FOREWORD

The papers and discussion appearing in this volume were presented at a Symposium on Welding held at the second Regional Meeting of the American Society for Testing Materials, Pittsburgh, March 18, 1931, under the auspices of the Pittsburgh District Committee. The technical program was arranged in cooperation with the Pittsburgh Section of the American Welding Society. The papers were designed to present the present status of the welding art with its several applications and to promote discussion on the various types of weld testing. The committee immediately in charge of the technical program consisted of the following:

- Dean Harvey (Chairman), Materials Engineer, Material and Process Engineering Dept., Westinghouse Electric and Manufacturing Co.
- C. F. Buente, Secretary, Concrete Products Company of America.
- A. M. Candy, Welding Engineer, Westinghouse Electric and Manufacturing Co.
- E. H. Dix, Jr., Metallurgist, Aluminum Research Laboratories, Aluminum Company of America.
- L. R. Gurley, Editor, *Welding*, Steel Publications, Inc.
- F. M. Howell, Engineer of Tests, Aluminum Research Laboratories, Aluminum Company of America.
- J. O. Leech, Manager, Bureau of Inspection and Tests, Carnegie Steel Co.
- W. A. Selvig, Chemist, U. S. Bureau of Mines.
- Jerome Strauss, Chief Research Engineer, Vanadium Corporation of America.

CONTENTS

Processes, Materials, Applications	PAGE
General Survey of Welding Processes—F. T. Llewellyn.....	7
Discussion.....	23
Welding Processes Applicable to Aluminum—W. M. Dunlap.....	24
Discussion.....	28
The Quality of Materials for Fusion Welding—C. R. Texter and F. N. Speller. .	29
Discussion.....	37
Modern Applications of Arc Welding—A. M. Candy.....	42
Discussion.....	62
Recent Developments in Gas Welding and Cutting—E. J. W. Egger.....	68
Discussion.....	77
 Inspection and Testing of Welded Products	
Stethoscopic Examination of Welded Products—J. R. Dawson.....	81
Inspection of Welding Made by the Watertown Arsenal—G. F. Jenks.....	86
Discussion.....	104
Gamma-Ray Testing of Welds—G. E. Doan.....	106
Discussion.....	113
Magnetic Methods of Testing Butt Welds—T. R. Watts.....	115
Discussion.....	129
Fatigue and Impact Testing of Welded Products—T. M. Jasper.....	130
Discussion.....	137
Welding Inspection—R. Kraus.....	141
Discussion.....	152
