BENEFITS AND FEES FOR 1994

	<u>Organizational</u>	<u>Member</u>
Annual Administrative Fee	\$350.00*†	\$50.00*†
Participation on ASTM Technical Committees	One Official Rep. Only	Member Only
Annual Book of ASTM Standards	One Free Volume	One Free Volume
Complete Set of Book of ASTM Standards (Vols. 1–70)	\$3,700.00 (Prepaid)†	\$4,100.00 (Prepaid)†
Individual Book of Standards at Member Price	No Limit	None
Complete Sections at Member Price (Prepaid)	No Limit	No Limit
Other Publications at Member prices	No Limit	No Limit
Annual Subscription to ASTM <i>Standardization News</i>	1 Free	1 Free

* Administrative fee payments made to ASTM are not tax deductible as charitable contributions for federal income tax purposes. They may be deductible as ordinary and necessary business expense.

† Canadian Prospective Members – Please add 7% GST – Registration Number R129162244.

MEMBERSHIP

- Membership year is January 1 to December 31. Fees are payable in advance and are not prorated. Membership will become effective upon payment of fees.
- Only the official representative of an organizational membership may participate on committees. All other employees of the organization must maintain individual memberships in order to participate on committees.
- An organizational membership may change its representative as needed by notifying ASTM Headquarters.
- An individual membership may be transferred without payment of additional fees, if the fees were paid by an employer, by notifying ASTM Headquarters. However, no additional free volume of the Book of ASTM Standards will be allowed.
- Technical committee participation is not transferable. A committee application will have to be submitted by the new individual member, or the new official representative of an organizational membership.

NOTE: Membership benefits are subject to change.

MOVING?

To insure uninterrupted service on your *JTE* subscription, please notify us at least six weeks before you move.

1. Attach your address label from a recent issue in the space provided opposite. (If label is not available, be sure to give your old address, including Zip Code.)

2. Print your name, membership no., and address below. (Be sure to include Zip Code.)

3. Mail entire notice to: ASTM
Subscription Dept.—JTE
1916 Race St.
Philadelphia, PA 19103

Name _____ Membership No. _____

New Address _____

(please print or type the above information)

Information for Contributors

The *Journal of Testing and Evaluation* (JOTE) is issued bi-monthly by ASTM. Each published paper and technical note is peer-reviewed. The guidelines below offer suggestions to authors and describe our manuscript selection, peer review, revision, and publication processes. Authors who adhere to these suggestions will ensure expeditious handling of submitted material.

Preparation of the Manuscript*

The submitted manuscript should be typewritten or printed, in English, on one side of a sheet only, double-spaced, with wide margins (at least 1 in. (25 cm)) on all sides. Pages must be consecutively numbered in single sequence—text, tables, and figures.

Five copies of the original manuscript are needed, each including clear copies of any figures.

The text should include an informative abstract of 100–150 words and a list of 5–10 keywords that can be used to index the contents of the manuscript.

ASTM policy requires the use of SI units in all publications (and in their included tables and figures). If English units must be used to present test results or to describe materials, equivalent SI units should follow in parentheses. Refer to *ASTM E 380, Standard Practice for Use of the International System of Units (SI) (The Modernized Metric System)* for further information and examples.

Commercialism may be avoided by the use of generic terms where possible. Trademarks and trade names should be properly identified as such, if they are used.

References should be cited in the text in numeric order. Type the numerical citation on the line, not as a superscript, and enclose in square brackets. The references should be listed together at the end of the text, in consecutive order, with enough information to allow a reader to find the cited item. See a recently published article in the *Journal* for the conventions used for papers, reports, books, and computer programs.

All tables should be placed together following the text and references. Tables should be identified with Arabic (not Roman) numbers, and cited in numerical order in the text. It is better to use several simple tables than one large, complex table.

All figures (graphs, illustrations, photographs) should be placed together following text and tables. A separate sheet of figure captions should precede the figures. Figures should be identified with consecutive Arabic (not Roman) numbers. Type size must be large enough to be legible after reduction. All lettering, lines, and symbols must be drawn with opaque black ink on white paper. The axes of each graph must be properly labeled, with specific units. Computer-produced graphs or illustrations must be made using a laser printer (not an impact printer). Photographs must be high-contrast black-and-white. All micro-

graphs, and all figures that are representations of equipment or specimens, must include scale marks.

The name, mailing address, position, affiliation, and telephone (fax, e-mail) of each author must be supplied in a cover letter. The submitting author is asked to provide names, mailing addresses, affiliations, and telephone numbers of five potential reviewers who are not employed at the same institution as any of the authors. The submitting author must state that the contents of the manuscript have not been published previously and that the manuscript is not under consideration for publication elsewhere. The submitting author should affirm that all those given as co-authors have agreed to be so listed.

Technical Review

Each submitted manuscript that, in the opinion of the Technical Editor, fits the scope of the *Journal*, is technically sound, and will be of interest to the readership is processed for peer review. Three reviewers evaluate each paper, two each technical note. The reviewers consider technical merit, originality, soundness of data, reproducibility of results, logical conclusions, and clarity of presentation.

The reviewers' comments are considered by the Technical Editor. Manuscripts that receive two or more unfavorable recommendations are rejected for publication in the *Journal*, and the authors are so advised. Manuscripts which the reviewers find acceptable pending amendment are returned to the authors for change, along with the (anonymous) comments of the reviewers. The authors subsequently may submit a revised manuscript.

Five copies of the revised manuscript are needed—one master with original figures; two copies highlighted to show where revisions have been made, and indicating which reviewer's comment has been addressed; and two plain copies. An "Authors' Response Form," provided by the editorial office, should be completed, showing where revisions were made, including any explanation concerning a suggested change not being made.

A "Paper Submittal Form," also provided by the editorial office, should be completed by the authors as well, assigning copyright to ASTM. The exception to this is for authors who are employees of the U.S. government.

Should a copy of the revised manuscript be available in computer-produced form, such as from a word-processing program like WordPerfect® 5.1, it may be included at this time with the paper copies mentioned above. Either 3.5 in. (89 mm) or 5.25 in. (133 mm) disks are acceptable. This expedites the handling of the article in the editorial office.

The Technical Editor may either accept the revised manuscript for publication, accept it pending further revision, or reject it. A revised manuscript may be sent for re-evaluation to a reviewer who had found major flaws in the first submission.

Each manuscript accepted by the Technical Editor for publication is further scanned by the editorial staff for proper ASTM conventions and for appropriate English style and usage. The final version, including any editorial changes, is sent to the author before it is typeset.

*For complete instructions for the preparation of manuscripts and a sample manuscript contact Barbara Stafford, Administrative Assistant, ASTM Journals, 215-299-5424 or FAX 215-299-5511.

Following author approval, the article is set into print and the page proof is delivered to the author for approval. Should the editorial office not hear from the author in the designated response time, approval is assumed and publication proceeds.

Other Published Items

Some items appear in the *Journal* without peer review. Thus, brief comments on a previously published article, the authors'

response to these comments, and critical reviews of books or computer programs require the approval only of the Technical Editor.

Dr. Donald R. Petersen
Technical Editor
