Subcommittee E07.01, 15–22

Subcommittee E07.03, 41–48

Subcommittee E07.06, 49–55

Subcommittee E07.07, 63–70

Subcommittee E07.09, 75–81

Subcommittee E7.10, 71–74

AWS. *See* American Welding Society.

AWS standards

D1.1, 226

C

CALS. *See* Department of Defense
Computer Aided Acquisition and
Logistical Support projects.

Castings, 23

CEC. *See* Commission of the European
Communities.

Ceramics NDE standards, 211

Certification, 169

Coating thickness measurement, 63

Commission of the European Communities,
169

Computed tomography, performance
standards, overview for future work,
15

Computerized records management, 203

Conductivity measurement, 63

Construction industry personnel standards,
225

Continuous method, 41

Control methods—magnetic particle
inspection, 230

D

Data exchange, NDT, 203

Data storage, retrieval, transfer, 203–210

Definitions, reverse expansion, 82–86

Department of Defense Computer Aided
Acquisition and Logistical Support
projects (CALS), 204

Department of Defense standardization, 128

E

Eddy currents, 63–70, 89–125

EFTA. *See* European Free Trade
Association.

Electric potential, 63

Electromagnetic testing, 63–70

Electronic data transfer, NDT, 204

Emergency standards for nondestructive
testing, 9

European Free Trade Association, 169

European harmonization standards

EN 2900–29004, 176

EN 45003, 176

EN 45011 to EN 45014, 176

EN 29000 series, 176

European NDT standards, 169–179

F

Fluorescent liquid penetrant testing, 41

Fringe flux, 63

G

Gamma ray, 15

German Society of Nondestructive
Testing (DGZIP), 230

Glossaries, reverse expansion, ASTM, E-7,
82–86

H

Harmonization, international NDT
standards for personnel
qualifications, 195–200

Harmonization of national regulations, 169

High-temperature materials for NDT, 211–
224

Holography standards for emerging
technology, 71

I

Infrared emerging technologies, 71

Infrared thermography, 89–125

Inspection procedures, 230

Intermediate exchange of NDT data, 203

International harmonization, 195–200

International Standards Organization, 163
personnel qualification for NDT, 195–
200

standards, 163–168

technical Committee (TC) 135

ISO. *See* International Standards
Organization.

ISO standards

3452, 165

5579, 166

5580, 166, 167

DIS-9712, 167, 195–200b

L

Leak testing, 89

Liquid penetrant, 41

M

- Magnetic particle inspection and testing, 41, 230
- Magnetic methods, 89–125
- Master standard, 82–86
- Materials characterization—NDE standards, 211
- Medical diagnostics and NDT, 206
- Military standards for nondestructive testing, 126–135

N

- NDE measurements and standards, 89–125
- NDE standards for high-temperature materials, 211–224
- NDE standards for personnel in the construction industry, 225
- NDT. *See also* Nondestructive testing
- NDT data transfer, 203–210
- NDT inspections, 230
- NDT laboratories, standards, 75–81
- NDT magnetic particle inspection, 230
- NDT personnel qualification, 185, 195
- NDT records management, 203
- Neutron radiography, 34–40
- Neutron radioscopy, 34–40
- Nondestructive examination, 15
- Nondestructive inspection, 157
- Nondestructive testing standards *See also* NDT
 - construction industry, 225

 - data storage, retrieval and exchange, 203–210
 - data transfer, 203
 - Department of Defense perspective, 126–135
 - emerging technologies, 71–74
 - evaluation, 71
 - European, 169
 - CEN TC(Technical Committee)121, 169
 - CEN TC138, 169
 - high-temperature materials, 211–224
 - international, 163
 - overview, 1, 9
 - personnel qualifications, 185, 195, 225
 - reference radiographs, 23
 - ultrasonic NDT, 49
 - writers—discussion, 180
- Nongovernment industry standards, 126–135, 153–162

O

- Optical holography, 71
- Optical scattering, 89–125

P

- Performance standards, construction industry, 225
- Performance standards, radiology NDE test method, 15
- Personnel qualification and certification for NDT, 77, 185, 195
 - PQ practices, 185
 - PQ standards, 185
 - PQ U.S.attitudes, 185
- Personnel standards for NDE, 225
- Piping codes, NDT and ASME, 136–152
- Post emulsified method, 41
- Prenormalization, 169
- Pressure vessel standards, European, 169
- Product forms examination, proposed standards, 15
- Product model data exchange, 203–210
- Proposal for liason and cooperation for global standards, 9

Q

- Quality manual, 75–81

R

- R&QA, 211
- Radiographic interpretation, 23
- Radiography as a method of routine testing, 9, 15
 - reference standards, 23
- Radiologic examination of product forms, 15
- Radiology, 15, 23
- Radioscopic imaging, 15
- Radioscopy, 15, 23
- Records management, 203
- Reference radiographs, standards, 22–33
- Refractory composites—NDE standards, 211
- Residual method, 41

S

- Signal analysis, 211
- Single market, 169
- Society of Automotive Engineers,
 - nondestructive testing standards, 153–162
 - organization chart, 154

Sorting, 63
 Specification, 230
 Standard for the Exchange of Product
 Model (STEP) data, 203–210
 Standardization, 180, 230
 Standards development, 1, 9, 163, 180
 Standards for high-temperature materials—
 NDE, 211–224
 Standards harmonization, 195–200
 Standards writing groups, 180–182
 STEP. *See* Standard for the Exchange of
 Product Model Data.

T

Terminology, reverse expansion, 82–86
 Test methods for nondestructive testing
 standards, 9
 Thermoelectric emerging technologies, 71
 Thermography, infrared, 89–125
 Thermomechanical properties of high-
 temperature materials—NDE
 standards, 211

Tubular products inspection, 63
 Turbine engines—high temperature
 materials, 211

U

Ultrasonic nondestructive testing, 49–55
 Ultrasonics, 89–125
 Ultrasound, 56

V, W

Visible liquid penetrant testing, 41
 Visual acuity, 89
