

Subject Index

A

AASHTO T307, 16, 30, 59, 176, 224
Aggregate, 165
Asphalt, 3

B

Backcalculation, 85
Backpressure saturation, 59
Base, 3, 152, 165
Bottom ash, 191

C

California bearing ratio, 85, 99
Coarse-grained materials, 252
Cohesive soil, 70, 224, 233
Compliance, 176
Cone penetration test, 233, 252

D

DarWIN, 224
DNER-ME 131/94, 114

E

Elastic modulus, 191
ELSYM5, 224

F

Falling weight deflectometer test, 85, 191
Federal Highway Administration, 30, 41, 176
FHWA RD-96-176, 41
Field testing, 3, 152, 252
Flexible pavement, 3
Florida subgrade soils, 85
Foundry slag, 191

G

Gravel, 191

I

Industrial by-products, 191

K

KENLAYER, 191

L

Laboratory testing, 3, 16, 114, 152, 165, 209, 252
repeatability, 30
startup procedures, 41
Large-scale model experiment, 191
Layered elastic model, 224
Lime rock bearing ratio, 85
Loading period, 70
Long-Term Pavement Performance Program, 30, 41, 209, 224
Long Term Pavement Performance Protocol P46, 16, 41, 129

M

Moisture content, 70
Motion controller, 129

N

Non-cohesive soil, 224

P

Pavement design, 3, 59, 85, 224
PID adaptive controller, 141
Polypropylene fiber, 114
Pore water pressure, 70
Prototype test, 191

Q

Quality control and assurance, 41, 152, 209

R

Repeated-loading triaxial test, 99, 114, 165, 252
Resilient modulus, 3, 16, 30, 41, 59, 70, 85, 99, 114, 129, 152, 191, 209, 224, 233, 252
testing, 141, 165, 176

S

Saturated soil, 70
 Seal drag, 176
 Seasonal moisture variations, 59
 Seismic modulus, 152
 Servo-hydraulic system, 129
 Soil-cement mixtures, 99
 Soil-polypropylene fiber mixtures, 114
 Soil reinforcements, 114
 Soil stiffness, 30
 Soil support value, 85
 Strategic Highway Research Program, 30, 176
 Stress-dependent constitutive model, 224
 Stress wave method, 152
 Subgrade, 3, 16, 30, 70, 99, 152, 176, 224
 stresses, 59

T

Test automation, 141
 Testing equipment, 129
 Triaxial test, 129, 165, 176, 252

U

Unbound materials, 16, 41, 209
 Unconfined compression test, 99
 Unsaturated soil, 70

W

Water content, 59

Y

Young's tangent modulus, 99
