

Subject Index

A

Acid volatile sulfides, 53
 Alcohol exposure, 79
 Ammonia, 285
 Amphibian toxicity, 188
 Amphipods, 53, 285
 Aquatic species, 285, 301, 323
 amphipods, 53, 285
 crayfish, 344
 estrogen tests, 23
 fish, 37, 79, 310
 invertebrates, 323
 mosquitofish, 117
 mysids, 257
 oyster larvae, 53
 plants, 163, 270
 test quality procedures, 349, 374
 ASTM standards
 E 1191, 257
 E 1367, 285
 Atrazine, 270

B

Benthic invertebrates, 323
 Benzo(a)pyrene, 138
 Biphenyls, polychlorinated, 53, 219, 230
 Birds, 95
 Brain, 219
 gross rain asymmetry, 230

C

Cadmium, 344
 Carbon, total organic, 53
 Chicken embryo method, 204, 219
 Chlorophyll content, 163
 Chromium, 426
 Chromosome, 109
 Cladocera, 79, 177
 Clastogenic exposure, 109
 Cleanup levels, 426

Coal tar, 138
 Competition, aquatic
 invertebrates, 323
 Computer tomography, 230
 Cone penetrometer test, 456
 Copepod, 79
 Copper, 177, 188
 Cotinine, 149
 Cover-seeking behavior,
 crayfish, 344
 Creosote, 163
 Crustaceans, 323
 Cytochrome P450, 53, 95

D

Daphnia, 177
Daphnia magna, 79
 di-4-ANEPPS, 177
 Diazinon, 177
 Dibenzofuran, 219
 Dioxin, 204
 DNA adducts, quantifying, 117
 DNA damage, translocations,
 109
 Dose, risk assessment, 392
 Duckweed, 163

E

Earthworm, 79
 Ecological significance, 310
 Effluent testing, 374, 349
 Egg injection method, 204, 219
 Electoretinogram, 239
 ELISA tests, 23, 149
 Embryonic exposure, 204, 219, 230
 Enzyme-linked immunosorbant
 assay (ELISA), 23, 149
 Estrogen, 3, 23
 Estuarine variables, 270
 Ethoxyresorufin-O-deethylase
 (EROD) induction, 204
Eurytemora affinis, 79

Extraction
 feature, 456
 soil vapor, 441
 vacuum, 301

Eyesight impairment, 239

F

Fish, 37, 79, 310
 alkylating agent exposure, 117
 FISH, 109
 Fluorescence induction, 163
 Fluorescence in situ hybridization, 109
 Fluorescence microscopy, 177
 Foraging, 323
 Formic acid, 239
 Fractionation, 374
 techniques, 37
 Frog embryo teratogenesis assay (FETAX), 188
 Frog, South African clawed, 188

G

Gambusia affinis, 117
 Gas chromatography/mass spectrometry, 37
 Groundwater exposure, 79

H

H4IIE assay, 204
 Habitat selection, 323
 Halogenated aromatic hydrocarbons, 204
 polyhalogenated, 219
 Heart effects, embryo tests 219
 High performance liquid chromatography, 37
 Hyperactivity, 344

I

Individual model fractions, 138
 Induction
 fluorescence, 163
 mixed function oxygenase, 37
 Insects, 323
 Inverse procedure, 392

Isotope dilution gas chromatography/mass spectrometry, 117

L

Lampricide, 37
 Latin hypercube sampling, 392
 Leeches, 323
Lemna gibba, 163
 Life-cycle test, mysid, 257
 Limb deficits, frog, 188
 Liver, 95
Lumbricus terrestris, 79

M

Macrophyte, 163, 270
 Membrane potential, 177
 Metals, 53, 344, 426
 Methanol, 239
 Methylazoxymethanol acetate, 117
 Methylguanine, 117
 Metolachlor, 270
 Microtox, 53
 Mixed function oxygenase induction, 37
 Modelling
 mathematical, 441
 neural network, 79
 Models, animal, 219
 Molluscs, 323
 Monooxygenase, 95
 Monte Carlo method, 392
 Mosquitofish, 117
 Mysid, 257
Mysidopsis bahia, 257

N

Natural resource damage assessment, 310
 Neural networks, 79
 Neurotoxicity, 219, 230, 239
 Nicotine, 149

O

Oryzias latipes, 79
 Oxidation states, 426
 Oyster larvae, 53

P

Penetrometer test, cone, 456
 Pentachlorophenol, 188
 Performance criteria, 349
 Pesticides, 270
 exposure, 79
 Plankton, 323
 Plate scanner, fluorescence
 microwell, 95
 Polyacrylamide, 177
 Polychlorinated biphenyls, 53,
 219, 230
 Polychlorinated dibenzodioxins,
 219, 230
 Polycyclic aromatic
 hydrocarbons, 53, 138, 163
 Polyhalogenated aromatic
 hydrocarbons, 219
 Population growth bioassays, 163
 Population study, 257
 Pore water, 285, 301
 PRÉCIS, 392
 Predator-prey relationships, 323
 Probabilistic risk assessment
 system, 392
Procambarus clarkii, 344
 Protein
 egg-yolk precursor, 3, 23
 hemoproteins, 95
 patterns, 79

Q

Quality assurance/quality control,
 310, 349

R

Radiation, 109
 Rats, 239
 H411E assay, 204
 Reconstituted model fraction,
 138
 Reporter gene system, 53
 Reproduction, 323
 Reproductive dysfunction, 3, 37
 Resorufin, 95
 Restoration thresholds, 310
 Retina, 239
Rhepoxynius abronius, 285

S

Salinity, 285
Salmonella typhimurium,
 138
 Scale effects, 456
Scirpus olneyi, 270
 Sediment, 53, 301
 grain size, 285
 Soil vapor extraction, 441
 Soil venting, 441
 Spatial data analysis,
 456
 Standards (See also ASTM
 standards), 349
 Stratigraphy, site, 456
 Sulfide, 285
 Sulfur mustard, 79

T

t-3-hydroxycotinine, 149
 Teratogenicity, 219, 230
 Tetrachlorodibenzo-p-dioxin (TCDD),
 204, 219, 230
 Three-trifluoromethyl-four-
 nitrophenol (TFM), 37
 Times Beach, 204
 Tobacco smoke exposure, 149
 Toluene extraction, 37
 Toxicity identification
 evaluation, 37, 374
 Toxicity reduction evaluation,
 374
 Translocations, reciprocal,
 109

V

Vacuum extraction, 301
 Venting, soil, 441
 Visual toxicity, 239
 Vitelline, 204
 Vitellogenin, 3
 teleost, 23
 Volatile organic compounds,
 441

476 ENVIRONMENTAL TOXICOLOGY AND RISK ASSESSMENT

W

Wastewater, 374
Water, xenobiotic estrogen test, 3
Wavelet analysis, 456
Wells, extraction systems, 441

Wildlife

estrogen exposure tests, 3, 23

X

Xenobiotic, 3
Xenopus laevis, 188
