

Subject Index**A**

Agricultural land-use, 202
 ARAMS, 297
 ArcView, 94
 Avicide, 202

B

Badger, 261
 Benthic biodiversity, 221
 Biodiversity, 107, 148, 221
 conservation, 18
 Bioenergetic, 311
 Birds, landscape responses, 56
 Blackbirds, 202
 Brine spills, 261

C

Chesapeake Bay, 221
 Climate change, 148
 Colorado, 129
 Computer application, 94
 Conjugate problems, 242
 Contaminant, 221, 286
 Coupled map lattice, 84

D

Decision support, 286
 Disturbed sites, 3, 286
 DRC-1339, 202

E

Ecological Indicators, 3
 Ecosystem, 69
 Emission, 242
 Endangered species, 84
 Exposure assessment, 169
 software, 286

F

Foraging model, 286
 Forests, 3, 56
 Functional connectivity, 41

G

GIS, 221
 Grackle, 202
 Great Plains, northern, 202

H**Habitat**

 fragmentation, 41
 quality, 169
 quantitative analysis, 94
 ranking system, 129
 selection by birds, 56
 spatially and temporally variable, 84
 suitability, 261
 Habitat Suitability Index, 107, 148, 169
 Hierarchy theory, 69
 Hydrology, 148

I

Individual-based model, 261
 Invasive species, 84

L**Landscape**

 characterization, 107
 metrics, 3
 responses of birds, 56
 Layers of Habitat HIS Model, 107
 Los Alamos National Laboratory, 94

M

Metapopulation, 41
 Microhabitat, 56
 Military sites, 286, 297
 Mineral development, 18
 MMSD project, 18
 Modeling, 56, 69, 84, 94, 286
 individual-based, 261

N

Narrative, 69
 Natural resources, management, 94
 Neural landscape model, 84

P

Petroleum spills, 261
Population
 dynamics, 84
 viability analysis, 41
Prairie vole, 261
Preble's mouse, 129

Q

Quantitative Habitat Analysis, 94

R

Receptor sensitivity, 242
Regional land-use planning, 18
Resource management, 3
 tool, 94
Rio Tinto, 18
Riparian habitat, 129, 148
Risk assessment, 69, 107, 169, 221, 242,
 297, 311
 ecological framework, 261
 software, 286
Risk-Trace, 286

S

Salmon, 69
San Pedro Riparian National
 Conservation Area, 148
Scale, 56, 69
SEEM, 297

Shannon-Weaver index, 221
Spatial population model, 84
Spatial scales, 56, 297
Spatial proximity, 242
Spatially explicit exposure, 286, 297,
 311
Spring baiting, 202
Stressors, multiple, 311
Sunflower, 202

T

Theoretical ecology, 84
Toxicology, 69, 311

U

Urban sprawl, 148

V

Vegetation, 169
Vertebrate populations, 261
Vertical structure, 107

W

Water quality, 221
Water use, 148
Watershed, 129
Wetlands, 202
Wildlife habitat, 41, 169
