

Cumulative Index

The Roman numerals printed in boldface type refer to the particular symposium in this series of solid waste testing symposia. The first symposium (**I**) is reported in *ASTM STP 760*,¹ the second (**II**) in *STP 805*,² and the third (**III**) in *STP 851*.³

Subject Index

A

Acid precipitation, **III** 61-63
 Adsorption, **II** 111-126, 173, 237-240, 265-282; **III** 186-188
 Air testing (*see* Gases)
 Algal culturing, **III** 230-247
 Aluminum anodizing waste, **II** 89-107
 American Foundrymen's Society leaching test (*see* Foundry wastes; Batch leaching)
 Analysis (*see also* Organic constituents)
 Atomic absorption spectroscopy (AA), **I** 44, 63, 86, 152, 171, 225-266; **II** 69, 73, 92, 129, 222-224, 240; **III** 64
 Basic considerations, **I** 23-24; **II** 183
 Fish flesh, **I** 327; **III** 11-23
 Gas chromatography (GC) and gas chromatography/mass spectrometry (GC/MS), **I** 217-224, 240-248; **II** 11-13, 40-48, 115, 145, 181-192, 209, 271; **III** 29-30

Analysis *cont.*

Gases, **II** 115; **III** 29-30, 157
 High-pressure liquid chromatography (HPLC), **II** 11-13
 Inductively coupled plasma spectroscopy (ICP), **I** 44, 225-266; **II** 129
 Ion chromatography, **I** 171
 Neutron activation, **I** 171; **II** 69, 73
 Oil, **III** 156-157
 Organic carbon, **II** 145
 Screening analysis, **I** 240-266; **III** 42-47
 Selective ion electrodes, **III** 64
 Semivolatile organics, **I** 44, 240-266, 323-327; **II** 203-213
 Separation and extraction, **I** 45, 63, 243-248; **II** 11, 184, 196-198, 205-207; **III** 92-99
 Thin-layer chromatography, **II** 11
 Volatile organics, **I** 44, 217-224, 242-243, 323; **II** 39-41, 193-202; **III** 43
 Wet chemical tests, **I** 63, 171, 310; **II** 159

¹*Hazardous Solid Waste Testing: First Conference, ASTM STP 760*, R. A. Conway and B. C. Malloy, Eds., American Society for Testing and Materials, Philadelphia, 1981.

²*Hazardous and Industrial Solid Waste Testing: Second Symposium. ASTM STP 805*, R. A. Conway and W. P. Gullledge, Eds., American Society for Testing and Materials, Philadelphia, 1983.

³*Hazardous and Industrial Waste Management and Testing: Third Symposium*, L. P. Jackson, A. R. Rohlik, and R. A. Conway, Eds., American Society for Testing and Materials, Philadelphia, 1984.

Analysis cont.

- X-ray fluorescence (XRF), **I** 153; **II** 215-218
- Aquatic organisms (*see also* Bioassay), **III** 5-23
- Arsenic (*see also* Heavy metals), **III** 54-55
- Atrazine, **II** 111-126
- Attenuation (*see also* Adsorption), **I** 139-149, 337-341, 360-362; **II** 111-126, 152-167, 241, 261-282; **III** 185-191
- Atterberg limits (*see* Geotechnical testing)

B

- Bacterial counting, **II** 115
- Baghouse dust, **I** 42-60, 251-263; **II** 53-66, 127-140
- Batch leaching
 - American Nuclear Society test, **III** 48-60
 - ASTM tests, **I** 13-19, 28-39, 44, 63-69, 84-86, 112-135, 151-163, 186-200, 333; **II** 53-88, 141-151, 269
 - Basic considerations, **I** 22-23
 - Butyrate, **I** 46
 - Canadian data base, **II** 53-66
 - Carbonic acid, **I** 17-18; **II** 127-140
 - Citrate, **I** 45; **II** 141-151; **III** 218
 - Contact conditions, **I** 8-14, 23, 69-72, 84-135
 - Diffusivity model, **III** 48-60
 - Early tests, **I** 17-19
 - Elutriation (washing), **I** 186-200
 - Environment Canada procedures, **II** 53-66, 128; **III** 57-60
 - EPA test, **I** 13-19, 29-39, 44, 63-69, 139-163, 201-214, 332-339, 354-355; **II** 53-107, 127-151, 225; **III** 324
 - Extractant ratio, **I** 22, 84-98, 112-135, 340; **II** 53-56
 - Extractant renewal, **III** 48-60
 - Foundrymen's test, **I** 9, 201-214; **II** 53-88, 136
 - Illinois test, **I** 10-11
 - IU Conversion Systems test, **I** 10-12
 - Japanese test, **I** 8
 - Method comparison, **I** 7-19, 28-39, 41-60, 63-69, 83-98; **II** 53-88, 127-151
 - Minnesota test, **I** 10-12, 28-39
 - Multiple waste addition, **I** 170

Batch leaching cont.

- Organic extractants, **I** 240-266; **II** 11, 197, 203-213; **III** 92-99
- Purposes, **I** 19-20; **II** 111-112, 139, 142
- Redox, **I** 72-74, 337-339
- Serial extraction, **I** 9, 23, 74-80, 99-111; **II** 127-140; **III** 48-60
- Site soil, **I** 99-111; **II** 10-11; **III** 92-99
- Site specific, **I** 331-344
- Sodium ion exchange resin, **II** 141-151
- Storage effects, **II** 89-107
- Surfactant, **I** 46
- Synthetic landfill leachate, **II** 53-66
- U.S. Army Corps of Engineers test, **I** 333-335
- Wisconsin test, **I** 11-15, 169-170
- Benzene, **III** 32-33
- Bioassay, **I** 327, 358-362; **II** 299-320; **III** 11-23
- Bioconcentration (*see* Concentration factor)
- Biodegradation, **II** 111-140; **III** 135-151
- Biogas, **III** 248-277
- Biological sampling, **III** 5-23
- Biological sludge, **I** 29-38, 42-60, 244-249, 251-263; **II** 141-151, 199, 209; **III** 391-392
- Boiler ash, **I** 17, 29-38, 61-98, 99-111, 164-185, 225-239; **II** 24-37, 53-66, 220; **III** 100-117
- Bottom ash (*see* Boiler ash)

C

- Cadmium (*see also* Heavy metals), **III** 118-132
- Canadian leaching data base, **II** 53-66
- Cations
 - Exchange capacity (CEC), **II** 52-67, 235
 - Mobility, **III** 81-91
- Cementation (*see* Fixed wastes)
- CERCLA (Superfund), **II** 1, 7
- Chemical plant wastes, **I** 42-60, 220-224, 251-263; **II** 136, 141-151, 184, 193-202, 199, 209; **III** 92-99, 299-300
- Chemsorption, **II** 174
- Chlorine production brine waste, **I** 139-150; **III** 302
- Chromium waste (*see also* Heavy metals; Metal finishing waste), **III** 61-80, 171-192, 278-288

Closure, **II** 283-295
 Coal, **II** 24-37
 Coal conversion wastes, **II** 141-151
 Codisposal industrial and municipal wastes, **I** 10-14, 139-150, 187, 339; **II** 111-140; **III** 152-170, 193-212
 Coke plant sludge (*see* Biological sludge)
 Column leaching
 Analytical, **II** 220-221
 Application rate, **I** 85
 Codisposal, **I** 139-150; **II** 111-126; **III** 153-165, 193-212
 Comparison with batch, **I** 83-98, 139-150, 164-185; **II** 127-151
 Concentration histogram, **II** 240-244
 Early studies, **I** 8
 Fixed wastes, **III** 101-102, 215-218
 Large-scale, **I** 139-150; **III** 193-211
 Ontario column leach test, **II** 127-140
 Penetration theory, **II** 127-140
 Recirculation, **III** 62-64
 Simulated landfill, **II** 111-126
 Unsaturated flow, **II** 127-140
 Concentration factor, **II** 276-278, 318-319; **III** 5-23
 Corrosivity, **I** 352-353
 Cyanide, **II** 53-66
 Cyclohexanone, **II** 41-49

D

Damage, **III** 334-345
 Delisting, **I** 345-365
 Diadochy (elemental substitution), **II** 75
 Diffusivity, **III** 48-60
 Digestion, **III** 248-277
 Dredge spoil, **I** 8-9, 333-335
 Dyes, **III** 297-298

E

Earthworms, **II** 313-320
 Effective cation exchange capacity (ECEC) (*see* Cations, exchange capacity)
 Egyptian practices, **III** 305-319
 Electroplating waste (*see* Metal finishing waste)
 Encapsulation (*see also* Fixed wastes), **II** 170-172

EPA toxicant extraction procedure (EP) (*see* Batch leaching)
 Equivalent facility performance, **I** 347-350
 Equivalent testing methods, **I** 347-350
 European practices, **III** 373-393
 Explosives waste, **I** 305-320
 Extraction (*see also* Batch leaching; Column leaching), **II** 11, 197, 203-213; **III** 48-60, 92-99
 Extraction procedure (EP) (*see* Batch leaching)

F

Fabrics, **II** 283-295
 Fate, **I** 341, 361-362; **II** 111-126; **III** 81-91
 Fatty acids, **II** 115-116
 Fertilizer wastes, **III** 294-295, 299
 Field and large-scale studies (*see also* Sampling and preservation)
 Aquatic organisms, **III** 5-23
 Chemical waste, **I** 321-327
 Closure, **II** 283-295
 Codisposal, **I** 139-150
 Dredging waste, **I** 373
 Explosives waste, **I** 305-320
 Fly ash, **I** 164-185
 Foundry waste, **I** 201-214
 Gases, **III** 24-41
 Groundwater flow, **I** 294-298, 307-309; **III** 177-185
 Linings, **I** 290
 Metal finishing waste, **I** 195-199, 305-320
 Mining waste, **I** 201-214
 Oily waste, **III** 135-170
 Pulp and paper waste, **I** 151-163
 Steel mill waste, **III** 171-192
 Wood preserving waste, **II** 7-23
 Fish testing (*see* Bioassay)
 Fixed wastes, **I** 9; **II** 53-66, 135-136, 168-177, 220; **III** 48-60, 100-117, 213-229, 328-329
 Fly ash (*see* Boiler ash)
 Food processing waste, **I** 244-263; **III** 230-259; 316-317
 Foundry wastes (*see also* Slags), **I** 9, 203; **II** 53-88, 136

G

- Gases, **I** 327; **III** 24-41
 Geochemical testing, **I** 293-304, 309; **II** 235-264, 269; **III** 185-191, 324
 Geotechnical testing, **I** 167, 293-304, 307-309, 311-313; **II** 233-282, 285-287; **III** 173-185
 Geotextiles (*see* Fabrics)
 Glass etching waste, **I** 139-150
 Groundwater (*see* Sampling and preservation; Field and large-scale studies)

H

- Halogenated compounds (*see also* Polychlorinated biphenyls; Pesticides), **I** 250-255; **II** 188-191, 265-282
 Hazard assessment, **I** 24-25, 112-135, 202-203, 340-344, 345-365; **II** 111-112, 139, 142, 308-311, 319; **III** 322
 Heavy metals (*see also* Analysis)
 Analysis, **I** 225-237, 248-249; **II** 225-237, 248-249
 Attenuation and retardation, **II** 231-245; **III** 185-212, 213-229
 Gaseous, **III** 30
 Leachability, **I** 32-38, 43-60, 63-81, 86-214; **II** 53-107, 127-140, 214-228; **III** 54-57, 105-117
 Sediments and sludges, **I** 313-314; **II** 287
 Toxicity, **II** 313-320
 Hydraulic conductivity (*see* Geotechnical Testing)
 Hydrogeology (*see* Field and large-scale studies; Geotechnical testing; Sampling and preservation)

I

- Ignitability, **I** 350-352
 Illinois Environmental Protection Agency leaching test, **I** 10-11
 Immobilization (*see* Fixed wastes)
 Impoundment, **II** 231; **III** 329-330
 Incinerator ash, **I** 29-38
 Indian practices, **III** 291-304
 Ink pigment waste, **I** 42-60, 251-263
 Interpretation of results (*see* Hazard assessment)

- Interstitial water quality, **I** 151-163, 167-169; **II** 111-126; **III** 197-206
 Iron waste (*see* Steel mill wastes)
 IU Conversion Systems leaching test, **I** 10-12

L

- Land treatment, **III** 135-151
 Leaching (*see* Batch leaching; Column leaching)
 Lime slurry treatment sludge, **I** 244-263
 Lindane, **II** 111-126
 Liner testing, **I** 341, 350; **III** 325-326
 Clay and soil, **I** 269-292; **II** 231-282
 Synthetic, **I** 269-292
 Listing of hazardous wastes, **I** 355-358
 Lysimeters (*see also* Column leaching), **I** 153; **III** 188

M

- MCPA pesticide, **II** 111-126
 Metal finishing waste, **I** 139-154, 186-200, 251-263, 305-320; **II** 53-66, 89-107, 135; **III** 213-229, 278-288
 Metals (*see* Heavy metals; Metal finishing waste)
 Methanethiol, **III** 35
 Methylethylketone (MEK), **II** 41-49
 Methylisobutylketone (MIK), **II** 41-49
 Microcosms and mesocosms, **II** 310
 Migration (*see also* Fate), **II** 111-126, 152-167
 Mining waste, **I** 199-214; **II** 53-66, 127-140, 231-245
 Minnesota Pollution Control Agency leaching test, **I** 10-12, 28-39
 Models
 Diffusivity, **III** 49-52
 Migration, **III** 81-85
 Soil loading, **III** 126
 Municipal waste (*see also* Codisposal), **I** 275-277; **II** 220; **III** 118, 193-212, 260-277

N

- National programs
 Egypt, **III** 305-319
 Europe, **III** 373-393

National programs *cont.*

- India, **III** 291-304
- Thailand, **III** 346-360
- United States of America, **III** 321-345

O

Octanol-water partitioning (*see* Concentration factor)

Odors, **III** 24-41

Oily waste, **I** 17, 220-224; **II** 53-66, 137, 184, 193-202, 209; **III** 135-170

Organic constituents (*see also* Analysis)

Cleanup, **I** 243-248; **II** 184, 196-198, 207

Extraction (rapid), **III** 92-99

Gaseous, **III** 24-41

Leachability, **I** 43-59; **II** 111-126, 141-151

Resin adsorption, **II** 145

Semivolatiles, **I** 44, 240-266, 323-327; **II** 203-213

Soil, **II** 7-23; **III** 92-99

Surrogate screening, **I** 217-224

Volatiles, **I** 44, 217-224, 242-266, 323; **II** 39-41, 193-202

Organic still bottoms (*see* Chemical plant wastes)

P

Paint pigment sludge, **I** 251-263; **III** 298-299

Partition (*see* Attenuation)

Passivation, **II** 174-175

Permeability and permeameters (*see* Geotechnical testing)

Pesticide wastes, **II** 111-126, 210, 276; **III** 296-297

Petroleum wastes (*see* Oily waste)

Pharmaceutical waste, **I** 42-60; **II** 141-151

Phenolics, **II** 8-22, 137, 210

Phosphorous production waste, **II** 53-66; **III** 294-295

Piezometer (*see* Sampling and preservation; Geotechnical testing)

Pigment (*see* Paint pigment sludges)

Pirimiphos-methyl, **II** 111-126

Plant uptake, **III** 118-132, 135-151

Plastics wastes (*see* Chemical plant wastes)

Plating waste (*see* Metal finishing waste)

Polychlorinated biphenyls (PCBs), **II** 53-66, 185-188, 267; **III** 12-23

Polynuclear aromatics (PNAs), **II** 8-22

Poly(vinyl chloride) pipe, **II** 38-50

Precipitation, **II** 175-176

Pulp and paper waste, **I** 151-163; **II** 141-151

Purposes of testing, **I** 1, 20-21; **III** 42-43

Q

Quality assurance, **I** 23-24, 113-116; **II** 12-16, 35-36, 68, 165, 223-224

R

Reactivity, **I** 353-354

Recovery (*see* Waste utilization)

Refinery sludge (*see* Oily waste)

Reprecipitation (*see* Precipitation)

Research needs, **II** 1, 3; **III** 321-333

Resource Conservation and Recovery Act, **I** 1, 41, 187, 240-241, 295, 305, 332, 342-343, 345-365; **II** 1; **III** 320-332

Resource recovery (*see* Waste utilization)

Retardation (*see* Attenuation)

Risk analysis (*see* Hazard assessment)

Rule-making changes, **I** 345-365

S

Sampling and preservation

Air (*see* Gases)

Aquatic organisms, **III** 10-12

Backhoe, **I** 204

Basic considerations, **I** 21-22; **II** 8-9

Bottom ash, **II** 24-37

Coal, **II** 24-37

Fly ash, **II** 24-37

Gases, **I** 327; **III** 24-28

Groundwater, **II** 38-50

Interstitial water, **I** 153, 167-169; **II** 111-126; **III** 197-198

Leachate, **I** 143, 153, 324, 327

Scrubber sludge, **II** 24-37

Soil, **I** 165, 167, 204, 218-219, 307-308; **II** 8-12, 16-22

Storage effects, **II** 89-107

Wastes, **I** 17; **III** 42-43

Sampling and preservation *cont.*

Wells, **I** 167-168, 204, 307-309; **II** 38-50

Scrubber sludge, **II** 24-37

Sediments, **II** 286-287

Silicates, **III** 213-229

Simulated landfill (*see also* Column leaching), **II** 111-126; **III** 153-154

Site-specific hazard assessment, **I** 331-344, 358-362; **III** 191-192

Slags (*see also* Foundry wastes), **I** 17; **III** 61-80, 301-302

Sludges (*see* Biological sludge; Chemical plant wastes)

Smelter tailings, **II** 53-66

Soil (*see also* Analysis; Batch leaching; Extraction; Sampling and preservation; Field and large-scale studies)

Base saturation, **II** 156

Cation exchange capacity, **II** 152-167

Cation mobility, **III** 81-91

Extraction, **III** 92-99

Liners, **II** 231-264

Loading, **III** 118-126

Toxicity, **II** 313-320

Solidified waste (*see* Fixed wastes)

Solids separation, **III** 364-372

Sonification, **I** 219; **II** 205, 208

Soxhlet extraction, **II** 11, 206-207; **III** 96-99

Stability, **II** 294

Stabilized waste (*see* Fixed wastes)

Standard Leach Test (U. Wisconsin), **I** 11-12, 15, 169-170

Steel mill wastes, **III** 171-192, 300-301, 316, 361-373

Superfund (*see* CERCLA)

Survey analysis (total content), **I** 240-266; **III** 42-47

T

Tars (*see* Oily waste)

Tetrahydrofuran, **II** 41-49

Thai practices, **III** 346-360

Toxicant extraction procedure (*see* Batch leaching)

Toxicity (*see also* Bioassay), **I** 341, 352-360; **II** 299-320

Trinitrotoluene, **I** 305-320

U

United Kingdom practices, **II** 111-112

U.S. Army Corps of Engineers elutriate test, **I** 8-12, 333-335

V

Vapors (*see* Gases)

Volatile organic compounds (*see* Organic constituents)

W

Waste management, **III** 291-319, 346-360, 373-393

Waste utilization, **III** 230-288, 309-319, 388

Wastewater treatment sludge (*see* Biological sludge)

Water determination, **III** 95

Wells (*see* Sampling and preservation)

Wood preserving waste, **II** 9-22

Z

Zinc sulfide residue, **II** 53-66
