FOREWORD

The papers and discussions in this Symposium on Application of Statistics were presented at the First Pacific Area National Meeting of the American Society for Testing Materials held in San Francisco, Calif., October 10-14, 1949.

The Symposium was developed for the Committee on Arrangements by C. M. Wakeman, Harbor Dept., Los Angeles, Calif.

This session was presided over by Past-President Arthur W. Carpenter, The B. F. Goodrich Co., Akron, O.

NOTE—The Society is not responsible, as a body, for the statements
and opinions as advanced in this publication.

CONTENTS

	PAGE
Introduction—C. M. Wakeman	1
The Economic Relationship Between Design and Acceptance Specifications—Eugene L. Grant	3
Discussion	10
Precision and Accuracy of Test Methods—Grant Wernimont	13
Discussion	25
Use of Statistics to Determine Precision of Test Methods—W. J. Youden and J. M. Cameron	27
Modern Quality Control—Introduction by Simon Collier to Motion Picture	35

THIS PUBLICATION is one of many issued by the American Society for Testing Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the A.S.T.M. technical committees, or compilations of data developed in special Society groups with many organizations co-operating. A list of A.S.T.M. publications and information on the work of the Society will be furnished on request.
