Peer Review Policy

Each paper published in this volume was evaluated by three peer reviewers. The authors addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the authors and the technical editor(s), but also the work of these peer reviewers. The ASTM Committee on Publications acknowledges with appreciation their dedication and contribution to time and effort on behalf of ASTM.

Foreword

This publication, *Remote Sensing and Site Characterization—Applications and Standards*, contains selected papers presented at the International Symposium on Remote Sensing and GIS for Site Characterization—Applications and Standards, which was convened on January 27–28, 1994 in San Francisco, California. The symposium was sponsored by ASTM Committee D18 on Soil and Rock and its Subcommittee D18.01 on Surface and Subsurface Characterization, and Co-sponsored by the Environmental Protection Agency and U.S. Geological Survey. Co-operating organizations included the United Nations Educational, Scientific, and Cultural Organization, International Association of Hydrological Sciences and its International Committee on Remote Sensing and Data Transmission, International Association of Hydrogeologists, American Water Resources Association, American Congress on Surveying and Mapping, American Society for Photogrammetry and Remote Sensing, AM/FM International, Association of American Geographers, Urban and Regional Information Systems Association, Canadian Centre for Remote Sensing, and Working Group 7 of the International Society for Photogrammetry and Remote Sensing. The symposium was organized under the direction of A. I. Johnson, Consultant, Arvada, CO, the Chairman of ASTM Subcommittee D18.01, Vernon H. Singhroy, Canada Centre for Remote Sensing, Ottawa, Ontario, Canada, Chairman of Section D18.01.03 on Remote Sensing, and Douglas D. Nebert, U.S. Geological Survey, Reston, VA, Chairman of Section D18.01.05 on Mapping and GIS. All three of these persons served as editors of this publication.

Contents

Overview—V. H. SINGHROY, D. D. NEBERT, AND A. I. JOHNSON	1
---	----------

KEYNOTE

Environmental and Geological Site Characterization in Vegetated Areas: Image Enhancement Guidelines—VERN SINGHROY	5
Remote Sensing and Geographic Information Systems: Advanced Technologies for Environmental Monitoring and Management—MANFRED EHLERS	17

REMOTE SENSING APPLICATIONS

Digital Elevation Data, Landsat TM and Magnetic Data for Visualization of Geomorphological and Geological Features—KJELL WESTER AND BENGT LUNDÉN	29
Data Transfer, Necessary Interfaces, and Applications in a Modular Snow Hydrology Modeling System—ALBERT RANGO AND MICHAEL F. BAUMGARTNER	38
A Change Detection Methodology for the Amazon Forest Using Multitemporal NOAA/AVHRR Data and GIS—Preliminary Results— ANGELICA C. DI MAIO MANTOVANI AND ALBERTO W. SETZER	43
A Concept for Remote Sensing Data Selection and Method Selection— KO B. FUNG AND M.A. ROBSON	47
Spatial Data Technologies for Environmental Management Within the Department of Energy (DOE): Issues and Applications—BRYAN J. ALBERS, CHARLES L. NALEZNY, CAROLINE B. PURDY, AND VERN H. SINGHROY	53

GEOGRAPHIC INFORMATION SYSTEM (GIS)

Integration of a GIS Data Set with Aerial Photography Using GPS for Control Points on the Newlands Project in Nevada—DAVID T. HANSEN AND MICHAEL SEBHAT	66
Basic Data Requirements for Ground-Water GIS Systems—PHILIP L. HALL	75
The Importance of Undergraduate, Graduate, Technical, and Applied GIS and Remote Sensing Education—ROBERT O. BIXBY	89
Geographical Information Systems (GIS) Application to Analyze Transportation Effects on Mineral Activities in a Developing Country— RALPH KINGSTON ASABERE	93

SITE CHARACTERIZATION

Development of a GIS for Environmental Assessment Incorporating Known Potential Environmental Hazards and Remote Sensing— DEBORAH L. SHAFFER, MARY J. S. ROTH, AND ROGER RUGGLES	101
Environmental Remote Sensing of Military Exercise Areas in Germany— FRIEDRICH KÜHN AND BERNHARD HÖRIG	107
Integrating an Object-Oriented GIS in a Geohydrological Information System— FRANK DECKERS AND VICTOR VAN DEN HOVEN	117

STANDARDS

Interpreting the ASTM “Content Standard for Digital Geospatial Metadata”— DOUGLAS D. NEBERT	127
Conceptualization and Characterization of Ground-Water Systems Using Geographic Information Systems— KENNETH E. KOLM	131
Application of Content Standards for Digital Geospatial Metadata to Laboratory Data and the Site Characterization Process— DAVID T. HANSEN	146
The National Aerial Photography Program As a Digital Ortho Image Map Base for Geographic Information Systems— DONALD L. LIGHT	154

APPENDIX

Appendix 1—Glossary of Acronyms, Terms, and Definitions	163
Appendix 2—Standards of Some ASTM Standards Related to Remote Sensing, GIS, and Site Characterization	174
Author Index	175
Subject Index	177
