Peer Review Policy

Each paper published in this volume was evaluated by three peer reviewers. The authors addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the authors and the technical editor(s), but also the work of these peer reviewers. The ASTM Committee on Publications acknowledges with appreciation their dedication and contribution of time and effort on behalf of ASTM.

Foreword

The symposium on Geophysical Methods for Geotechnical Investigations was presented at St. Louis, Missouri, on 29 June 1989. ASTM Committee D-18 on Soil and Rock sponsored the symposium. Frederick L. Paillet, U.S. Geological Survey, and Wayne R. Saunders, ICF-Kaiser Inc., served as co-chairmen of the symposium and co-editors of the resulting publication.

Contents

Overview	1
