

Subject Index

A

Air blast pressure, 159
 Airport control towers, 79
 Anchored-film glass retention systems, 131
 Annealed glass, 131
 thermal stress evaluation, 105
 ASTM C 1036, 3
 ASTM C 1048, 26
 ASTM C 1279, 26
 ASTM E 1300, 66, 79, 90
 ASTM E 1886, 131
 ASTM E 1996, 131

B

Blast resistance, 159
 Building codes, 8
 Burglary, 147

C

Coatings, 20
 Computer software, 90
 Computer technology, 90
 Condensation resistance rating, 49
 Creep resistance, 57
 Cyclic pressure cycles, 121

D

Damaged glass, 3
 Design standards, 90
 Dew-point measurement, 35

E

Edge strength failure prediction model, 105
 Edge stress, 66

F

Failure prediction, 79
 Fallout protection, 131
 Fenestration, 131
 Finite element analysis, 66, 79, 105
 Fire-rated glass, 131

G

Glass, breakage during fire, 131
 Glass inspection, 3
 Glass lites, 79
 Glass quality, 8
 Glass retention, 131
 Glass specification, 3
 Glass storage, 3
 Glass strength, 8, 57
 Glazing, security, 147
 Glazing design, 66, 79, 90
 blast resistance, 159
 wind load resistance, 79

H

Heat-strengthened glass, 26
 High winds, 121
 Hurricane resistance, 121, 131
 Hydrophilic, 20
 Hydrophobic, 20

I

Impact resistant glass, 121
 Insulating glass, 35
 blast resistance, 159
 Interlayers, 57
 International standards, 8

L

Laminated glass, 57, 66, 121
 blast-resistant, 159
 Load resistance, 66
 Longevity, 35

M

Missile impact test, 121

N

National standards, 8
 NFRC 100, 49
 NFRC 500 Procedure, 49

P

Photocatalytic, 20
 Polyvinyl butyral interlayers, 57

Q

Quality control, 26

R

Retrofitting, hurricane resistant
glass, 121

S

Safety glazing, 8
Scratched glass, 3
Security, 147
Self-cleaning glass, 20
SentryGlas Plus, 57
Service life, 35
Skylights, 8
Sprinkler systems, 131
Standards Design Group, Inc., 90
Stiff interlayer, 57
Stiffness, 57
Storm shutters, 121

Stress

maximum, 66, 79
measurement, 26
Surface damage, 3

T

Temperature differential, 131
Temperature performance, 57
Tempered glass, 26
Tensile stress, 105
THERM 2.1, 49
Thermal shock, 131
Thermal stress
 cracking, 131
 evaluation procedure, 105
Three-sided support, 66

W

Windborne debris, 121, 131
WINDOW 4.1, 49
Wind resistance, 79
