STP No. 9-H

This is a list of references to articles published in 1956 dealing with fatigue of structures and materials, following the plan used in previous annual lists from 1950 through 1955. References are generally so arranged that sheets can be cut apart for filing according to any desired plan. Brief abstracts have been included when these were readily available.

Comments and suggestions concerning the value and format of this list would be appreciated. Correspondence should be addressed to
