

Part IV—Molecular Characterization

McIntyre

Potts

Statton

Slichter

About the Authors

DONALD MCINTYRE received his Ph.D. in chemistry from Cornell University in 1954. He began work in polymers in 1953 with Monsanto Chemical Company in Springfield, Mass. From 1954 to 1956 he served in the U. S. Army where he was assigned by the Army Medical Service to the National Bureau of Standards for polymeric studies on blood plasma expanders. After leaving the army he joined the Polymer Structure Section of the Bureau, where he is a project leader on fundamental research on properties of polymers in solution.

W. J. POTTS, JR. received his Ph.D. in chemistry in 1952 from the University of Chicago. He joined the Spectroscopy Laboratory of the Dow Chemical Company in 1953, and presently heads its infrared department.

W. O. STATTON obtained his Ph.D. in inorganic chemistry from the Massachusetts Institute of Technology in 1950. He is senior research chemist in charge of X-ray studies of fibers and polymers at the Pioneering Research Laboratories, Textile Fibers Department, E. I. du Pont de Nemours & Co., Wilmington, Del.

WILLIAM P. SLICHTER obtained his Ph.D. in chemical physics at Harvard University in 1950. Since 1950, he has been a member of the technical staff, Bell Telephone Laboratories. His fields of specialty include physical chemistry of semiconductors, structure and motion of polymer molecules, nuclear magnetic resonance spectroscopy, X-ray diffraction, and dielectric relaxation.
