

## Subject Index

### A

Adhesion, 5  
 Adhesives, 5  
     thickness, 21  
 Aggregate, 190  
 Air bath, hot, 53  
 Asphalt, 82, 181, 190  
     glass fiber felt coating, 181  
 ASTM standards, 63, 190  
     D 312: 181  
     D 1204: 53  
     D 4637: 37  
 Atmospheric boundary layer, 163  
 Attachment mechanism, 152

### B

Ballasted roofs, 163  
 Ballasting pavers, 163  
 Biaxial load-strain testing, 117  
 Bitumen, 190  
 Built-up roofing, 181, 190, 210  
 Butyl adhesive, 5, 21

### C

Coal tar pitch, 181  
 Cold flow, 181  
 Computer model, for felt  
     porosity, 181  
 Construction Engineering  
     Research Laboratory,  
     U.S. Army, 63  
 Contamination, surface, 21  
 Co-polymer alloy, 53

### D

Differential scanning  
 calorimetry, 37

### E

Elastomer, 82  
     uncured, 53  
 Electricity, 99

Elongation, 210  
 Energy, 99  
 EPDM (See Ethylene propylene  
     diene terpolymer)  
 Ethylene propylene diene  
     terpolymer, 5, 21, 37, 82

### F

Failure strength, 117  
 Felt porosity, 181  
 Field seams, 5  
 Finite element analysis, 138

### G

Glass and polyester reinforced  
     membrane, 210  
 Glass fiber felts, 181

### I

Infiltration, 152  
 Insulation, 82  
 Interply bitumen, 190

### L

Lap seam, 5  
 Load-elongation tests, 37  
 Loading tests  
     biaxial test, 117  
 Load-strain testing, 117, 210  
 Loose-laid roof parts, 163

### M

Mechanical analysis, dynamic, 37  
 Microzone effects, 163

### N

National Roofing Contractors  
     Association, 190  
 Neoprene adhesive, 5

## O

Open time, 21

## P

Peel test, 21

Performance

built-up, 190

load-strain testing, 117, 210

long-term, 63, 82

stability, linear dimensional, 53

wind, 138, 152, 163

Photovoltaic, 99

Pitch, 190

coal-tar, 181

Polyester, 210

Polymers, 53

Polyvinyl chloride, 63, 82

Porosity, 181

## R

Reinforcement, 138

## S

Seams, 21, 63

strength, 5

Single-ply roofing, 5, 21, 37

ballasted, 163

ethylene propylene diene

monomer, 82

finite element analysis, 138

photovoltaic, 99

polyvinyl chloride, 63, 82

wind dynamics, 152

Stability, linear dimensional, 53

D 1204: 53

Strain, 117, 138, 210

Strain energy density, 210

Strength development, seam, 5

Strength, failure, 117

Stress, 138

biaxial, 117

## T

Thermal analysis, 37

Thermoplastic, 53

Thermoset, 53

Top coating, 190

T-peel test, 5

Transient response factor, 152

## U

U.S. Army Construction

Engineering Research

Laboratory, 63

## W

Warranty claims, 82

Watertight integrity, 210

Wind loads, 152, 163

Wind test assemblies, 138
