(1937)

SYMPOSIUM ON CORROSION TESTING PROCEDURES

Held at the Chicago Regional Meeting
AMERICAN SOCIETY FOR TESTING MATERIALS
March 2, 1937

Continued at the
Fortieth Annual Meeting of the Society
July 1, 1937

FOREWORD

The papers appearing in this volume were presented at a Symposium on Corrosion Testing Procedures sponsored jointly by the Society's Committees A-5 on Corrosion of Iron and Steel and B-3 on Corrosion of Non-Ferrous Metals and Alloys, the purpose of the symposium being to study desirable steps to be taken in the direction of standardization of corrosion testing methods. The original presentation of the papers was at the Regional Meeting of the Society held in Chicago, Ill., March 2, 1937, under the auspices of the Chicago District Committee. The discussion was continued at the Annual Meeting of the Society held in New York City, July 1, 1937, the papers, together with the discussion presented at the Regional Meeting, being digested by L. W. Hopkins, Materials Engineer, American Chain and Cable Co., Inc., in order to introduce the discussion. The combined discussions from the Regional Meeting and Annual Meeting were carefully reviewed and abstracted for inclusion in this volume under the supervision of Mr. Hopkins.

The personnel of the joint committee immediately in charge of the Symposium (F. M. Speller, chairman) was as follows:

Representing Committee A-5:

F. N. Speller, Director, Department of Metallurgy and Research, National Tube Co.
L. W. Hopkins, Materials Engineer, American Chain and Cable Co., Inc.

Representing Committee B-3:

R. J. McKay, Superintendent, Technical Service, The International Nickel Co., Inc.
C. L. Hippensteel, Member of Technical Staff, Bell Telephone Laboratories, Inc.

Messrs. Speller and McKay acted as co-chairmen at both the Regional and Annual Meeting sessions.

NOTE.—The Society is not responsible, as a body, for the statements
and opinions advanced in this publication.

CONTENTS

	PAGE
Introduction—F. N. Speller.....	1
The Principles of Corrosion Testing—C. W. Borgmann and R. B. Mears.....	3
Discussion.....	31
Atmospheric Corrosion Testing—Henry S. Rawdon.....	36
Discussion.....	51
Salt-Spray Testing—E. H. Dix, Jr., and J. J. Bowman.....	57
Discussion.....	67
An Electrical Resistance Method of Determining Corrosion Rates—R. R. Seeber.....	68
Alternate-Immersion and Water-Line Tests—D. K. Crampton and N. W. Mitchell.....	74
Discussion.....	85
Standardizing Liquid Corrosion Tests—R. J. McKay and F. L. LaQue.....	87
Discussion.....	92
Soil Corrosion Testing—K. H. Logan, S. P. Ewing and I. A. Dension.....	95
Discussion.....	123
General Discussion.....	129
