The Symposium on the Measurement of Dynamic Properties of Elastomers and Elastomeric Mounts was presented at the SAE Automotive Engineering Congress held in Detroit, Michigan, January 8-12, 1973. The Symposium was jointly sponsored by the Society of Automotive Engineers and the American Society for Testing and Materials. This symposium was primarily a result of the efforts of the symposium organizers A. F. Hegerich, Ford Motor Co., and B. M. Hillberry, Purdue University, with support of several members of the SAE-ASTM Technical Committee on Automotive Rubber (TCAR), Section 11.65, who contributed as authors. Alfred F. Hegerich served as the symposium chairman and B. M. Hillberry served as co-chairman and editor of the proceedings.
