

# Index

## A

Acoustic emission, 448  
 Adams, Donald F., 95-111  
 Aliyu, A. A., 336-348  
 Anderson, G. P., 115-134  
 Anisotropy, 5  
 ASTM standards  
   D 297, 115  
   D 897, 115  
   D 1344, 115  
   D 2094, 115

## B

Bathias, Claude, 217-237  
 Blikstad, Márten, 411-423  
 Blom, Anders F., 168-188  
 Bradley, Walter L., 389-410  
 Bucinell, R. B., 135-167  
 Butt joint, 115

## C

Carlsson, Leif A., 168-188  
 Cohen, Ronald N., 389-410  
 Conti, Paolo, 35-51  
 Contoured delamination, 135  
 Cracked lap shear specimen, 189,  
   267, 315, 349

## D

Daniel, I. M., 336-348  
 De Paulis, Antonio, 35-51  
 Design of bonded joints, 189, 238

DeVries, K. L., 115-134  
 Double cantilever beam specimen,  
   200, 219, 315, 336, 349, 396  
 Dynamic fracture mechanics, 5

## E

Edge delamination, 69, 135, 282,  
   298, 375  
 Effective flaw concept, 135  
 Elastoplastic fracture mechanics, 95  
 End notched flexural specimen, 351  
 Environmental testing, 168, 349  
 Everett, R. A., Jr., 267-281

## F

Forward shearing mode test, 200  
 Fractography, 168, 389, 411, 430,  
   448

## G

Gradin, P. A., 200-216  
 Gustafson, C-G., 200-216, 448-464  
 Gustavsson, Anders I., 168-188

## H

Hackles, 418  
 Harris, Charles E., 424-447  
 Hart-Smith, L. J., 238  
 Hillman, Debra J., 481-493  
 Hillman, Richard L., 481-493  
 Hybrid finite element, 5

## I

Interlaminar fracture, 52, 282, 298, 349  
Interlaminar stresses, 35, 52, 69

## J

Jilkén, L., 200-216  
Jing, Hung-Sying, 465-480  
Johannesson, Thomas, 411-423  
Johnson, W. S., 1-2, 189-199, 267-281, 497-499

## K

Kenner, Vernal H., 465-480  
Knight, Marvin, 298-314  
Kuo, An-Yu, 5-34

## L

Laksimi, Abdelouahed, 217-237

## M

Mahishi, Jayant M., 95-111  
Mall, S., 189-199  
Matrix ply cracks, 282-297  
Mignery, A., 371-385  
Mixed-mode flexural specimen, 351, 396  
Mixed-mode fracture criteria, 331, 360, 411  
Mohlin, Tommy, 168-188  
Moisture effects, 349  
Morris, Don H., 424-447

## N

Notched composite laminate, 95, 168

## O

O'Brien, T. Kevin, 282-297  
Overload effects, 217

## P

Peel stresses, 238  
Propagation law, 183, 190, 267, 333

## Q

Quasi-three-dimensional analysis, 69

## R

Raju, Ivatury S., 69-94  
Ramkumar, R. L., 315-335  
Rehfield, Lawrence W., 52-68  
Russell, Alan J., 349-370

## S

Seldén, Ragnar B., 448-464  
Sharon, G., 115  
Single-lap joint, 238  
Single-strap joint, 238  
Slomiana, M., 135-167  
Staab, George H., 465-480  
Stitching, 371  
Strain energy release rate, 5, 52, 69, 95, 135, 168, 282, 298, 315, 336, 349, 389  
Threshold, 189, 200, 217  
Total, 189, 332, 400  
Strain rate effects, 336  
Street, Ken N., 349-370  
Stress intensity factor, 5  
Sublamine analysis, 52  
Sun, C. T., 371-385

**T**

Tan, T. M., 371-385  
 Temperature effects, 349  
 Tensile adhesion test, 115  
 Thermographic inspection, 481  
 Thickness effects, 69, 437  
 Three-dimensional finite element  
 analysis, 95

**U**

Ultrasonic C-scan, 489

**V**

Valisetty, R. Rao, 52-68

**W**

Wang, A. S. D., 135-167  
 Wang, Su-Su, 5-34  
 Whitcomb, John D., 69-94, 315-335  
 Whitney, James M., 298-314

**X**

X-ray radiography, 168, 428, 448
