FOREWORD

This symposium, the ninth in a series of symposia on electrical insulating fluids, was presented in Pittsburgh on Oct. 9, 1962, under the sponsorship of ASTM Committee D-27 on Electrical Insulating Liquids and Gases. Previous symposia in the series were published in the ASTM Bulletin, No. 146, May 1947 and No. 149, December 1947, and as ASTM Special Technical Publications Nos. 95, 135, 152, 172, 218, and 253.

NOTE.—The Society is not responsible, as a body, for the statements and opinions advanced in this publication.

CONTENTS

	PAGE
Introduction	1
Gaseous Insulation: Its Importance and Need for Test Methods—	
M. L. Manning	3
Discussion	22
The Use of Sulfur Hexafluoride as a Gaseous Dielectric—	
J. A. Brown	24
Discussion	31
Hexafluoroethane and Octafluorocyclobutane—E. C. Coyner and	
D. Hanesian	35
Discussion	47
Fluorocarbon Gases and Volatile Liquids: Properties and	
Applications—J. W. Sargent and J. D. LaZerte	51
Discussion	66
Round-Robin Tests on Test Cells for Insulating Gases—T. W. Liao	
and G. Shombert	67
Discussion	79
