## Foreword

The Symposium on Advanced Testing Techniques was given at the Seventy-second Annual Meeting of ASTM held in Atlantic City, N. J., 22-27 June 1969. The symposium was sponsored by the Committee on Simulated Service and Performance Testing and in cooperation with the Society for Experimental Stress Analysis. F. G. Tatnall, consultant, presided as symposium chairman.

Applications, STP 381 (1965), \$19.50

# Contents

Introduction	1
Experimental Stress Analysis—Where ASTM and SESA Meet—P. K. STEIN	3
Accuracy of Strain Measurements at Elevated Temperatures with Electric Resistance Strain Gages—M. M. LEMCOE	12
Prediction of Failures in Service by Photoelastic Methods—S. REDNER	35
Random Load Fatigue Test on Automotive Components and Structures—J. D. CAMP	46
Low Cycle Fatigue Testing Using Digital Random Sequences with Computer Control—R. E. SKOE AND S. R. SWANSON	59
Environmental Effects on Fatigue of Structural Materials for a Supersonic Transport—H. F. HARDRATH	79
Fracture Toughness Testing—J. G. KAUFMAN	96
