Foreword

This symposium was held during the Sixty-eighth Annual Meeting of ASTM at Purdue University on June 14, 1965, and was sponsored by Committee E-3 on Chemical Analysis of Metals under the chairmanship of Arba Thomas, and by Division G of Committee E-3, chaired by L. M. Melnick. The symposium was intended to stimulate more interest in a field which, in recent years, has received increased attention. The symposium papers were selected to be of a tutorial and review nature with invited papers from outstanding workers in the field, as well as to report on new methods and the practical applications of existing methods in the laboratory.

Contents

Introduction—M. K. WEISS.....	1
The Isolation, Separation, and Identification of Microconstituents in Steels—K. W. ANDREWS AND H. HUGHES.....	3
Application of Differential Thermal Analysis-Effluent Gas Analysis to the Determination of Nonmetallic Compounds in Steel—W. R. BANDI, W. A. STRAUB, H. S. KARP, AND L. M. MELNICK..	22
Identification of Inclusions with the Electron Probe Microanalyzer—K. F. J. HEINRICH.....	39
Studies on the Determination of Stable Oxides in Low-Alloy Steels Using a Combination of Chemical Separations—J. P. MCKAVENEY, W. J. RABER, G. L. VASSILAROS, AND J. M. SNOOK.....	47
Isolation of Oxide Inclusions from Carbon Steels Using Bromine-Methyl Acetate—R. M. RAYBECK AND L. C. PASZTOR.....	75
Panel Discussion.....	87

THIS PUBLICATION is one of many issued by the American Society for Testing and Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Much of the data result from the voluntary contributions of many of the country's leading technical authorities from industry, scientific agencies, and government.

Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the ASTM technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of ASTM publications and information on the work of the Society will be furnished on request.
