PREFACE

*"What has once been published, is spoken
of as known, and it is too often forgotten
that rediscovery in the library may be a more
difficult and uncertain process than the first
discovery in the laboratory."*

Lord Rayleigh, 1884

The retrieval problem is as real today as it was in Lord Rayleigh's time. It has been estimated¹ that not finding published information costs the U. S. over a billion dollars a year. The present volume is intended to provide basic information for solution of this problem in a particular area. Identification of the information by experts is an important feature of the present work, and should be basic to any successful retrieval system. A long-term project of this kind requires for its fruition the energy and enthusiasm of a leader—provided ably in this instance by Chairman Walter S. Hyler.

R. E. PETERSON
