

Subject Index

A

Acanthamoebae, 163
 Aerobic decay organisms, 136
 Aerosol challenges, 50
 Aerosolization, 71, 84
 Aerosols, 60, 99, 115, 215, 221
 mycobacteria in, 71
 Amoebae, free-living, 163
 Andersen sampler, 71
 Anthrax, 50
 Arthropods, 115
Aspergillus, 201

B

Bacillus Anthracis, 50
 Bacteria, 1, 60, 190
 aquatic, 84
 Bioaerosols, 60, 71, 115, 215
 impinger and membrane filter
 monitoring, 99
 research, 215, 221
 Building commissioning, 221, 228
 Building ecology, 221, 228

C

Chlamydia pneumoniae, 99
Chlamydia psittaci, 99
Chlamydia trachomatis, 99
 Control costs versus health risks,
 microorganisms, 228
Coxiella burnetii, 115
Cytophaga, 60

D

Data interpretation, sampling, 1

E

Economics, microorganism
 control, 228
 Endotoxins, 190
 Energy conservation, effects on
 indoor air, 221, 228

F

Flow cytometry, 163
 Fungi, 1, 136

G

Gene probes, 163
 Goat hair, 50
 Gram negative bacteria, 60, 190
 Gram positive bacteria, 50

H

Hartmannella, 163
 Heating, ventilating, and air
 conditioning systems, 60
 Humidifier fever, 190
 Hypersensitivity, 60, 136, 215

I

Immunosuppressants, 201
 Impinger, all-glass, 99
 Inhalation anthrax, 50

L

Laser optics, 163
Legionella, 163
 pneumophila, 84
 Legionnaires' disease, 84
Limulus, 190
 Lipoprotein envelopes, 21

M

MAIS group, 71
 Microbial amplification, 221
 Microbial contaminants, 115
 Microbial sampling, 1
 Microorganisms
 control costs versus health
 risks, 228
 sampling data, 1
 Molds, 201

244 BIOLOGICAL CONTAMINANTS IN INDOOR ENVIRONMENTS

Monitoring

- impinger and membrane filter monitoring, 99
- microbiological and chemical, 84

Monoclonal antibodies, 163

Mycobacteria, 71

Mycobacterium avium, 71

Mycobacterium gordonae, 71

Mycobacterium intracellulare, 71

Mycobacterium scrofulaceum, 71

Mycobacterium terrae, 71

Mycoplasmas, 21

Mycotoxicosis, 201

N

Naegleria, 163

O

Ornithosis, 99

P

Parrot fever, 99

Particle size, 71

Pathogens, 71, 84, 99, 163, 201

- microbial, 115

- mycobacteria, 71

- opportunistic, 136

- pulmonary, 176

- gram negative bacteria, 60, 190

- gram positive bacteria, 50

- sampling data, 1

- viruses, 21

Penicillium, 201

Pneumonia, 176

Pneumonitis, hypersensitivity, 60

Protocols

- analysis, 1

- sampling, 163

- air, 21, 50, 71, 136, 201, 215

- microbial, 1

- reservoir, 136

- water, 71, 84

Psittacosis, 99

Pulmonary pathogens, 176

Q

Q fever, 115

R

Research, indoor air, 215, 221, 228

- case studies, 1

- microorganisms, 176

Respiratory viruses, 21, 176, 190

- anthrax, 50

- gram negative bacteria, 60

S

Sampling, 163

- air, 21, 50, 71, 136, 201, 215

- bioaerosol, 215

- impinger and membrane

- filter, 99

- microbial, 1

- reservoir, 136

- water, 71, 84

Spores, 136

Stachybotrys, 201

T

Toxins, 1

Trichothecenes, 201

V

Viral diseases, 21

Viruses, 1, 21

W

Water

- bacteria, 71, 84

- sampling, 71, 84

Water systems, 84

- maintaining to reduce

- bacteria, 84

Woolsorter's disease, 50
