Foreword

The symposium on Power Plant Instrumentation for Measurement of High-Purity Water Quality was held on 9–10 June 1980 in Milwaukee, Wis. The event was sponsored by the American Society for Testing and Materials, through its Committee D-19 on Water, and was also cosponsored by the American Society of Mechanical Engineers. Gerard Otten of Puricons, Inc., and R. W. Lane of the Illinois State Water Survey presided as chairmen of the symposium and also served as editors of this publication.

A Note of Appreciation to Reviewers

This publication is made possible by the authors and, also, the unheralded efforts of the reviewers—this body of technical experts whose dedication, sacrifice of time and effort, and collective wisdom in reviewing the papers must be acknowledged. The quality level of ASTM publications is a direct function of their respected opinions. On behalf of ASTM we acknowledge with appreciation their contribution.
