FOREWORD

This Symposium on Fundamental Viscosity of Bituminous Materials reviews the relation of absolute viscosity of bituminous materials to the problems associated with the construction and performance of bituminous highways. ASTM Committee D-4 on Road and Paving Materials sponsored this symposium, which was held June 28, 1962, at the Sixty-fifth Annual Meeting of the Society in New York City. Mr. W. J. Halstead, Bureau of Public Roads, was Symposium Chairman and presided at the Technical Session.

NOTE.—The Society is not responsible, as a body, for the statements
and opinions advanced in this publication.

CONTENTS

	PAGE
Introduction—W. J. Halstead.....	1
Fundamental Viscosity and How It Is Measured—D. F. Levy.....	3
Relation of Empirical Tests to Fundamental Viscosity of Asphalt Cement—J. M. Griffith and V. P. Puzinauskas.....	20
Discussion.....	44
The Relation of Absolute Viscosity of Asphalt Binder to Stability of Asphalt Mixtures—J. Y. Welborn, W. J. Halstead, and R. E. Olsen.....	48
Discussion.....	65
Application of Asphalt Viscosity to Paving Problems—R. L. Griffin, J. O. Izatt, and J. A. Lettier.....	67
Viscoelastic Properties of Paving Asphalts—F. C. Gzowski.....	80
Summary—F. J. Benson.....	95
