

AUTHOR INDEX

A

- Aborn, R. H.**
The Wrought Austenitic Alloys, 466.
- Allen, R. C.**
Steam Turbine Materials for High Temperatures, 30.
- Allen, R. J.**
Discussion, 459, 463.
- Anderson, H. A.**
Zinc Alloys for High- and Low-Temperature Service, 271.

B

- Bailey, R. W.**
The Trend of Progress in Great Britain on the Engineering Use of Metals at Elevated Temperatures, 218.
Discussion, 243.
- Bain, E. C.**
The Wrought Austenitic Alloys, 466.
- Basil, J. L.**
Discussion, 332.
- Bassett, W. H.**
Discussion, 351.
- Boegehold, A. L.**
Engineering Requirements in the Automotive Industry for Metals Operating at High Temperatures, 169.
Discussion, 199.
- Bolton, J. W.**
Effect of Elevated Temperatures on Certain Mechanical Properties of Gray Cast Iron and Malleable Iron, 436.
Discussion, 361, 463.
- Bornstein, Hyman.**
Effect of Elevated Temperatures on Certain Mechanical Properties of Gray Cast Iron and Malleable Iron, 436.
- Brace, P. H.**
Discussion, 26, 58, 556.
- Brown, R. E.**
Engineering Requirements and Trends for Metals in the Non-Ferrous Roasting, Smelting and Refining Industry, 151.

Brown, R. S.

Discussion, 93, 144.

Bull, R. A.

The Performance of Cast Carbon and Low-Alloy Steels in High- and Low-Temperature Service, 394.
Discussion, 433.

C

Carter, F. E.

Discussion, 628.

Chevenard, Pierre.

The Mechanical Properties of Metals at Elevated Temperatures, 245.
Discussion, 270.

Christie, J. L.

Discussion, 365.

Clark, C. L.

Discussion, 365, 382, 386, 432.

Clark, L. W.

Discussion, 242.

Coffin, F. P.

Discussion, 389.

Crawford, C. A.

Nickel and Nickel Alloys Other than the Nickel-Chromium-Iron Group, 557.

Crocker, Sabin.

Discussion, 61, 719.

D

Darby, E. R.

Properties of Bearing Metals at Normal and Elevated Temperatures, 316.
Discussion, 338.

Davis, A. L.

Discussion, 390.

Dickenson, J. H. S.

The Trend of Progress in Great Britain on the Engineering Use of Metals at
Elevated Temperatures, 218.
Discussion, 243.

Dixon, E. S.

Need of the Oil Industry for Metals at High Temperatures, 66.
Discussion, 98.

Drewry, M. K.

Discussion, 21.

E

Etchells, H.

Discussion, 494.

Everett, F. L.

Discussion, 238.

F**Field, A. J.**

Discussion 198.

Foley, F. B.High-Temperature Creep Properties of Wrought Carbon and Low-Alloy Steels,
368.

Discussion, 390, 392.

French, H. J.

Discussion, 391.

G**Gann, J. A.**

Discussion, 314.

Gillett, H. W.Introduction to Symposium on Effect of Temperature on the Properties of
Metals, 7.**Gordon, C. W.**

Discussion, 23.
