R., and Suarez, S. A.

De Tourreil, C.: *see* Koyama, M. and De Tourreil, C.

Double cantilever beam: A simple calculation of strain-energy release rate for a nonlinear double cantilever beam (Whitcomb), Summer, 64

E

Engines: Design concepts for low-cost composite engine frames (Chamis), Summer, 41

Epoxy laminates: Comparison of interlocked fabric and laminated fabric Kevlar 49/epoxy composites (Guess and Reedy), Winter, 136

F

Fabric laminates: Comparison of interlocked fabric and laminated fabric Kevlar 49/epoxy composites (Guess and Reedy), Winter, 136

Fatigue (materials)

- A conceptual framework for the interpretation of fatigue damage mechanisms in composite materials (Talreja), Spring, 25
- Effects of mean stress on the fatigue of composite materials (Conle and Ingall), Spring, 3

Fibers

- Characterization of the cure of carbon fiber/epoxy composite prepegs by differential scanning calorimetry (Morgan, Walkup, and Hoheisel), Spring, 17
- Longitudinal compressive failure modes in fiber composites: end attachment effects on IITRI type test specimens (Chamis and Sinclair), Winter, 129

Foral, R. F. and Humphrey, W. D.: Biaxial stress testing of intraply hybrid composites, Spring, 19

Fracture toughness: A simple calculation of strain-energy release rate for a nonlinear double cantilever beam (Whitcomb), Summer, 64

G

- Gibson, R. F., Deobald, L. R., and Suarez, S. A.:** Laboratory production of discontinuous-aligned fiber composite plates using an autoclave-style press cure, Summer, 49
- Glass fiber-reinforced plastics:** Long-term characteristics of fiber-reinforced plastic under mechanical stress and an acidic environment (Koyama and De Turreil), Fall, 93
- Graphite composites:** A damage tolerant design parameter for graphite/epoxy laminated composites (Harris and Morris), Fall, 77
- Guess, T. R. and Reedy, E. D., Jr.:** Comparison of interlocked fabric and laminated fabric Kevlar 49/epoxy composites (Guess and Reedy), Winter, 136
- Gürdal, Z., Haftka, R. T., and Starnes, J. H., Jr.:** The effect of slots on the buckling and postbuckling behavior of laminated plates, Fall, 82

H

- Haftka, R. T.:** *see* Gürdal, G., Haftka, R. T., and Starnes, J. H., Jr.
- Harris, C. E. and Morris, D. H.:** A damage tolerant design parameter for graphite/epoxy laminated composites, Fall, 77
- Hoheisel, T. H.:** *see* Morgan, R. J., Walkup, C. M., and Hoheisel, T. H.
- Humphrey, W. D.:** *see* Foral, R. F. and Humphrey, W. D.
- Hybrid composites**
Biaxial stress testing of intraply hybrid composites (Foral and Humphrey), Spring, 19
A method to estimate the overall behavior of fiber-reinforced hybrid composites, Fall, 88

I-K

- Ingall, J. P.:** *see* Conle, A. and Ingall, J. P.
- Johannesson, T. R.:** *see* Blikstad, M. and Johannesson, T. R.
- Johnson, R. and Leonard, B. G.:** An ultrahigh-modulus composite sensor support structure, Spring, 30
- Koyama, M. and De Turreil, C.:** Long-term characteristics of fiber-reinforced plastic under mechanical stress and an acidic environment, Fall, 93
- Kriz, R. D.:** Influence of damage on mechanical properties of woven composites at low temperatures (Kriz), Summer, 55

L

- Laminates:** A damage tolerant design parameter for graphite/epoxy laminated composites (Harris and Morris), Fall, 77
- Leonard, B. G.:** *see* Johnson, R. and Leonard, B. G.
- Literature reviews**
Exact solutions of moderately thick laminated shells by J. N. Reddy (Reddy), Summer, 69
Fatigue/impact studies in laminated composites by V. S. Avva (Reifsnider), Spring, 34

Mechanics of fatigue damage and degradation in random short-fiber composites: Part I—damage evaluation and accumulation and Part II—analysis of property degradation by Wang et al (Reifsnider), Summer, 70

M

- Marom, G.:** Evaluation of bending test methods for composite materials, Spring, 12
- Modulus of elasticity:** A method to estimate the overall behavior of fiber-reinforced hybrid composites (Nomura and Oshima), Fall, 88
- Moisture:** The influence of moisture and toughened resin on the mixed mode fracture of unidirectional graphite/epoxy laminates (Blikstad and Johannesson), Winter, 115
- Morgan, R. J., Walkup, C. M., and Hoheisel, T. H.:** Characterization of the cure of carbon fiber/epoxy composite prepegs by differential scanning calorimetry, Spring, 17
- Moiré interferometry:** Detection of delamination onset in a composite laminate using Moiré interferometry (Wood), Winter, 121
- Morris, D. H.:** *see* Harris, C. E. and Morris, D. H.

N-P

- Nomura, S. and Oshima, N.:** A method to estimate the overall behavior of fiber-reinforced hybrid composites, Fall, 88
- Oshima, N.:** *see* Nomura, S. and Oshima, N.
- Penn, L.:** Adhesion Society Annual Meeting, Fall, 100

R

- Reedy, E. D., Jr.:** *see* Guess, T. R. and Reedy, E. D., Jr.
- Reddy, J. N.:** Review of exact solutions of moderately thick laminated steels by J. N. Reddy, Summer, 69
- Reifsnider, K. L.:**
Forum on composite materials research and technology (conference report), Winter, 146
Review of fatigue/impact studies in laminated composites by V. S. Avva, Spring, 34
Review of mechanics of fatigue damage and degradation in random short-fiber composites: Part I—damage evaluation and accumulation and Part II—analysis of property degradation by Wang et al, Summer, 70
Symposium on composite materials: fatigue and fracture, Spring, 36
21st annual meeting of the society of engineering science, Spring, 36
- Rosensaft, M. and Marom, G.:** Evaluation of bending test methods for composite materials, Spring, 12

S

- Scanning calorimetry:** Characterization of the cure of carbon fiber/epoxy composite prepegs by differential scanning calorimetry (Morgan, Walkup, and Hoheisel), Spring, 17

Shear strength: Comparison of interlocked fabric and laminated fabric Kevlar 49/epoxy composites (Guess and Reedy), Winter, 136

Shear stress: Evaluation of bending test methods for composite materials (Rosensaft and Marom), Spring, 12

Short fiber composites: Laboratory production of discontinuous-aligned fiber composite plates using an autoclave-style press cure (Gibson, Deobald, and Suarez), Summer, 49

Sinclair, J. H.: *see* Chamis, C. C. and Sinclair, J. H.

Starnes, J. H., Jr.: *see* Gürdal, Z., Haftka, R. T., Starnes, J. H., Jr.

Stiffness: Influence of damage on mechanical properties of woven composites at low temperatures (Kriz), Summer, 55

Strain: Influence of damage on mechanical properties of woven composites at low temperatures (Kriz), Summer, 55

Stresses

- Effects of mean stress on the fatigue of composite materials (Conle and Ingall), Spring, 3
Longitudinal compressive failure modes in fiber composites: end attachment effects on IITRI type test specimens (Chamis and Sinclair), Winter, 129

Stress testing: Biaxial stress testing of intraply hybrid composites (Foral and Humphrey), Spring, 19

Structural analysis: Design concepts for low-cost composite engine frames (Chamis), Summer, 41

Suarez, S. A.: *see* Gibson, R. F., Deobald, L. R., and Suarez, S. A.

T

Talrega, R.: A conceptual framework for the interpretation of fatigue damage mechanisms in composite materials, Spring, 25

Tensile/compressive stress: Evaluation of bending test methods for composite materials (Rosensaft and Marom), Spring, 12

Three-point bending: Evaluation of bending test methods for composite materials (Rosensaft and Marom), Spring, 12

V-W

Vinson, J. R.: Recent advances in technology for composite materials in the United States, Summer, 59

Walkup, C. M.: *see* Morgan, R. J., Walkup, C. M., and Hoheisel, T. H.

Whitcomb, J. D.: A simple calculation of strain-energy release rate for a nonlinear double cantilever beam, Summer, 64

Wood, J. D.: Detection of delamination onset in a composite laminate using Moiré interferometry, Winter, 121

World of Composites

- Adhesion Society Annual Meeting (Penn), Fall, 100
China hosts 1986 composites symposium, Summer, 67
An ultrahigh-modulus composite sensor support structure (Johnson and Leonard), Spring, 30
