

## Subject Index

### A

Acetoxy systems, 299  
 Acid-base interactions, 87  
 Acrylic, 29, 144  
   polymers, 268  
 Adhesion, coatings  
   D 4541: 1  
 Adhesion-in-peel  
   C 794: 1, 29, 87, 126  
 Adhesion, sealant, 105, 201, 238  
   aluminum, coated, 144  
   C 719: 1  
   cleaning and, 74  
   gloss level and, 117  
   highway joint seals, 213  
   tensile, 45  
   tests for, 87  
 Aging, accelerated, 45, 64  
 Aging, heat  
   C 792: 1  
 Alkoxy systems, 299  
 Aluminum, 29, 144  
 Argon permeability, 238  
 ASTM standards  
   C 661: 1  
   C 719: 1  
   C 792: 1  
   C 794: 1, 29, 87, 126  
   C 920: 292  
   D 1190: 201  
   D 3405: 201  
   D 4541: 1  
   E 330: 1

### B

Barium peroxide, 292  
 Benzamide, 299  
 Blister test, constrained, 105  
 Blue sky radiation, 311  
 Building movement, 160  
   model, 245  
 Butadiene-styrene, 260

### C

Calcium peroxide, 292  
 Caulk, 29  
 Channel movement, 29  
 Cleaning solvents, 74  
 Climate driven durability tester,  
   29  
 Coatings  
   acrylic, 144  
   D 4541: 1  
   elastomeric, 245, 260  
   fluorinated, 144  
   organic, aluminum, 144  
   powder, 117  
   silicone emulsion, 260  
 Concrete  
   joint sealer  
     D 1190: 201  
     D 3405: 201  
   masonry walls, 245  
 Condensation, 64  
 Constrained blister test, 105  
 Cracking, sealant, 10, 299  
 Crack width, 245  
 Cure, 64, 299  
   rates, 292  
 Curtain wall, 1, 179

### D

Deformation, continuous, 299  
 Degradation, sealant, 10, 45, 311  
 Deutsches Institut für Normung  
   DIN 52455, 87  
 Durability, 64  
   durometer, 1, 45  
     C 661: 1  
   climate-driven tester, 29  
   glass units, dual-sealed, 222

### E

Elasticity, 201, 222  
   viscoelasticity, 213  
 Elastomeric materials, 213  
 Elastomeric sealants, 201

Elastomeric wall coatings, 245  
Elastomers, 260

## F

Failure prevention, sealant, 189  
Fillet, 179, 189  
Finite element analysis, 213  
Fluorinated coatings, 144  
Foam bond-breaking tape, 179

## G

Glass channel, 29  
Glass, insulating, 222, 238, 268  
Glazing compounds, solvent-based, 268  
Gloss level, 117  
Gunning equipment, 268

## H

Hardness, 201  
    indentation, 1  
Heat aging, 1  
Highrise buildings  
    leakage, 179  
    sealants for, 160  
Highway joint seals, 213

## I

International Organization for  
    Standardization  
    ISO/DIS 9047, 87

## J

Joints, sealant  
    design, 179  
    failure, 189  
    movement, 299  
    pavement  
        D 3405: 201  
    performance, 74  
    strength, sealant, 1  
    stress distributions, 213

## L

Lap-shear tests, 87, 105  
Latex rubber, 280

Lead dioxide, 292

## M

Manganese dioxide, 292  
Masonry, 260  
Mortar block, 126  
Movement, building, 160  
    profile, 245  
Movement, channel, 29  
Movement, joint, 299  
Mullion cover, 179

## O

Oxime cure, 299

## P

Peel tests, 87, 105  
    C 794: 1, 29, 87, 126  
Photometer, 311  
Phthalate, 292  
Pigments, 117  
Polarity, 87  
Polybutadiene, hydroxylated, 238  
Polyester  
    coatings, powder, 117, 144  
    coatings, wet, 144  
    resins, 117  
Poly(dimethylsiloxane), 280  
Polyisobutene, 222  
Polysulfide, 238, 292  
Polyurethane, 238  
Pressure difference, air  
    E 330: 1  
Pressure, rate of, 105  
Primer, organic solvent based, 74

## Q

QUV, 10, 45

## R

Reversion, 45  
Rubber latex, silicone, 280

**S**

Silicone cleaning/priming  
 solution, 74  
 Silicone emulsion elastomers, 260  
 Silicone rubber latex, 280  
 Silicone sealants, 29  
 adhesion, 87, 117, 144  
 gloss level, 117  
 heat stability, 45  
 oxime, 299  
 rubber latex, 280  
 tests for, 1  
 weathering, artificial, 201  
 Solvents, surface cleaning, 74  
 Spectral power distribution, 10  
 Standards (See also ASTM  
 standards)  
 building construction, 160  
 Stress analysis, 213  
 Stress relaxation, 213  
 Stress concentration, 87  
 Sunlight, 311  
 Surface energy, 87, 117, 144  
 Surface preparation, 126  
 Surface profile, sealant, 189

**T**

Tape, foam bond-breaking, 179  
 Tensile strength, 1, 87  
 Tensile stress, 222  
 Tin catalyst, 280

**U**

Ultraviolet radiation, 10, 45, 64  
 absorption, 311  
 aging effect, 238  
 resistance, 268  
 Urethane, 45

**V**

Vinyl acetate polymer, 260  
 Viscoelasticity, 213  
 Volatile organic compounds, 268

**W**

Wall panels, exterior, 160  
 Wall surface temperature  
 building movement model, 245  
 Water-based acrylic sealants, 268  
 Water permeability, 222, 238, 260  
 Waterproofing, 245  
 Weathering, sealant, 10  
 accelerated, 45  
 artificial, 29, 64, 201  
 Weatherometer, 1  
 Weathersealing, 74

**X**

Xenon arc, 10
