

## Subject Index

### A

Accelerations, earthquake, 22  
 Ash  
   disposal, 71, 168, 185  
   residue, 285  
   waste, 86  
 Asphalt emulsion cover, 331

### B

Barkfill, 86  
 Bearing capacity, 240  
 Bishop's method, modified, 285  
 Boiler slag, 71, 123  
 Borings, vertical, 358  
 Bottom ash, 71

### C

Cement stabilization, 142  
 Clay, 107, 185  
 Closure, landfill, 9, 41  
 Coal recovery, 142  
 Cohesion intercept, 123  
 Colliery discard, 142  
 Compaction, 41, 71, 107, 123, 317  
 Compression, 71, 163, 185, 225  
 Conductivity, 31  
 Cone penetration testing, 259, 345  
 Consolidation, 163, 345  
 Construction, on closed  
   landfills, 41, 331

### D

Decomposition, effect on shear  
   strength, 86  
 Deformation, 358  
   analysis, 240, 303  
   consolidation, 345  
 Density, 317  
   relative, 123  
 Desulfurization sludge, 168  
 Down-Hole test, 59

### E

Earthquake performance, 22,  
   240, 259, 303, 358  
 Elastic moduli, 59  
 Electromagnetic data  
   interpretation, 31  
 Embankment material, 71

### F

Field measurements, 185, 317, 345  
   compaction test, 123  
   compressibility, 163  
   deformation, 303, 358  
   dynamic moduli, 59  
   permeability, 331  
   Poisson's ratio, 59  
   slope stability, 259  
   soil stiffness, 107  
   stratigraphic mapping, 31  
 Fill characteristics, 86  
 Floor slab, adjustable, 41  
 Flue gas desulfurization sludge,  
   168  
 Fly ash, 168, 185  
 Foundations, deep, 41  
 Friction angle, 123, 285

### G

Geogrids, 285

### H

Hazardous waste repository, 209

### I

Immobilization, 185  
 Impact test, 107

### J

Janbu method, simplified, 285

**K**

Kettleman Hills, 209

**L**

Laboratory extraction, 71

Landfills

- closure, 9, 41
- colliery waste, 142
- deformation, 303
- design, 9
- dynamic moduli of, 59
- earthquake performance, 22
- embankment material, 71
- fill geotechnics, 86
- maintenance, 9
- management, 9
- model, settlement, 225
- monitoring program, 317
- paleokarstic feature
  - locations, 31
- Poisson's ratio of, 59
- reclamation for commercial
  - use, 41, 331
- site, 41
- statigraphic mapping, 31
- subsurface sand channel
  - delineation, 31

Leachates, 71, 185, 285

Leaching tests, 71, 185

Least squares regression, 31

Lift thickness, 123

Lime

- fixed fly ash, 168
- fly ash pozzolan, 185

Liners, 209, 285, 303

Loading

- dynamic, 240
- overburden, 345
- seismic, 22, 240, 259, 303, 358
- static, 240, 259, 303
- test, 107

Loma Prieta earthquake, 22

**M**Management, landfill,

- postclosure, 9

Mapping, stratigraphic, 31

Marine container facility, 331

Mercalli intensity, modified, 22

Microencapsulation, 185

Mine spoils, 142, 163

Model, settlement, 225

Mohr-Coulomb theory, 240

Moisture content, mine tailings,

- 142

Monitoring program, 317

Multivariate least-squares

- regression, 31

Municipal waste, 9, 59, 225, 259

**O**Operating Industries, Inc. (OII),

- 259

**P**

Penetrometer test, cone, 345

Permeability, 71, 168, 331

Poisson's ratio, 59

Polyethylene, high density, liner,

- 285

Pozzolans, 185

Preloading, 163

Pressure meter test, 163

**R**

Rate of compression, 225

Reclamation, landfill, for

- commercial use, 41, 331

Roller pass, 123

Roller, vibratory, 123

**S**

Sand, 107

Secondary compression, 225

Seismic response, 22, 240, 259,

- 303, 358

Seismic stability, 22

Settlement, landfill, 41, 86, 163,

- 240, 317, 331

- elastic, 345

- model, 225

- postclosure, 9

- slope, 358

- time rate of, 345

Shear moduli, 59

Shear strength, 71, 86, 240, 259

Shear strength, interface, 209

Slag, 71, 123  
 Sledge hammer, stiffness test, 107  
 Slope  
     failure, 209  
     grades, 285  
     movement, 259, 358  
     stability, 86  
 Sludge, 86, 185, 317  
     Desulfurization, 168  
 Soil dynamic, 107  
 Soil mechanics, 317  
 Soil stiffness, 107  
 Specific gravity, 123  
 Stability, 86, 209, 240, 259, 358  
     analysis, 303  
     structural, 285  
 Stabilization, 142, 185  
     chemical, 345  
 Stiffness, soil, 107  
 Strain rates, 358  
 Stratigraphic mapping, 31

Strength parameters, 303, 331  
 Strength properties, 168, 185  
     dynamic, 240  
 Strength, shear, 71, 86, 240, 259  
 Structures on landfills, 41, 331  
 Surface geophysics, 31

## T

Tailings disposal, 142

## V

Vibratory roller, 123

## W

Washing colliery waste, 142  
 Waste classification system, 317  
 Wood wastes, 86
