

Subject Index

A

Aging factors, 269
 Aging management
 Charpy specimens, 209
 reactor pressure vessel surveillance
 data, 87
 Annealing, 321, 344, 369, 380
 Annealing recovery, 172
 ASTM A533B.C1.1, 163
 ASTM A508.C13., 163

B

Barkhausen noise measurement, 209
 Brittle-to-ductile transition temperature
 shift, 389

C

Capsule irradiation, 139
 Capsules, 118
 Charpy impact energy, 163
 Charpy shift, 99
 Charpy specimen, 118, 209
 Charpy tests, 227, 249, 252–254(tables),
 283
 Charpy V-notch, 79, 172, 175(table),
 183, 197
 Charpy V-notch irradiation and
 annealing behavior, 344,
 353(table), 369
 Charpy V transition temperatures, 321
 Chemical analysis, 380
 CHOOZ A surveillance program, 132
 Compact fracture specimens, 118
 Copper, 9, 172, 218, 283
 annealing, 369
 neutron irradiation, 300
 Crack-arrest test, 227

D

Design, 87, 89–90(tables), 99
 Dosimetry, 118, 139
 Drop in upper shelf, 99
 Ductile fracture behavior, 238

Ductile-to-brittle transition
 temperature, 369
 Dynamic fracture toughness, 172
 Dynamic strain aging, 227
 Dynamic toughness, 227

E

Embrittlement
 Finland, 238
 Germany, 344
 Hungary, 49
 Paks nuclear power plant, 49
 Slovenia, Republic of, 71
 Spain, 39
 United States, 30
 Evaluation, 300

F

Ferritic steels, 300
 Fluence, 218, 311
 Forging material, 238
 Forgings, 249
 Fractography, 183
 Fracture mechanics methodology, 238
 Fracture toughness, 163, 172, 183, 283
 Fracture toughness specimens, 238,
 239–240(tables), 243–244(tables)

H

Hardness, 49, 183
 radiation and annealing behavior,
 344, 353(table), 380

I

Impact strength, 183
 Impact test, 249
 Instrumented impact testing, 183
 Intergranular rupture, 249
 Internal friction, 269
 International Atomic Energy Agency
 (IAEA), 238
 Irradiated half charpy specimens, 209

Irradiation damage, 132, 139, 151–154(tables), 172
 Irradiation degradation database, 147
 Irradiation effects, 321
 Irradiation embrittlement, 369
 See also Radiation embrittlement, Embrittlement
 Irradiation induced defects, 269
 Irradiation programs, 202(table), 227
 Impact test, 49

K

Krško nuclear power plant, 71

L

Lead factor, 57
 Licensability, 118
 Life attainment, 87, 311
 Light water reactors, 39, 139
 Low-alloy manganese-nickel-molybdenum (Mn-Ni-Mo) ferritic steels, 132, 249
 Low alloy multipass weld metal, 183
 Low alloy steels, 248
 Low leakage loading, 71
 Low-sensitivity steel, 71

M

Management, 311
 Master Integrated Reactor Vessel Surveillance Program (MIRVP), 118
 Materials irradiation, 118
 Mechanical properties, 227, 269, 300, 344, 350(table)
 Mechanisms, 9
 Mechanistic modeling, 99
 Microstructure, 99, 183, 269, 300
 MIRVP. *See* Master Integrated Reactor Vessel Surveillance Program
 Mixed oxides (MOX), 311

N

Natural clean raw materials, 218
 Neutron damage, 132, 172
 Neutron dosimetry, 71, 139
 Neutron embrittlement, 30, 71, 283, 389
 Neutron fluence, 9, 71, 139, 227
 Neutron fluence management, 311

Neutron irradiation
 embrittlement results, 249
 interactions of defects, 269
 irradiation and annealing behavior, 344
 mechanical and nondestructive testing, 209, 300
 pressure vessel steel, 163, 172
 irradiation response, 238
 Nickel, 218
 Nondestructive testing, 209
 Nonstationary thermal and stress fields, 389
 Notched bar impact test, 321
 Notched tension specimen, 209
 Nuclear power plant safety
 Slovenia, Republic of, 71
 Spain, 39
 United States, 9

O

Orientation, 197

P

Paks nuclear power plant
 surveillance results, 49
 Phosphorus, 9, 172, 218, 283, 369
 Plant life extension, 30
 Positron annihilation, 132
 Power reactors, 71
 Pressure-temperature limit curves, 389
 Pressure vessels
 CHOOZ A Reactor surveillance program, 132
 for use in pressurized water reactor, 30
 Pressure vessel steels
 defects with dislocations, 269
 irradiation and annealing behavior, 344
 neutron damage, 132
 neutron irradiation, 300
 phosphorus influence, 283
 radiation stability, 9, 172, 227
 surveillance, 57, 79
 Pressurized thermal shock, 30
 Pressurized water reactors
 embrittlement, 30
 surveillance management, 87, 147
 thermal and stress fields, 489
 PWR. *See* Pressurized water reactors

Q

Quality assurance programs, 57

R

Radiation effects, 9, 39, 172

Radiation embrittlement

Finland, 238

International Atomic Energy Agency, 249

Japan, 163, 283

management of surveillance program, 87

modeling for reactor vessel steels, 99

neutron irradiation—influence of, 300

phosphorous effect, 283

Surveillance testing, 209

T

Tearing resistance, 311
 Temper embrittlement, 283
 Temperature, 311
 Temperature shift, 389
 Tensile, 283
 Tension tests, 118, 227, 344
 Thermal annealing effects, 209
 Thermal fields, 389
 Thermal shock, 30
 Torsional deformation, 269
 Transition electron microscopy, 132
 Transition temperature
 base metal, 197
 Charpy V, 321
 fracture properties, 163
 increase, 227
 irradiation and annealing behavior,
 344, 369, 380
 Italy, 227
 Paks nuclear power plant, 49
 radiation embrittlement results, 249
 shifts, 234(table), 238, 269, 389
 Soviet pressure vessel steel, 218
 surveillance, 57, 90–92(tables), 147
 Trend curve, 99, 147

U

UO₂, 311

Upper shelf energy, 197

V

Variance-covariance matrices, 389
 Vessel design
 ability to withstand stresses, 30
 Vickers hardness number, 172

W

Weld metal
 impact strength and toughness, A533
 grade B, 183
 surveillance, mechanical properties,
 334(table)
 Welds, 344
 WWER-440 reactor vessels
 irradiation effects, 321
 materials, 9
 chemical composition, 12(table)
 type 15Ch2MFA steel, 147
 WWER-440/Č reactor pressure vessels,
 57

Y

Yield stress, 172, 344
