

# Subject Index

## A

AAMA standard 501.2-83: 47  
 Adhesion, silicone sealants, 73  
 Air barriers, 59  
 Air infiltration, 47  
 Alkali-resistant glass fibers, 187  
 Aluminum facades, design, 35  
 Aluminum-framed curtain walls, 5  
 Architectural design  
     Breuer-Beckhard precast facades, 154  
     contextual intervention in, 24  
     exterior wall/structure interrelation, 5  
     glass fiber reinforced concrete, 187  
     precast concrete, 131  
 ASTM standards  
     C 510: 73  
     C 794: 73  
     C 1087: 73  
     E 283: 47  
     E 330: 47  
     E 331: 47  
     E 773: 83  
     E 774: 83  
     E 783: 47

## B

Bonding pads, 187  
 Breuer-Beckhard precast facades, 154  
 Brick facades, design, 24  
 Building codes, requirements for structural sealant glazing, 94

## C

Cali International Financial Center, 154  
 Cast-in-place concrete, 131  
 Caveats, design, 35  
 Cavity walls, 59  
 Cladding  
     glass fiber reinforced concrete, 187  
     precast concrete, 131  
     pressure-equalized rain screen walls, 59

## Color

natural stone, 121  
 precast concrete, 131

## Column covers

glass fiber reinforced concrete, 187  
 precast concrete, 131

## Compatibility, sealants, 73

## Component tests, structural sealant glazing, 94

## Composite wall systems

glass fiber reinforced concrete cladding panels, 187  
 insulated concrete sandwich walls, 170

## Concrete

glass fiber reinforced, 187  
 precast (*See* Precast concrete)  
 sandwich walls, 170

## Contextual intervention, 24

## Cost factors, in stone selection, 121

## Creep, 5

## Curtain walls

aluminum-framed, 5  
 caveats, 35  
 design drawings, 39  
 full-scale performance testing, 47  
 precast concrete panels, 131  
 structural sealant glazing, 83  
 unitized, 5

## D

Department of Housing & Urban Development Headquarters, 154  
 Dow Corning 790 silicone sealant, 73  
 Drawings, design, 39  
 Durability  
     sealants, 73  
     structural sealant glazing, 94  
 Dynamic tests, 47

## E

Eccentric loading, 5  
 EPDM, compatibility, 73

**F**

Fabrication tests, structural sealant glazing, 94

Facades

- aluminum, 5, 24, 35
- Breuer—Beckhard precast, 154
- brick, 24
- glass, 35
- granite, 121
- masonry, 5
- problems with, 35

FC-2 (Founders Court), 24

Fiber composites

- for concrete sandwich walls, 170
- glass fiber reinforced concrete, 187

Field glazing, 94

Field testing

- full-scale, 47
- rain screen walls, 59
- structural sealant glazing, 94

Framing systems

- aluminum, design, 5
- with structural silicone, 83

Franklin Township Technical Center, 154

**G**

Glass, insulating, 83

Glass facades, design, 35

Glass fiber reinforced concrete, 187

Glazing (*See* Structural sealant glazing)

Granite facades, 5, 121

Gravity anchors, 187

**I**

IBM Research Center, 154

Inspections

- curtain walls, 35
- structural sealant glazing, 94
- Insulated concrete sandwich walls, 170

Insulating glass, 83, 94

Interstory differential movement, 5

Isothermal planes analysis, 170

**J**

Joint design, sealant performance, 73

**L**

Laboratory testing, 47

Life expectancy, structural sealant glazing, 94

Load-bearing panels

- glass fiber reinforced concrete, 187
- precast concrete, 131

**M**

Maintenance

- granite facades, 121
- structural sealant glazing, 94

Masonry

- conventional, 5
- rain screen walls, 59

Merck Sharp & Dohme Corporate Headquarters, 154

Mock-up tests, 47, 94

Mullions

- glass fiber reinforced concrete, 187
- precast concrete, 131
- structural sealant glazing, 83

**N**

NAAMM standards

FC-1-76: 47

TM-1-68T: 47

NBC Tower, 24

Neoprene, compatibility, 73

**O**

On-site tests, curtain walls, 47

**P**

Panel size, for stone facades, 121

Panel systems

- exterior wall/structure interrelationship, 5
- glass fiber reinforced concrete, 187
- load-bearing precast concrete, 131

Penetration, air and water, 47

Philip Morris Manufacturing Facility, 154

Poured-in place construction, 170

Precast concrete

- architectural, 131
- Breuer—Beckhard precast facades, 154
- rain screen walls, 59
- sandwich walls, 170

Pressure equalization, 83

Pressure-equalized rain screens, 59

**Q**

Quality assurance, structural sealant glazing, 94

Quarries, investigations of, 121

Quarrying techniques, 121

## R

- Rain penetration
  - pressure-equalized rain screen walls, 59
  - testing, 47
- Rain screen walls, 59
- Reglazing, 94
- Rowes Wharf Project, 24

## S

- Safety, structural sealant glazing, 83
- Sandwich walls
  - insulated concrete, 170
  - tilt-wall panels, 170
- Santoprene, compatibility, 73
- Sealant bite, 73
- Shear walls, precast concrete, 131
- Shop glazing, 94
- Silicone sealants
  - performance, 73
  - structural properties, 73, 94
- Slab size, 121
- Spandrel panels
  - glass fiber reinforced concrete, 187
  - precast concrete, 131
- Static test, 47
- Steel stud frames, 187
- Stone
  - natural, selection of, 121
  - slab sizes, 121
- Strom Thurmond Federal Office Building and U.S. Court House, 154
- Structural design
  - exterior wall/structure interrelationship, 5
  - glass fiber reinforced concrete, 187
  - load testing, 47
  - use of design drawings, 39
- Structural sealant glazing
  - design, safety, and testing, 83

- features and advantages, 94
- history and development, 83, 94
- problems with, 94
- roles of participants in, 94
- silicone adhesives, 73
- Structural spacer glazing, 83
- Sylvan Corporate Center, 154

## T

- Testing
  - full-scale, 47
  - laboratory methods, 47
  - pressure-equalized rain screen walls, 59
  - structural sealant glazing, 83, 94
- Texture, precast concrete, 131
- Thermal bridges, 170
- Thermal expansion/contraction, 5
- Tilt-wall construction, 170
- Torsion
  - exterior wall/structure interrelation, 5
  - precast concrete, 131

## U

- Unitized curtain walls, 5
- Urban buildings, 24

## W

- Wall panels
  - composite systems, 170, 187
  - panelized systems, 5
  - precast concrete, 131
- Wall-supporting units, 131
- Water infiltration, 47
- Weather barriers, 5
- Weather seals, 73
- Window wall panels, 131
- Wind tunnel tests, 94
