

Subject Index

A

Abstraction, 114
 Access methods (*see also* Search strategies), 104, 132
 Accessibility of data, 46, 260
 ACTIS Tribomaterials Database I, 180
 Advanced materials database system (AMDBS), 168
 AISSA < TSNIIM, 10
 Alloys, 56
 Aluminide coatings, 252
 Aluminum alloys, 37, 44, 197
 ALUSELECT, 44
 ARIANE, 27
 ASM International, 2, 161
 Associativity of information, 114
 ASTM Committee E49, 1, 58, 73, 168
 ASTM Standards
 C 28, 75
 D 4000-87, 75
 G 40-88, 180
 Austenitic stainless steels, 214
 AVESTA, 8

B

Basquin relationship, 197
 Benefits of materials databases, 17, 103
 Bibliographic databases, 26, 181
 Bibliographic references, 142
 Bulgaria, 7

C

C&HTC DATA BANK, 251
 Calculation software, 26
 Canonical data records, 84
 Catalogs, 114, 142
 CD-ROM (*see* Compact disk systems)
 Ceramics (*see also* VAMAS), 75, 168, 259.
 Chromium-molybdenum steels, 214
 Cluster analysis, 230

Coatings and High Temperature Corrosion Data Bank (C&HTC DATA BANK), 251
 CODATA (Committee on Scientific and Technical Data), 1, 10, 17, 27
 Coffin-Manson relationship, 197
 COMAS, 230
 COMECON SRD system, 7
 Compact disk systems (CD-ROM), 103, 104
 Component analysis (*see* Design)
 Composite materials, 73, 75, 168
 Computer-readable databases, 44, 142
 Computer(s),
 main-frame, 104
 personal (PC), 27, 103, 161, 180, 231
 Corrosion, 251
 Cost-benefits, 18
 Creep and tensile properties, 214
 Cuba, 7
 Czechoslovakia (CzSSR), 7, 11
 Czechoslovakian timber (CzSSR), 11

D

Data, 114, 144
 collection, 37, 46, 142
 models, 114
 sources, 144
 thesaurus, 114
 validity of, 27, 73, 84, 251
 values, 84
 Data bank, 44, 114, 251
 design, 84
 compilation, 26, 37, 142
 Data dictionary, 114, 181
 Data display, 103, 161
 Data pooling, 197
 Database, 1, 44, 251
 construction, 37, 44, 161
 and data sources, 2, 142, 168, 181
 structure, 168, 181
 Database management systems (DBMS), 38, 103, 161
 Design, 114, 180, 197, 230

Designation, 56
 Directory data, 27
 Discriminant analysis, 230
 Diversity of database systems, 57, 103
 Downloading capabilities, 104

E

Ease of use, 103
 Economics, 17, 38, 159
 End-user (*see* User's)
 Engineering materials, 73, 142
 European Aluminum Association (EAA)
 Data Bank Project, 44
 Evaluation, 37

F

Factual databases, 27
 Fatigue, 197
 Ferrous metals and alloys, 8, 142
 File structure, 161
 Fluids, 8
 FOCUS database system, 214
 Focused database, 259
 Food products, 8
 Format, 114
 of test results, 73, 114
 and user expectations, 103
 France, 17, 26, 57
 Friction (*see* Tribology)

G

German Democratic Republic (GDR), 7,
 37
 Glass, 8
 Grain size, 214
 Graphics capability, 103, 168
 Guidelines (*see also* Standardization), 1, 2,
 73

H

Handbooks, 142
 Hardware, 38
 Harmonized property values, 44
 Harmonized terminology, 73
 Heat exchangers, 261
 High temperature corrosion, 251
 HIGHTEMP, 214
 Hungary, 7
 Hypertext links, 84

I

Identification, 56
 Indicators of data quality, 73
 Industrial fluids, 10
 Information, 143
 systems, 161
 Inputting data, 161
 Integrity of the database, 84
 Interactive system, 161
 Interchange, 114
 International cooperation, 7, 17, 44, 57,
 105
 International Council of Scientific Unions
 (ICSU), 1, 17
 International Register of Materials
 Database Managers, 17
 IVTANTERMO, 10

K

KTH (Royal Institute of Technology,
 Sweden), 45

L

Layered approach, 114
 Leather, 8, 11
 Life, 197
 Load history (L), 197
 Low alloyed stainless steels, 214
 Lubrication, 180

M

Machine-readable data, 2
 Mainframe systems, 103
 Management, 17
 Marketing, 17
 MARS.GIPROKAUT-CHUK, 11
 MASMA, 8
 Matches (*see* Search strategies)
 Mat.DB, 161
 Material designation systems, 2, 57
 Material selection, 44, 132, 180, 230
 Material(s), 84, 144
 and data, 26, 57, 114
 data banks, 7, 17, 37, 251
 type, 26
 Materials Database Newsletter, 17
 Materials Information for Science and
 Technology (MIST), 169
 Materials Property Data (MPD) Network, 2

Materials property databases, 84, 114
 MCrALY coatings, 252
 Mechanical properties, 214
 of engineering materials, 142,
 of metals, 26
 Menu-driven interfaces, 2, 103
 Metadata, 3, 84, 114
 Metallurgical data, 214
 Metals (*see also* Aluminum alloys, Steels),
 10, 56, 75, 168
 MIL-HDBK, 168
 Minitel, 27
 Mongolia, 7
 MPD Network, 2, 103
 Multiple criteria (*see* Search strategies)
 Multivariate analysis, 230

N

National Institute of Standards and
 Technology (NIST), 181, 259
 National programs, 37
 Network, 84, 103
 Nomenclature, 104
 Nonbibliographic databases, 114
 Nonferrous metals, 8, 10
 Nonmetallic materials, 142
 Numeric databases, 26, 103, 180

O

Oil products, 8
 Online networks, 103
 Operating practices, 2
 Organic compounds, 11
 Organic products, 8

P

PC, SCD system, 259,
 Personal computers (PC), 27, 103, 161, 180
 and compatibility, 103
 and sources of data, 144, 259
 Phenomenological databases, 85
 Physical properties, 142
 Physical Properties of Materials (USSR), 9
 Physico-Chemical Properties of Organic
 Compounds (USSR), 11
 Pilot National Materials Property Data
 Network, 103
 Plastics, 9, 11
 PLASTPOLYMER (USSR), 11
 Poland, 7
 Polymer-matrix composites, 168

Polymeric materials, 73, 75
 Polymers, 9, 168
 Pooled data, 197
 Pressure vessels, 214
 Printed databases, 84
 Probabilistic design, 197
 Problem solving, 230
 Product development, 230
 Properties of Heat-Resisting Steels (CzSSR),
 9
 Properties of Iron Casting (GDR), 9
 Properties of Nonferrous Metals (GDR), 10
 Properties of Plastics (CzSSR), 9
 Properties of Polymeric Materials (USSR),
 11
 Properties of Polymers (GDR), 9
 Properties of Steels (GDR), 8
 Properties of Structural Materials (Poland),
 10
 Properties of Structural Steels (CzSSR), 10
 Properties of Structural Steels and Alloys
 for General Engineering Use
 (USSR), 10
 Properties of Timber and Fibrous Raw
 Materials (USSR), 11
 Properties of Tool Steels (CzSSR), 8
 Property data, 44, 73, 161
 Protocol, 114

Q

Queries, 133

R

Range searching, 132
 Refractory metals, 142
 Relational databases, 114, 168
 Reliability, 197
 Reporting formats, 73
 Retrieval systems (*see* Access, Computers,
 Search strategies, User's needs)
 Rumania, 7

S

SAE 1045, 197
 SAE 2024-T3, 197
 Safety index, 198
 SCD (Structural Ceramics Database), 259
 Scientific, Technical, and Economic
 Properties of Leather (CzSSR), 11
 Search strategies, 26, 103, 132
 and user expectations, 57, 103

Semantic data models, 114
 SMI (Swedish Materials Information), 231
 Software, 58, 161
 for building databases, 114, 181
 Sources of data, 142
 Specifications, 56
 Stainless steels,
 12% chromium stainless steel, 214
 15Cr-15Ni-1Mo stainless steel, 214
 17Cr-12Ni-2Mo-0.15N stainless steel,
 214
 Standard reference data (SRD), 2, 7
 Standardization, 7, 84
 of data dictionaries, 114
 of metadata, 84
 in operating practices, 2, 7, 73
 Standards, 73, 168
 Statistics, 197
 Steels, 8, 9, 214
 STN International, 2, 105
 Strain, 197
 Stress-life fatigue, 180, 197
 Structural Ceramics Database (SCD)
 system, 259
 Sweden, 1, 44, 214
 Switzerland, 1, 44
 Syntax, 114

T

Tables, 114
 Tabular databases, 114
 Technology transfer, 180
 TEKOMA, 10
 Temperature calculations, 180
 Tensile and creep properties, 214
 Terminology, 104, 161
 harmonized, 44, 73
 and metadata, 84
 Test results, 73
 Textual-numeric databases, 27
 THERMODATA, 27
 Thermodynamic Properties of Industrial
 Substances (USSR), 10
 Thermophysical Properties of Industrial
 Fluids (USSR), 10

Thermophysical Properties of Organic
 Substances, Mixtures, and Oil
 Products (USSR), 8
 Thesauri, 3, 84, 96, 114
 and data formats, 2, 84
 interactive, 103
 Timber, 8
 Timber and fibrous raw materials,
 properties of (USSR), 11
 Tool steels, properties of (CzSSR), 8
 Transfer of data, 114
 Tribology, 180
 Type of access, 26

U

Unalloyed stainless steels, 214
 Unified Numbering System (UNS) for
 Metals, 75
 Union of Soviet Socialist Republics
 (USSR), 1, 7
 Units of measurement, 161
 Universal numbering system, 73
 User friendliness, 37, 112
 User interface, 132
 User's, 27, 58, 112, 181
 in CODATA, 8, 17
 needs and expectations, 103, 132, 168
 in SCD system, 259

V

Validating data, 37
 Values, 115
 VAMAS, 57
 Vietnam, 7

W

Wear model calculations, 180

Y

Yield strength, 214
