

**SUBJECT INDEX****A**

- Abrasive wear, 3, 86, 104, 151, 248  
 Acetabular bearings, 32  
 Acetabular component, 41, 240  
 Aging, 117, 171  
 AMTI hip simulator, 19  
 ASTM F 2003-00, 117  
 ASTM F 2183-02, 117, 192

**B**

- Beta irradiation, 228  
 Body temperature, 117  
 Bone cement, 86

**C**

- Compression molding, 183, 221  
 Crack initiation and propagation, 117  
 Crossed polarizer microphotographs, 183  
 Cup-on-ball device, 19  
 Cyclic loading, 117

**D**

- Debris, 3, 86, 240  
 Delamination, 59, 137  
 Density, 209

**E**

- Electron beam irradiation, 59, 171, 209, 228  
 Extrusion, 221

**F**

- Fatigue, 59, 117, 151  
 Final shape molding, 221  
 Fixed bearing knee, 73  
 Flow ratio, 183  
 Fourier-transform infrared analysis, 209

Fracture toughness, 137, 171

**G**

- Gamma irradiation, 59, 73, 171, 209  
**H**  
 Hip prosthesis, 3, 19  
 Hip wear simulator, 86, 104, 151, 221

**I**

- In vitro wear, 73  
 ISO/CD 14243-3, 73  
 Izod impact, 209

**J**

- J-R curve, 171

**K**

- Knee prosthesis, 59  
 Knee simulator, 73, 86, 104, 151

**M**

- Mechanical properties, 151, 171, 183, 192, 228, 248  
 Melt-annealed, 73, 171  
 Mobile bearing knee, 73  
 Molecular orientation, 183  
 Morphology, 248

**N**

- Nitrogen packing, 221

**O**

- Orthopaedic medical devices, 183, 209, 221, 228  
 Oxidative degradation, 117

**P**

Particle characterization, 3  
Pitting, 137

**R**

Roughness, 41

**S**

Scanning electron microscopy, 19  
Small punch test, 117, 192  
Specimen thickness, 192  
Stanmore knee simulator, 19  
Structural fatigue, 151  
Surface modifications, 19  
Surface topology, 41  
Swell ratio, 209

**T**

Tensile properties, 171, 209

Thermal Mechanical Analysis, 183

Third body wear, 86, 240

Total hip replacement, 41

Total joint replacement, 209

Transmission electron microscopy, 19

Tribological properties, 221, 228

**W**

Waviness, 41

Wear, 3, 32, 41, 86, 137, 151, 183, 221

hip versus knee, 104

in vitro, 73

mechanisms, 19

resistance, 59, 171, 248

testing, 209, 228

third body, 86, 240

White light interferometry, 41
