FOREWORD

Two sessions, the Eleventh and Fourteenth, of the Sixtieth Annual Meeting of the American Society for Testing Materials, held in Atlantic City, N. J., June 18, 1957, were devoted to a Symposium on Spectrochemical Analysis for Trace Elements. This Symposium was sponsored by Committee E-2 on Emission Spectroscopy through a Symposium Committee under the chairmanship of D. L. Timma, then with Monsanto Chemical Co., now with Mead Johnson Research Laboratories. Mr. Timma acted as chairman of both sessions at the meeting.

NOTE.—The Society is not responsible, as a body, for the statements
and opinions advanced in this publication.

CONTENTS

	PAGE
Introduction—D. L. Timma.....	1
Emission Spectrometric Determination of Oxygen in Metals—V. A. Fassel, W. A. Gordon, and R. W. Tabeling	3
Spectrographic Determination of Trace Elements in Metals—J. A. Norris.....	23
Trace Analysis by Means of the Graphite Spark—J. M. Morris and F. X. Pink.....	39
Principles of Quantitative Biological Emission Spectrography—B. L. Vallee.....	47
Discussion.....	57
Applications of Emission Spectroscopy to Trace Element Analysis in Plant and Soil Samples—W. G. Schrenk.....	58
Spectrochemical Analysis for Trace Elements in Geological Materials—K. J. Murata ..	67
Discussion.....	79

THIS PUBLICATION is one of many issued by the American Society for Testing Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Much of the data result from the voluntary contributions of many of the country's leading technical authorities from industry, scientific agencies, and government.

Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the ASTM technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of ASTM publications and information on the work of the Society will be furnished on request.
