June 1994

# Foreword

This publication, *Radon: Prevalence, Measurements, Health Risks and Control*, was sponsored by ASTM Committee D22 on Sampling and Analysis of Atmospheres. The editor was Niren L. Nagda of ENERGEN Consulting, Inc., Germantown, MD. This is Manual 15 in ASTM's manual series.

# Acknowledgments

The solid efforts by the authors of the chapters are clearly seen as one peruses this book. The authors responded to the many requests from ASTM and from me to complete their contributions for this book initiated in 1989.

The behind-the-scene efforts by the reviewers and by the ASTM staff may not be as easy to recognize at first glance. I wish to thank Michael Brambley, Edward Maher, Gordon Nifong, and Harry Rector, who reviewed the chapter manuscripts. Their recommendations helped the authors and me to improve the content and presentation.

The patience and hard work by the ASTM staff to publish this book is acknowledged. Without the persistent efforts of Kathy Dernoga, Manager of Acquisition and Review, and her staff including Monica Siperko, and David Jones, who served as the ASTM editor, this book would not have been possible.

Finally, I am grateful to my family, who gracefully accepted the serious encroachment the preparation of this book had on our family and leisure time.

*Niren L. Nagda*  
Editor

# Contents

<b>Chapter 1—Radon—A Multifaceted Environmental Problem: An Overview</b> <i>by Niren L. Nagda</i>	1
<b>Chapter 2—Radon and the Natural Environment</b> <i>by Richard G. Sextro</i>	9
<b>Chapter 3—Health Effects of Radon</b> <i>by Jonathan M. Samet</i>	33
<b>Chapter 4—Measurement Methods and Instrumentation</b> <i>by Roy C. Fortmann</i>	49
<b>Chapter 5—Radon Measurement Protocols</b> <i>by Melinda Roca-Battista and Paul Magno</i>	67
<b>Chapter 6—Geology and Occurrence of Radon</b> <i>by R. Randall Schumann, Linda C. S. Gundersen, and Allan B. Tanner</i>	83
<b>Chapter 7—Concentration Patterns</b> <i>by Michael D. Koontz</i>	97
<b>Chapter 8—Radon Control Strategies</b> <i>by Kelly W. Leovic and Richard Roth</i>	112
<b>Chapter 9—EPA’s Strategy to Reduce Risk of Radon</b> <i>by Steve Page</i>	134
<b>Chapter 10—Current and Future Perspectives</b> <i>by Susan L. Rose</i>	148
<b>Index</b>	159

## About the **EDITOR**

**D**R. NIREN L. NAGDA is president of ENERGEN Consulting, Inc., an energy and environmental consulting firm located in Germantown, Maryland. Prior to founding ENERGEN, he was with GEOMET Technologies, Inc., Germantown, Maryland, for fifteen years during which time he rose from the position of research scientist to become a vice president. He also served as a vice president of ICF Incorporated, headquartered in Fairfax, Virginia.

Dr. Nagda's research on indoor radon and indoor air quality in general has included monitoring, modeling, exposure and risk assessment, mitigation, and cost analysis. His work has been published widely. In 1987, he co-authored a book entitled *Guidelines for Monitoring Indoor Air Quality* published by Hemisphere Publishing Corporation, New York.

The editor holds a B.Tech. (honors) in chemical engineering from the Indian Institute of Technology, an M.S. in chemical engineering from the University of Pittsburgh, and a Ph.D. in bioengineering from the University of Illinois. He is an active member of ASTM Committee D22 on Sampling and Analysis of Atmospheres and is the secretary of D22.05 on Indoor Air. He is a co-editor of STP 1002, *Design and Protocol for Monitoring Indoor Air Quality*, and is the editor of STP 1205, *Modeling of Indoor Air Quality and Exposure*.
