

# Cement, Concrete, and Aggregates

## Index to Volume 4

### 1982

Number	Month of Issue	Pages
1	Summer	1-52
2	Winter	53-124

#### A-B

##### Aggregates

- Effect of different types of crushers on shape and roughness of aggregates (Czarnecka and Gillott), Summer, 33
- Ideal and quasi-ideal grading of coarse and fine aggregates for mass concrete (Ehrenburg), Winter, 103
- Method of lightweight sand protection by fluidized bed calcination (Akhundov), Winter, 117
- Thermally destructive particles in sound dolostone aggregate from an Ontario quarry (Soles), Winter, 99

**Air-entrained concretes:** Mechanical properties and freezing and thawing resistance of non-air-entrained, air-entrained, and air-entrained superplasticized concrete using ASTM Test C 666, Procedures A and B (Malhotra), Summer, 3

**Akhundov, A. A.:** Method of lightweight sand protection by fluidized bed calcination, Winter, 117

**Alkalies:** Accurate rapid analysis of alkali contents in portland cement (Syal and Kataria), Winter, 106

**Bend Tests:** Precision of flexural strength and toughness parameters for steel fiber reinforced concrete (Johnston), Winter, 61

**Blast furnaces:** Precision of the proposed test method to measure slag hydraulic properties (Lesniak), Summer, 42

##### Book reviews

- Applications of Polymer Concrete* by Fowler and Kukacka (Shah), Summer, 49
- The Assessment of Structural Safety* by Leporati (Heins), Winter, 119

**Butler, W. B.:** A critical look at ASTM C 618 and C 311, Winter, 68

#### C

##### Cements

- Durability performance of polymer-modified mortars (Ohama), Winter, 94
- Precision of the proposed test method to measure slag hydraulic properties (Lesniak), Summer, 42

**Comminution:** Effect of different types of crushers on shape and roughness of aggregates (Czarnecka and Gillott), Summer, 33

##### Compressive strength

On the correlation of consistency and strength of concrete to the attrition rate of fine aggregate (Parka and Hansen), Summer, 24

On the correlation of strength and elasticity of concrete of Los Angeles abrasion loss and crushing value of Indonesian river gravels (Parka and Hansen), Summer, 28

Mechanical properties and freezing and thawing resistance of non-air-entrained, air-entrained, and air-entrained superplasticized concrete using ASTM Test C 666, Procedures A and B (Malhotra), Summer, 3

**Concrete durability:** Development and interaction of a concrete additive for improved performance durability (Syal and Kataria), Winter, 110

**Concrete pavements:** Variability and control of Class C fly ash (McKerall and Ledbetter), Winter, 87

##### Concretes

On the correlation of consistency and strength of concrete to the attrition rate of fine aggregate (Parka and Hansen), Summer, 24

On the correlation of strength and elasticity of concrete of Los Angeles abrasion loss and crushing value of Indonesian river gravels (Parka and Hansen), Summer, 28

A critical look at ASTM C 618 and C 311 (Butler), Winter, 68

Definition and measurement of toughness parameters for fiber reinforced concrete (Johnston), Winter, 53

Development of a conductivity probe to monitor setting time and moisture movement in concrete (Sriravindrachandran and Swamy), Winter, 73

Development of high-strength concrete incorporating a large percentage of fly ash and superplasticizers (Mukherjee, Loughbrough, and Malhotra), Winter, 81

Development and interaction of a concrete additive for improved performance durability (Syal and Kataria), Winter, 110

Effect of different types of crushers on shape and roughness of aggregates (Czarnecka and Gillott), Summer, 33

Ideal and quasi-ideal grading of coarse and fine aggregates for mass concrete (Ehrenburg), Winter, 103

Mechanical properties and freezing and thawing resistance of non-air-entrained, air-entrained, and air-entrained superplasticized concrete using ASTM Test C 666, Procedures A and B (Malhotra), Summer, 3

Method of lightweight sand protection by

fluidized bed calcination (Akhundov), Winter, 117

Precision of flexural strength and toughness parameters for steel fiber reinforced concrete (Johnston), Winter, 61

A strain control system for relaxation studies of concrete (Pirtz and Thomas), Summer, 37

Thermally destructive particles in sound dolostone aggregate from an Ontario quarry (Soles), Winter, 99

Variability and control of Class C fly ash (McKerall and Ledbetter), Winter, 87

##### Concrete structures

Definition and measurement of toughness parameters for fiber reinforced concrete (Johnston), Winter, 53

Development of high-strength concrete incorporating a large percentage of fly ash and superplasticizers (Mukherjee, Loughbrough, and Malhotra), Winter, 81

Development and interaction of a concrete additive for improved performance durability (Syal and Kataria), Winter, 110

**Consistency:** On the correlation of consistency and strength of concrete to the attrition rate of fine aggregate (Parka and Hansen), Summer, 24

**Czarnecka, E. T. and Gillott, J. E.:** Effect of different types of crushers on shape and roughness of aggregates, Summer, 33

#### D-H

**Dolomite:** Thermally destructive particles in sound dolostone aggregate from an Ontario quarry (Soles), Winter, 99

**Ehrenburg, D. O.:** Ideal and quasi-ideal grading of coarse and fine aggregates for mass concrete, Winter, 103

**Fibers:** Precision of flexural strength and toughness parameters for steel fiber reinforced concrete (Johnston), Winter, 61

**Fine aggregates:** Ideal and quasi-ideal grading of coarse and fine aggregates for mass concrete (Ehrenburg), Winter, 103

**Flame photometry:** Accurate rapid analysis of alkali contents in Portland cement (Syal and Kataria), Winter, 106

**Flexural strength:** Definition and measurement of toughness parameters for fiber reinforced concrete (Johnston), Winter, 53

##### Fly ash

A critical look at ASTM C 618 and C 311 (Butler), Winter, 68

Variability and control of Class C fly ash (McKerall and Ledbetter), Winter, 87

**Gillott, J. E.:** see Czarnecka, E. T. and Gillott, J. E.

**Hansen, T. C.:** *see* Parka, N. and Hansen, T. C.

**Heins, C. P.:** Review of *The Assessment of Structural Safety* by Leporati, Winter, 119

**Hydraulics:** Precision of the proposed test method to measure slag hydraulic properties (Lesniak), Summer, 42

## J-M

**Johnston, C. D.**

Definition and measurement of toughness parameters for fiber reinforced concrete, Winter, 53

Precision of flexural strength and toughness parameters for steel fiber reinforced concrete, Winter, 61

**Kataria, S. S.:** *see* Syal, S. K. and Kataria, S. S.

**Ledbetter, W. B.:** *see* McKerall, W. C. and Ledbetter, W. B.

**Lesniak, T. W.:** Precision of the proposed test method to measure slag hydraulic properties, Summer, 42

**Loughborough, M. T.:** *see* Mukherjee, P. K., Loughborough, M. T., and Malhotra, V. M.

**Malhotra, V. M.**

Mechanical properties and freezing and thawing resistance of non-air-entrained, air-entrained, and air-entrained superplasticized concrete using ASTM Test C 666, Procedures A and B, Summer, 3

*see* Mukherjee, P. K., Loughborough, M. T., and Malhotra, V. M.

**Materials tests:** Development of a conductivity probe to monitor setting time and moisture movement in concrete (Sriravindrarajah and Swamy), Winter, 73

**McKerall, W. C. and Ledbetter, W. B.:** Variability and control of Class C fly ash, Winter, 87

**Modulus of elasticity:** On the correlation of strength and elasticity of concrete of Los Angeles abrasion loss and crushing value of Indonesian river gravels (Parka and Hansen), Summer, 28

**Mortars:** Durability performance of polymer-modified mortars (Ohama), Winter, 94

**Mukherjee, P. K., Loughborough, M. T., and Malhotra, V. M.:** Development of high-strength concrete incorporating a large percentage of fly ash and superplasticizers, Winter, 81

## O-P

**Ohama, Y.:** Durability performance of polymer-modified mortars, Winter, 94

**Parka, N. and Hansen, T. C.**

On the correlation of consistency and strength of concrete to the attrition rate of fine aggregate, Summer, 24

On the correlation of strength and elasticity of concrete to Los Angeles abrasion loss and crushing value of Indonesian river gravels, Summer, 28

**Pirtz, D. and Thomas, K.:** A strain control system for relaxation studies of concrete, Summer, 37

**Plasticizers:** Development of high-strength concrete incorporating a large percentage of fly ash and superplasticizers (Mukherjee, Loughborough, and Malhotra), Winter, 81

**Portland cements**

Accurate rapid analysis of alkali contents in Portland cement (Syal and Kataria), Winter, 106

Durability performance of polymer-modified mortars (Ohama), Winter, 94

**Pozzolans:** A critical look at ASTM C 618 and C 311 (Butler), Winter, 68

## S-T

**Sand control:** Method of lightweight sand protection by fluidized bed calcination (Akhundov), Winter, 117

**Setting time:** Development of a conductivity probe to monitor setting time and moisture movement in concrete (Sriravindrarajah and Swamy), Winter, 73

**Shah, S. P.:** Review of *Applications of Polymer Concrete* by Fowler and Kukacka, Summer, 49

**Soles, J. A.:** Thermally destructive particles in sound dolostone aggregate from an Ontario quarry, Winter, 99

**Sriravindrarajah, R. and Swamy, R. N.:** Development of a conductivity probe to monitor setting time and moisture movement in concrete, Winter, 73

**Strains:** A strain control system for relaxation studies of concrete (Pirtz and Thomas), Summer, 37

**Stress relaxation:** A strain control system for relaxation studies of concrete (Pirtz and Thomas), Summer, 37

**Swamy, R. N.:** *see* Sriravindrarajah, R. and Swamy, R. N.

**Syal, S. K. and Kataria, S. S.**

Accurate rapid analysis of alkali contents in portland cement, Winter, 106

Development and interaction of a concrete additive for improved performance durability, Winter, 110

**Thomas, K.:** *see* Pirtz, D. and Thomas, K.
