

Subject Index

A

Abrasive particle, 7
 Aluminum concentration, 204
 Aromaticity, 28
 ASTM Committee D02, 205
 ASTM standards
 D 86–82, 263
 D 93–80, 265, 287
 D 95–70 (1980), 46
 D 97–66 (1978), 45, 267
 D 189–81, 46, 259
 D 287–82, 262
 D 445–82, 45
 D 482–80, 210, 260
 D 524–81, 259
 D 611–82, 261
 D 613–82, 269
 D 967–80, 269
 D 1094–72 (1982): 259
 D 1160–77, 233
 D 1298–80, 45
 D 1401, 63
 D 1500–82, 262, 289
 D 1661–64 (1977), 215
 D 1796–68 (1977), 210
 D 2161–82, 269
 D 2250–76 (1981), 259
 D 2274–74 (1980), 261, 280
 D 2276–73 (1978), 210, 276
 D 2500–81, 266
 D 2709–82, 276
 D 2781–82, 46, 216, 228, 273
 D 3240–75 (1980), 284
 D 3602–77 (1982), 259
 D 3828–81, 286
 D 3948–80, 259

B

BFO (*see* Bunker fuel oil)
 British Standards Institution, 19, 43, 136
 BSI (*see* British Standards Institution)
 Bunker fuel oil
 Competitive survey tables, 34, 35, 36
 Process effects on quality, 13
 Production, 7
 Quality, 7, 45, 86
 Treatment, 129
 Bunkers, 7, 43, 129

C

Calculated Carbon Aromaticity Index, 39
 Catalyst fines, 7, 37, 174, 204
 CIMAC (*see* International Congress of Combustion Engines)
 Conversion
 Equipment capacity versus total capacity, 14
 Outlook, 15
 Processes, 7
 Crude oil
 Deep conversion, 38
 Demand/availability, 28
 Future prices, 28
 Processing effects, 28
 Refining processes, 7

D

Diesel engines

- As means of propulsion, 43
- Deposit formation in, 199
- Fuel handling/treatment on-board,
 - Fuel degradation problems, 154
 - Systems, 154
- Naval fuel properties for, 86
- Two-stroke low speed,
 - Combustion chamber components, 112
 - Engine design/development, 120
 - Extreme fuel quality/consumption/on-board treatment, 111
- Wear determination, 204

E

- Exxon
 - As participant in development of BSI standards, 24
 - Hot Filtration Sediment, test, 228

F

- FCC (*see* Fluid catalytic cracking)
- Fluid catalytic cracking, 7, 43
- Fuel aromaticity/viscosity, 28
- Fuel contamination, 204
- Fuel handling
 - Controlling compatibility of residual fuel oil, 227
 - Diesel engine developments for, 28
 - Equipment, 28
 - High density fuels, 174
 - Importance, 8
 - Key elements of system, illustration, 16
 - On-board diesel, 154
- Fuel specifications, table, 33
- Fuel stability—development of evaluation methods
 - ASTM D 1661–64 (1977), 215
 - ASTM D 2781–82, 216
 - ASTM spot test, 215

- NOC spot test, 215
- Purifier/filter/tank storage tests, 215

- Fuel standards
 - Bunker fuels, 129
 - Development/status of quality, 8
 - Distillate/residual, tables, 20
 - Navy ships, 86
 - Of supplies to motorships in United States, 43

H

- High density fuels
 - ALCAP separation system, 180

I

- ICS (*see* International Chamber of Shipping)
- International Chamber of Shipping, 19, 44
- International Congress of Combustion Engines, 19, 176
- International Organization for Standardization, 19, 136
- International quality standards, 7
- ISO (*see* International Organization for Standardization)

L

- Liquid fuel
 - Composition, 190
 - Ignition/combustion properties, 190
 - In constant volume bomb, 190

M

- Marine bunker fuel treatment, 129
- Marine Fuel Oil
 - Availability/demand, United States, 28
 - Density, 37

- Determining concentration of inorganic particles,
 - ASTM Committee D02, 205
 - ASTM D 482–80, 210
 - ASTM D 1796–68 (1977), 210
 - ASTM D 2276–73 (1978), 210
 - By centrifuge method, 204
- Diesel fuel characteristics, list, 158
- Distillate fuel-portable test kit
 - ASTM D 93–80, 287
 - ASTM D 1500–82, 289
 - ASTM D 2709–82, 276
 - ASTM D 2274–74 (1980), 280
 - ASTM D 2276–73 (1978), 276
 - ASTM D 3240–75 (1980), 284
 - ASTM D 3828–81, 286
 - Comparison of fuel requirements, table, 277
- Ignition, 28, 180
- Navy ship fuels, 86, 251, 276
- Quality development, 111
- Quality monitoring, 43
- Residue reduction, 31
- Marine fuel quality—
 - standards/trends/proposals/specifications, 7
- Marine fuels—worldwide characterization
 - HMGO (heavy marine gas oil), 68
 - IFO (intermediate fuel oil), 68, 263
 - MDF (marine diesel fuel), 68, 263
 - MGO (marine gas oil), 68, 263
- MFO (*see* Marine Fuel Oil)

N

- Navy ship fuels
 - Chemical/physical property limitations, 86
 - Diesel Marine Fuel Oil, 86
 - Evolution, 86
 - Naval Distillate Fuel, 86, 276
 - Properties, tables, 91, 93

- Trends/forecasts, 86

R

- Refinery
 - Classifications/processes, 9
 - Trends, 86
- Residual fuel
 - Bunker treatment, 129
 - Controlling compatibility,
 - ASTM D 1160–77, 233
 - ASTM D 2781–82, 228
 - Of commingled fuels, 234
 - Precipitated asphaltenes, 227
 - Rapid predictive method, 233
 - Marine quality standards, 7
- Residual fuel—quality/testing
 - ASTM D 95–70 (1980), 46
 - ASTM D 97–66 (1978), 45
 - ASTM D 189–81, 46
 - ASTM D 445–82, 45
 - ASTM D 1298–80, 45
 - ASTM D 2781–82, 46
 - BSI, 43
 - Bunkering port quality variations, 43
 - Fluid catalytic cracking, 43
 - Visbreaking, 43

S

- Scatchard-Hildebrand equation, 229
- Shipboard fuel testing on Navy/commercial marine vessels
 - ASTM D 86–82, 263
 - ASTM D 93–80, 265
 - ASTM D 97–66 (1978), 267
 - ASTM D 189–81, 259
 - ASTM D 287–82, 262
 - ASTM D 482–80, 260
 - ASTM D 524–81, 259
 - ASTM D 611–82, 261
 - ASTM D 613–82, 269
 - ASTM D 976–80, 269

ASTM D 1094–72 (1982), 259
ASTM D 1401, 263
ASTM D 1500–82, 262
ASTM D 2161–82, 269
ASTM D 2250–76 (1981), 259
ASTM D 2274–74 (1980), 261
ASTM D 2500–81, 266
ASTM D 2781–82, 273
ASTM D 3602–77 (1982), 259
ASTM D 3948–80, 259
Critical fuel properties, table, 254
Determining requisite for ship-
board screening of non-
specification fuels/adequacy
of procedures, 251

Evaluation of testing procedures,
251
Range of fuel capabilities, table,
256
Recommendations/development of
additional testing proce-
dures, 251

T

Thermal cracking, 7

V

Visbreaking, 10, 43, 199
Viscosity, 28, 43
