

Subject Index

A

Absorbed energy, 3, 32, 101, 111
 striker effect on, 140, 153
 Acceptance limits, 181
 Anvil, 91
 ASTM standards
 A 302B: 70
 A 533: 245
 A 533B: 70, 111
 E 23: 19, 39, 70, 91, 101

C

Calibration specimens, 32
 Certification, machine, 181
 Charpy testing machines
 certification for, 181
 compliance, 231
 Japanese standards for, 170
 verification, 194, 267
 Charpy V-notch specimens, 3, 101
 impact energy, 19, 194
 Japanese standards for, 170
 lower bound toughness, 245
 miniaturized, 39
 neutron damage monitoring
 with, 39
 notch location, 153
 reconstituted, 70
 reference specimens, 181,
 194
 striker, 111, 231
 striker radii, 140
 subsize, 32
 surface finish, 91
 velocities, 220
 Crack initiation, 245

D

Damping absorbers, load, 231
 Damping, viscous, 267
 Deformation analysis, large, 39
 Density, 220

Drop-weight testing machines, 267
 Ductile-brittle transition
 temperature, 39

E

Elastic-plastic analysis, 39
 Electronic frequency response, 282
 Energy levels, references for, 170
 European Structural Integrity
 Society, 111

F

Finite element analysis, 39
 Force measurement, 267
 Forging, 111
 Fourier analysis, 267
 Fracture behavior, transitional,
 39
 French standards, 194
 Friction, 91

I

Impact, controlled, experiments,
 267
 Impact energy, 19, 194

J

Jamming after fracture, 19
 Japanese standards, 170

K

Kinetic energy, 220, 282

L

Lateral expansion, 111, 153
 Load cells, 267
 Load/displacement data, 231
 Loading, asymmetry of, 3
 Load traces, 282
 Lower bound toughness, 245

M

Mechanical damping, 231
 Metals, 3, 32, 70
 Charpy V-notch squareness
 tolerance, 19
 A 302B: 70
 A 533: 245
 A 533B: 70, 111
 E 23: 19, 39, 70, 91, 101
 Modeling, Charpy shift trend
 curve, 39

N

National Institute of Standards
 and Technology, 111, 181
 National Testing Laboratory, 194
 Neutron damage monitoring, 39
 Nuclear reactor, 39, 70
 Nylon alloy, 267

P

Polymeric specimens, 282
 Pressure vessel, 39, 70, 111
 Projection welding, 91

R

Reconstitution, 70
 Reference specimens, 19, 111,
 140, 181, 194
 Restitution, coefficient of, 220

S

Shear lips, 3
 Spinning, specimen, 19
 Squareness tolerance, 19

Standards (See also ASTM standards)
 EN 10045-2, 194
 ISO DIS 442, 194
 ISO TC, 140
 Japanese, 170
 National Institute of Standards
 and Technology, 111, 181
 Steel, 32, 70
 high strength, 3
 Stress intensity, 245
 Stress waves, 267
 Strike marks, 3
 Striker, 91, 101, 111
 edge, 153
 radius, 140
 striker geometry, 101
 tups, 282
 Surface finish, 91
 Symmetry effects, 153

T

Three-dimensional analysis, 39
 Three-point bend test, 231
 T-test, 19
 Toughness, 70, 245
 Tup, instrumented, 245
 Tup, striker, 282
 Tup, verifier, 267
 Two-dimensional analysis, 30

U

Upper shelf energy, 39, 70
 Upper shelf submerged arc weld,
 111

V

Velocity, 220

W

Weld, 111
 Welding, projection, 70, 91
