

Index

A

Anisotropy, 12, 26

B

Bandwidth, 9, 35

Beer's law, 57

Biacetyl, 48

C

Calorimetric methods, 56

Chemical microenvironment probes, 5

Chemicals

Hazardous—methods of detection,
95

Chemiluminescence measurements

Micellar solutions, 42

Chen, Raymond F., 26–39

Chloride

Cyanuric, 69

Ions, 57

Chromatography, 6

Chromatographic phenomena, 8

Reverse phase, 9

Micelle separation, 42

Cline Love, L. J., coeditor, 1, 2,
40–51, 117–119

Cluster analysis—pairwise comparisons, 100

Cyclodextrin (CD-RTP), 49

D

Dansyl conjugates, 26

Rotational freedom

Table, 34

Dephasing time, 9

Diffraction efficiency, 7

Diffuse reflectance spectroscopy, 62

Dimethylnaphthalene isomers, 9

Ditzler, Mauri A., 63–77

E

Eastwood, D., coeditor, 1, 2, 95, 115,
117–119

Electromagnetic radiation, 55

F

Feature sets

Description, 98

Library development of chemicals

Tables, 101, 103, 104, 105, 106

LTL/RTF spectra—hazardous
chemicals, 96

Noncentral moments, 96

Wavelength maximum, 98

Florescence

Decay, 31

Depolarization, 27

Emission, 17

Fiberoptic, 63

Micelle enhancing, 42

Polarization, 27

Relaxation parameters

Table, 36

Quantum efficiency utilizing PAS,
56

- Quenching, 57, 63
 Room temperature (RTF) spectra, 95
 Library development of hazardous chemicals, 95
 Synchronous-excitation (SEF), 81
 Fluorescent complexes, 63
 Fluorogenic ligand, 63
 Immobilization, 63
 Design — amount/procedure/substrate, 69
 Instrumentation, 70
 Theory, 65
 Immobilized ligands
 Calcein, 74
 Hydroxynaphthol blue, 72
 8-Hydroxyquinoline-5-Sulfonate, 74
 Morin, 71
 Quercetin, 71
 Salicylidene-o-Aminophenol, 74
 p-Tosyl-8-Aminoquinoline, 76
 2, 2', 4-Trihydroxyazobenzene, 76

G

- Gilbert, James, 95–115

H

- Hahn, David, A., 5–15
 H-bonding impurities — qualitative discrimination, 19
 H-bonding interactions, 18
 Hudson, Robert D., 63–77
 3-Hydroxyflavone, 17
 Absorption/emission, 18
 Behavior in solvents, 19
 Excitation spectra, 20
 Fluorescence emission spectra, 21
 Fluorescence probe, 22
 Fluorescence spectra, 19

I

- Instrumentation, 41, 55, 70, 83, 97
 Intramolecular effects, 17
 Isolated-site crystal matrix
 Shpolskii matrix, 22

K

- Kaminski, Raymond, 81–94
 Kasha, Michael, 16–25
 Kirkbright, Gordon F., 55–62
 Koskelo, Aaron C., 5–15

L

- Liquid chromatography (LC), 6, 47, 83
 Lorentzian, 9
 Luminescence
 Coupled phenomena, 55
 Efficiency
 Quantum, 58
 Tables, 61
 Low temperature (LTL) spectra, 95
 Manipulation of observable, 81
 Spectrometry, 56
 Standard materials, 48

M

- McMorrow, Dale, 16–25
 Methylcyclohexane, 17
 Micelle-stabilized (MS-RTP)
 Aromatic compounds, 42
 Heavy atom concentration, 42
 Limits of detection, 44
 Surfactants, 43
 Triplet-triplet annihilation (TTA), 43
 Microcrystalline phosphorescence, 44
 RTP wavelengths
 Table, 46
 Colloid similarity, 45
 Mohler, Carol E., 5–15

N

- Nanosecond spectroscopy, 14
- Nonexponential phosphorescence decay, 23
- Nonradiative relaxation, 55

O

- Obenauf, Ralph H., 81–94

P

- Pattern recognition, 96
- Perrin plots, 29
- Phenols, 81
 - Automation, 88
 - Illustration, 91
 - Benefits, 82
 - Detection methods
 - Derivative spectroscopy, 87
 - Fluorescence, 84
 - Synchronous scanning, 85
 - Limits of detection, 86
 - Tables, 88, 89
 - Three dimensional, 86
 - Illustration, 87
 - Hazards, 82
 - Instrumentation — spectrofluorometer, 83
 - Illustration, 83
 - Occurrence, 82
 - Structure
 - Illustration, 82
- Phosphorescence
 - Molecular association, 50
 - Room temperature (RTP) in fluid, 40
- Photoacoustic
 - Signal saturation, 59
 - Spectroscopy (PAS), 55
 - Studies, 55
- Photoautomerization, 18

- Photon polarization ratio, 9
 - Illustration, 10
- Picosecond spectroscopy, 14, 18
- Pokornicki, Steven, 63–77
- Polycrystalline, 22
- Polycyclic aromatic hydrocarbons (PAH), 9, 44
- Polynuclear aromatic compounds (PNA), 84
- Protein
 - Labeled, 27
 - Unlabeled, 32
- Protein rotations, 27
 - Classes
 - Differential polarized phase fluorometry, 32
 - Steady state, 28
 - Time-resolved fluorescence anisotropy, 30
 - Global, 29
 - Nonglobal, 26
 - Segmental, 32
- Protein structure
 - X-ray crystallography, 26
- Proton transfer, 17
 - Illustration, 17
- Proton transfer spectroscopy — analytical application, 16
- Purcell, Francis J., 81–94
- Pure liquid structure, 7

Q

- Quantum efficiency, 55
- Quenched phosphorescence, 40
 - Cyclodextrin, 43
 - Microcrystals, 43
- Quinine bisulfate, 57

R

- Radiative relaxation, 55
- Rembish, Karin, 40–51
- Rotational diffusion constants, 9

S

- Saari, Linda A., 63–77
- Sanders, Matthew J., 5–15
- Scott, Carrie H., 26–39
