

Subject Index

A

Aggression, bluegill, 387
 Air, ambient, bisphenol-a effects from, 286
 Alkylphenols, 39, 182
 Alligators, 254
 Ammonia, 447
 Analysis of variance, 362
 Androgens, 226, 461
 screen assay, 39
 Aneuploidy, 401
 Anthracene photooxidation product, 350
 Antiandrogens, 39, 271
 Antioxidants, 39
 Aromatase, 226, 254
 Aromatic hydrocarbons, polycyclic, 350, 401
 Automated monitoring, fish behavioral toxicology, 370

B

Beef heart mitochondria, 350
 Birds, flow cytometry, 401
 Bisphenol-a, 286
 Bluegill, 387, 423
 Brain aromatase, 226
 Brain-pituitary-gonad axis, 207

C

Caddisflies, 423
 Cadmium, 362
Caenorhabditis elegans, 305
 Calcium homeostasis, 165
Callinectes sapidus, 341
 Carp, 182
 Cecil series soil mix, 305
 Cell proliferation assay, 39
 Chironomid sediment testing, 473
 Chloride, 447
 Cholinesterase, 370
 Chronic studies
 daphnids, 473
 implantable pellets, 413
 Ciliate, freshwater, 319
 Comet assay, 341
 Composite resin dental materials, 286
 Copper, 305, 329
 Corticosterone, 254
 Cortisol, 254
 Crabs, 119

blue, 341

Crayfish, 362
 Crustacean larvae, 119
 Crustacean metamorphosis, 119
Cyprinus carpio, 182
 Cytochrome c oxidase, 350

D

Daphnids, 3
 chronic test, 473
 DDD pesticide, 239
 DDT pesticide, 239
 Deiodination, 136
 Dental materials, composite resin, 286
 Dichlorophenolindophenol, 350
 Diethylstilbestrol, 271
 Differential display polymerase chain reaction, 24
 Dihydroxyanthraquinone, 350
 Dioxin, 461
 DNA content, 401
 DNA single-strand breaks, 341
 Duckweed, 473

E

Electron transport, 350
 Electrophiles, 319
 Embryo effects, crab, 341
 Endosulfan, 39
 Energy metabolism, 119
 Epoxy, 286
 Estradiol, 24
 Estrogen, 59, 182, 226, 461
 bisphenol-a, 286
 diethylstilbestrol, 271
 ethynylestradiol, 239
 receptor, 24
 Ethoxyresorufin-O-deethylase, 461
 Ethynylestradiol, 239

F

Feeding efficiency, bluegill, 387
 Final oocyte maturation, 165
 Fish, 59, 95, 136, 254, 447
 bluegill, 387, 423
 carp, 182
 early life stage test, 473
 flow cytometry, 401
 platyfish, 207

Fish—*continued*

- rainbow trout, 370
- tilapia, 239, 413
- Flow cytometry, 401
- Fluorescent staining, 401
- Fly ash, 423
- Fonofos, 387
- Food, canned, bisphenol-a effects from, 286

G

- Gel electrophoresis method, single cell, 341
- Gene induction profiles, 24
- Germinal vesicle breakdown bioassay, 165
- Gonadotropes, 207
- Gonad, 165, 207, 239, 254, 423
- Gonopodium, 207
- Growth
 - inhibition test, duckweed, 473
 - kinetics, 319
 - screening endpoint, 3
 - xenobiotic chemical effects on, 59

H

- Heart mitochondria, beef, 350
- Hormones, 59
 - brain-pituitary-gonad, 207
 - hypothalamus-pituitary-gonad, 165
 - juvenile hormone analogs, 119
 - kinetics, 136
 - steroid, 254
- Humans
 - pesticide effects, 271
 - reproductive dysfunction, 59
 - sanitation, Cameroon, 447
- Hydrophilic chemicals, 165
- Hyperactivity, crayfish, cadmium-induced, 362
- Hypothalamus, 165

I

- Implantable pellets, methyl mercury chloride, 413
- Insect growth regulators, 119
- Insecticide fonofos, 387
- Invertebrates, 3, 59

L

- Larval development, crustacean, 119
- Lead, 165
- Lemna*, 473
- Lepomis macrochirus*, 387

- Leukopenia, 423
- Light scatter, 401
- Locomotion, 370

M

- Macrophyte toxicity test, aquatic, 473
- Mammals
 - flow cytometry, 401
 - pesticide effects, 271
- Maturation
 - final oocyte, 165
 - inducing steroid, 165
 - screening endpoint, 3
 - sexual, 207
 - toxicity databases, organochlorine pesticides, 271
- Medaka, 226
- Mercury, methyl, 413
- Metals, 341
 - heavy, 362
 - trace, 423
- Methyl testosterone, 226
- Minnows
 - fathead, 329
 - sheepshead, 24
- Mitochondria, 350
- MRNA, 24
- Mussels, 319
- Mysid reproductive assays, 3

N

- Nematode, 305
- Neonatal development, screening endpoint, 3
- Nitrite, 447

O

- OECD guidelines, 182
- Office of Pesticide Programs, 473
- Office of Pollution Prevention and Toxics, 473
- Oncorhynchus mykiss*, 370
- Orconectes rusticus*, 362
- Oreochromis mossambicus*, 239
- Oreochromis niloticus*, 413
- Organization for Economic Cooperation and Development, 473
- Organochlorine pesticides, 165, 271
- Organometallics, 341
- Organophosphate, fonofos, 387
- Organophosphorus pesticides, 165
- Oryzias latapies*, 226

P

Pesticides (See also specific types), 165,
341, 370
Phthalates, 39
Physiological indicators, 95
Pituitary, 165, 207
 tilapia, 239
Plant toxicity test, 473
Platyfish, 207
Polychlorinated biphenyls, 165, 461
Polycyclic aromatic hydrocarbons, 350, 401
Population growth kinetics, 319
Predicted environmental concentration/
 predicted no effect concentrations,
 182
Probit analysis, 305
Prolactin, 239

R

Radionuclides, 401
Reptiles
 alligators, 254
 flow cytometry, 401
Reproduction, 59, 182, 207
 polychlorinated biphenyl hazards to, 461
 screening endpoint, 3
 toxicity database, organochlorine
 pesticides, 271
Respiratory electron transport, 350
Retinoids, 136
Rostral pars distalis, 239

S

Sanitation, public health impact, Cameroon,
447
Screening tests, endocrine disruption, 3
Sediment test, chironomid, 473
Selenium, 423
Selenocysteine-containing microsomal
 deiodinases, 136
Sex differentiation, 226
Signal transduction, 165
Silt/algal food, 329
Soil bioassay, 305
Steroid
 maturation inducing, 165
 sex, 226, 254
Stress responses, 59
Sugar processing effluents, 447

Surgical glue, 413
Surveillance programs, 95
Sutures, 413
Swimming behavior, 370, 387

T

Teleosts, 165
Tennessee Valley Authority, 329
Testosterone, 254, 461
Tetrahymena pyriformis, 319
Thyroid, 136
Thyroxine, 136
Tilapia, 413
 prolactins, 239
Toxic equivalency factor approaches, 461
Toxic Substances Control Act, 473
Trans-2-nonenal, 319
Triiodothyronine, 136
Trout, rainbow, 370

U

Ubiquinone-cytochrome c oxidoreductase,
350
Unionid mussels, 329
U. S. Environmental Protection Agency,
329, 473
Utterbackia imbecillis, 329

V

Vitellogenin, 24, 182

W

Waterborne illnesses, 447

X

Xenobiotics, 136, 165, 254
 chemicals, 59
Xenoestrogens, 39, 165
Xiphophorus, 207

Y

Yeast assay, 39

Z

Zooplankton, 329
