## FOREWORD

---

The Symposium on Timber—A Tested Material for the Engineer—was presented on October 2 and 3, 1962, during the Fourth Pacific Area National Meeting of the Society, held at Los Angeles, Calif. The symposium consisted of three sessions with a total of eleven papers and discussions.

Ben Benioff, King, Benioff and Associates, served as symposium chairman; the session chairmen were Don Jephcott, California State Division of Architecture; F. J. Hanrahan, American Institute of Timber Construction; and L. N. Erickson, U. S. Forest Service.

---

NOTE.—The Society is not responsible, as a body, for the statements  
and opinions advanced in this publication.

---

## CONTENTS

---

	PAGE
Introduction—Ben Benioff.....	1
Stress-Grading Method for Dimension Lumber—H. B. McKean and R. J. Hoyle..	3
Discussion .....	18
“Stress-O-Matic” Stress-Rating System—R. J. Bolger and C. A. Rasmussen.....	19
Plywood as an Engineering Material—D. Countryman.....	28
Discussion .....	37
Quality Control and Inspection of Laminated Timber Construction—T. E. Brassell.	38
Discussion .....	43
Cylindrical Shear Specimen for Test on Glue Bonds in Laminated Timbers—M. L. Selbo.....	45
Quality Control for Lumber Products—E. M. Williston.....	55
Research for Better Timber Railroad Bridges—E. J. Ruble and F. P. Drew.....	62
Review of Studies of the Plastic Bending of Wood Beams—C. B. Norris.....	76
Test for Quality of Glue Bonds in End-Jointed Lumber—M. L. Selbo.....	78
Discussion .....	86
Present Status of Results-Type Specifications for Treated Woods—R. H. Baechler..	87
Discussion .....	96
Physical Tests and Statistics for Improved Lumber Stress Grading—J. F. Senft, S. K. Suddarth, and H. D. Angleton.....	97
Discussion .....	103

THIS PUBLICATION is one of many issued by the American Society for Testing and Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Much of the data result from the voluntary contributions of many of the country's leading technical authorities from industry, scientific agencies, and government.

Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the ASTM technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of ASTM publications and information on the work of the Society will be furnished on request.
