FOREWORD

The papers in this publication were presented at a Symposium on X Ray and Optical Emission Analysis of High-Temperature Alloys, which was held during the Sixty-seventh Annual Meeting of ASTM, in Chicago, Ill., June 21-26, 1964.

The symposium was sponsored by ASTM Committee E-2 on Emission Spectroscopy. Chairman of the symposium was Robert S. Kelly of Republic Aviation Corp.

NOTE--The Society is not responsible, as a body, for the statements
and opinions advanced in this publication.

CONTENTS

| | PAGE |
|---|------|
| Introduction—R. S. Kelly..... | 1 |
| X Ray Spectrochemical Analysis of High-Temperature Alloys—A. H. Gillieson, D. J. Reed, K. S. Milliken, and M. J. Young..... | 3 |
| Discussion..... | 18 |
| Spectrochemical Analysis of High-Temperature Alloys by Spark Excitation in Argon and Nitrogen—H. C. Dilworth..... | 23 |
| Discussion..... | 35 |

(\$6.00)

THIS PUBLICATION is one of many issued by the American Society for Testing and Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Much of the data result from the voluntary contributions of many of the country's leading technical authorities from industry, scientific agencies, and government.

Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the ASTM technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of ASTM publications and information on the work of the Society will be furnished on request.
